A Comment of the

HOUSEHOLD HIN'S.

Never sleep opposite a window or where a strong light will strike the eyes on awakening.

When polishing grates add a little powdered alum to the black lead, and you will find it does its work better. If in covering a kitchen table with eilcloth a layer of brown paper is put on first it will prevent the oilcloth cracking and make it wear three times

as long. To restore polish to the surface of marble make a paste with oxide of tin or putty powder and water. Rub well in with a piece of rag, then polish with

clean rag. To keep mattresses clean cover them with unbleached calico cases. Do the same to your pillows. The cases can be taken off and washed occasionally, and the mattress will keep clean for years.

For grease spots on matting use fuller's earth. Make it into a thin paste with water and spread quickly over the spots. When dry brush off the loose powder, and the spots will Do not miss this opportunity to visit the Pacific Coast. Round trip tickets are now on sale and until Aug. 13. to Vancouver and Victoria, B. C., Seattle and Tacoma, Wash., and Porters have disappeared.

A housekeeper claims that gilt picture frames, ornaments, etc., may be made to look as good as new if sponged with a mixture made with an ounce of alum, an ounce of common kitchen salt, two ounces of purified niter and a gill

White Hair.

Mate Mair.

Have you silvery white hair of which you are justly proud? The silvery or snowy head is unusual and should be valued at its proper worth. So called silver or snow tresses are usually dusty gray, drab, yellewish white or a sickly snuff color. The brunette, as a rule, makes the handsomest old lady, as her hair turns white if it changes with age or from any other cause. The blond is apt to have tresses of half a dozen different shades once the silver threads appear among the gold. Bleaches are powerless to hurry the whitening process. The hairdressers have not yet discovered a process to bleach hair white. Frequent shampoos with castile soap and a little soda in the water will keep the many shadthe whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is tenfold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the gequence. ed hair bright and live looking during the aggravating transition stage. Once it is a good, clear, clean white an invaluable aid in keeping it so is to rinse it after the shampoo in bluing water. The effect will be the same as when clothes are blued. The limp, yellow hue will give way to a bright, clean white.

The Baby's Clothes.

A mother rises to make a plea for the baby. She says that baby's clothes are almost invariably too tight or else they are made to fit so snugly that in a few months the poor infant has outgrown them, yet is still thrust and pinned into them by the foolishly economical mother. Very eften fretting and crying result from neckbands which are too tight or from armholes The girl is the mother of the woman just as "the boy is the father of the man." The period when the womanly functions begin is one to be carefully watched and considered. Irregularity or derangement at this time may be promptly met and cured by the use of Dr. Pierce's Favorite Prescription. But neglected at this critical period may entail years of future suffering. "Favorite Prescription" acts directly upon the womanly organs, giving them perfect vigor and abundant vitality. It removes the obstructions to health and happiness, and delivers so narrow as to restrict free move-ment. All babies claim the right to kick and squirm as much and as often as they feel like it. This wise mother points out that a loose dress need no look slovenly. Neck and sleeve bands can be so arranged as to be adjustable. Beading through which narrow ribbon is run will accomplish this. sliceves are too long use two baby pins, of which you surely have a set in gold or silver, to hold them up. Time and strength and baby's good nature are all three saved by making the, little dresses generous in proportion to the figure of their little wearer.

A Fresh Air Cleset. Anybody who can drive a nail can make a fresh air closet at a cost not to exceed a dellar. It is only a framed box with door and sides of wire gauze and shelves across inside. It is best made fast to the wall at such a height as to be safe from prowling cats and as to be sate from proving cats and should have, further, a trusty lock. Put away food in it in clean earthen dishes, never in any sort of metal, not even silver. Slip each dish into a sep-arate cheese cloth bag and twist the bag end tight. If ants, black or red, discover the closet paint the woodwork all outside with camphor once a fort night. Twice a year take down the whole contrivance and scald it outside and in with boiling soda water.-Good Housekeeping.

Bluing Powder.
In buying powder for bluing ask for soluble blue. Other compounds need the addition of oxalic acid to dissolve the color wholly. Strong acids are used in many of the prepared bluings on the market, and their action when Tickets are now on sale and until August 18th, to Los Angeles or San Francisco, Cal., at reduced fare of \$68.60 for the round trip, valid for rereturn until October 15th. Remember that the Grand Trunk service is unexcelled to Chicago, making direct connection with all lines for west and south-west. combined with some soaps produces rusty spots which are almost impossible to remove. Get the powder of a reliable chemist. Ten cents' worth will make six quarts of bluing. The addition of a teaspoonful of vinegar to every quart will add much to its efficacy and brilliance.—Exchange.

Growing Girls.

