T. B. BROADFOOT, Fergus, Ont.

Women's Institute Work.

The number of Ontario Women's Institute meetings to be held this summer is 832. At a conference of workers, held on April 26 and 27, many features of interest to the Institute members were discussed, among them being the campaign directed by Dr. C. C. James in the interest of Production and Thrift. Patriotic work, especially that of the Red Cross, has occupied most of the time and attention of the Institutes since the war began, and they will, of course, continue to emphasize this feature. Mrs. H. P. Plumptre, Hon. Secretary of the Canadian Red Cross Society, outlined fully to the delegates the present needs, stating that the articles marked by a double cross in "War Work" were very much needed, those indicated by one cross not so urgently required, and those without a mark required in still less quantities. The delegates were asked to request the members not to devote their attention to preparing surgical dressings. Among the great needs are dressing gowns, pyjamas, and shirts with collars for hospitals.

The delegates were asked at the conference to urge the Institute officers to encourage the girls to join the Institutes in as large numbers as possible, and, if possible give them some encouragement and assistance by planning for programs which would be of special interest and value to the girls, and also give them some special work to do independent of the other members.

The report on Demonstration-Lecture work during the year was very encouraging indeed. Fifty courses of two weeks each and attended by something over 2,000 girls and women were very much appreciated. These courses included Food Values and Cooking, Home Nursing and Sewing. In one class in Manitoulin the mother, grandmother and daughter took instruction together.

The importance of co-operation and business methods in preparing their goods for market and selling the same were urged by F. C. Hart, of the Co-operation and Markets Branch.

Neglected and Dependent Children, report of Commission on Unemployment, Health Problems, were among the other subjects discussed.

W. Bert Roadhouse, Deputy Minister of Agriculture, congratulated the lecturers upon the splendid results attending their efforts, and expressed the greatest confidence in the possibilities surrounding the work of the Women's Institutes.

A wide field is to be covered in the summer work, and all should take an interest and help make it a success.

Questions and Answers.

1st—Questions asked by bona-fide subscribers to "The Farmer's Advocate" are answered in this department free.

2nd—Questions should be clearly stated and plainly written, on one side of the paper only, and must be accompanied by the full name and address of the writer.

3rd—In veterinary questions, the symptoms especially must be fully and clearly stated, otherwise satisfactory replies cannot be given.

4th—When a reply by mail is required to urgent veterinary or legal enquiries, \$1.00 must be enclosed.

Miscellaneous.

A Tenant Question.

A rents a farm from B for 5 years. A has to feed all straw on place. Shortly after A gets possession a wind storm wrecks the barn on property and B, sooner than repair the barn, makes a verbal agreement with A to draw straw off the place and return 3 loads of manure for every 2 of straw no specifications regarding size of loads or quality of manure. A certain company hold a mortgage on B's farm, they close the mortgage and sell the place when 3 years of A's lease has expired. A gives up possession and draws back manure in winter time according to agreement between A and B. This manure is put in a pile where it heats and rots. C buys this farm. He loads up this manure in the spring, tramps the loads and puts on all his tramps the loads and has about half as many loads as A put in the pile. Can A be compelled to make up the balance or other half.
 A. D.

Ans.—From our understanding of the question if A drew back the agreed-upon number of fair-sized loads of manure he has done his part and cannot be called upon to do more.

The Importance of FRESH oil

Oil is composed of very small balls, or globules, which roll between the parts oiled—that is the action of lubrication. As soon as these balls become broken, as they quickly do, they are useless—worse than useless for they keep away fresh oil. That is why the old-time splash system of oiling fails—it uses and re-uses "worn-out" oil. Following the lead of big automobile makers, we use in the "Superior" Separator

"Direct-to-Bearings" Oiling System

Fresh oil is dropping on the important bearings all the time, and yet less oil is actually used in a year than with the "Splash" or "Bath in oil" system.

Write to-day for book of "SUPERIOR" Separator facts, showing why our machine is not only the easiest to turn, but skims the closest of all.
