

parations and engravings. The Practice of Surgery comprises a Course of Lectures on Surgical Anatomy and Operative Surgery, exhibited upon the subject, in which the uses of the various Surgical Instruments, and the application of the different kinds of Surgical Apparatus, are practically shown to the class.

MIDWIFERY AND THE DISEASES OF WOMEN AND CHILDREN.—The first part of this Course will be occupied with the consideration of the anatomy of that part of the system immediately concerned in parturition, in its normal and abnormal types; after this follows an ample review of the process of parturition in all its stages and varieties, from labour of the simplest kind to those of the most complex variety, with a detail of the especial management of each particular case. The third part of the Course will be devoted to those important diseases of females immediately connected with child-birth; and the fourth and last, to infantile diseases.

The Course will be illustrated by a series of drawings executed on a large scale; by humid morbid preparations and preparations in wax; and instrumental delivery will be exemplified on an artificial pelvis adapted to the purpose. The Course will be fully brought up to the latest literature in the several subjects.

MEDICAL JURISPRUDENCE.—The topics discussed in connection with this chair comprise those commonly regarded as belonging to Forensic Medicine—the subject of Toxicology employing a duly important period of the Course. The modes of testing for the more important poisons will be exhibited, and the post-mortem appearances resulting from their administration illustrated by plates. A few lectures on Insanity, Public Hygiene, and Medical Police, will also be given.

CLINICAL MEDICINE.—The mode of teaching pursued is that approved of at some of the best English and Foreign Schools. Each case is examined at length by the Professor before the class, and its points of interest or peculiarity mentioned, the diagnosis pronounced, and explained if made, and the mode of treatment about to be adopted described, with the reasons which have influenced its selection. Each member of the Clinical Class will in turn be