Better than all the medicines in the world for growing girls is a course of what may be termed domestic gymnaswhich can easily be practiced at home and cost nothing. It is far better to guard against such evils as knock knees, pigeon tees, turned over ankles, flat foot and other deformities than to wait until they put in their appearance and then hasten to consult a specialist.

Cultivate a Caim Temper.

When the worries and cares of the day fret you and begin to wear on you and you chafe under the friction be caim. Stop, rest for a mement and let caimness and peace assert themselves. If you ist these irritating outside influences get the better of you you are confessing your inferiority to them by permitting them to dominate.

AN UNKNOWN LAND.

Parts of the Old Roman Empire Un-seen by Modern Eyes.

Few people appreciate the fact that Parts of the Old Roman today, at the dawn of the twentieth century, there are still parts of the old Roman empire where no traveler of modern times has been; that there are ancient towns which no tourist has seen, temples and towers that no lover of classic literature has delighted in, inscriptions in ancient Greek that no savant has as yet deciphered—whole regions, in fact, full of antiquities for which no Baedeker has been written and which are not shown upon the latest maps. There are regions within our temperate zone where no modern European foot has trod, so far as we are able to tell-regions where the civ ilization of Greece and Rome once flourished and where fine monuments of classic art and of an unfamiliar art that supplanted the classic waste their beauties upon the ignorant sight of

half civilized nomads. To realize the truth of this one needs only to cross the ranges of mountains that run parallel to the eastern coast of the Mediterranean and, avoiding all caravan routes, journey independently about the barren country that lies be tween these mountains and the Euphrates. Here is a territory which, though not whoily unexplored, is full of most wonderful surprises. Here are cities and towns long deserted, not se great or so imposing perhaps as Pal myra, but far better preserved than the city of Zenobia and giving a much truer picture of the life of the ancient inhabitants than one can draw from these famous ruins.

These towns are not buried, like the great cities of the Mesopotamian plains, nor have their sites been built upon in modern times, as those of the classic cities of Greece have been. They stand out against the sky upon high ridges or lie sheltered in sequestered valleys, presenting to the view of the traveler as he approaches them very much the same aspect as they did in the fourth century of our era when inhabited by prosperous, cultivated and happy peo-ple or when deserted by those inhabitants some 1,300 years ago.

A Queer Career. The Paris papers record the death of the aged Mgr. Bauer, who was formerly father confessor to the Empress Eugenie and is known to have had a considerable influence over the unfortunate direction of her policy. He was a Jew by birth, and during the fourth decade of the last century he was a busy man upon the Paris bourse. In 1855 he astounded his kinsfolk and fellow financiers by turning Roman Catholic. He was no less successful as a Christian than he had been as a Hebrew. He was ordained priest, taken up by Napoleon III., became the religious counselor of the empress and was made a monseigneur by Pope Pius IX. A few years ago the old priest added to the list of surprises which characterized his life by taking to himelf a wife.—Westminster gazette.

Straw Hats Need Brushing.
"It's a strange thing," said the hat
man after he had sold a three dollar panama, "that men who brush a derby or a soft hat every day never put s brush to a straw hat. There is no rea-son for the neglect. Straw hats need brushing more often than the others, for the dust clings to them and is more neticeable. If you brush your straw hat every day and scrub it with a stiff brush dipped in tepid water once or twice a season it will last two years with proper care."—New York Press.

The Source of an Epidemic. typhoid epidemic not long ago, and it vas suspected that it was started in a house in the upper part of the village where there had been some cases prior to the general outbreak. To test this theory fluorescin was put into the

drainage water from this house, color-ing it green. Nine hours later the whole water supply of the town was colored green, thus proving the fatal connec-Salt to Prevent Cancer.
In a long study of malignant cancers

Captain Rost, a young medical officer in India, has found that the bacteria attending the disease develop only when the natural chlorine of the body falls below the normal. By adding to the chlorine of the food, especially by increasing the use of salt, he claim have cured one patient in the eight treated and to have benefited the others.

The Yard Measure. King Henry I. had an arm thirty-six inches long. That is why the English yard is its present length, a little fact which many students have learned and forgotten.

Box Sheeks.

A box shook is a set of boards prepared for the making of a box and packed up for convenience of transport. A house shook is all the material for one frame house put up in compact form for shipment, etc.

Coffee Inebriates

There are coffee inebriates in Paris. Usually they are laundresses, a class of women who are especially devoted to the fragrant beverage. The coffee inebriate comes at last to such a state that he or she lives almost exclusively, on an effusion of the beloved berry, with the addition of a little bread soaked in it.

Presidential Pardons. The president of the United States cannot pardon a person convicted under the laws of any particular state. His pardoning power refers only to crimes against the federal laws.
