## Cushings Get Their Lumber Out.

Andrew Cushing & Co. received good news Monday from W. J. Nobles, of Fredenicton, their lumber operator. In face of low water and other difficulties Mr Noble has landed the Cushing 14,000, 000 drive safely in the corporation limits The drive was from the extreme head waters and Mr. Nobles brought the log down in twenty-three days.

This would have been a good record with good water, but under the conditions which have been evailing it is considered re-markable work even for so competent a

All the Cushing lumber, with the exec tion of one or two millions, is now in safe quarters, and these logs are also considered market not being so good and guaged their cut accordingly. They had 12,000,000 hung up last year, and this has come along in

spring.

The Cunliffes, with about 15,000,000 fo W. H Murray, are reported sixteen mile w. H Murray, are reported street mass above the Allegash falls, and it is feared these logs will not come out this year. It is figured that 30,000,000 is already hung up on waters tributary to the St. John, and that there will likely be more.

The steam shovel is entirely constructed of steel, and the bucket holds two and a half cubic yards of material. There are three double sets of engines, and the arrangements are such that very quick work

can be done in the handling of material. The shovel can be worked so quickly that four times a minute it will place a load of naterial on the car. About 300 flat cars per day of ten hours can be handled by the new machine.

The first trial was made at Harvey yesterday, and in a half hour Mr. Donald had sixteen flat cars loaded.

The C. P. R. are getting a few others of

the same type of steam shovel or the west-ern section of the line.
