

Here's the Book that "Made Over" a Thousand Farms

"What the Farmer Can Do With Concrete" is a 100-page book—now in the hands of over 100,000 Canadian farmers. Fully a thousand of these have practically "made over" their farms by its help—thousands of others have started to act on its valuable instructions by making some of their much-needed improvements of

CONCRETE

One of the many useful hints it gives is on the construction of a proper Barn Approach—like that here illustrated. Built this way of Concrete—the "Approach" provides room for a concrete Root Cellar.

This is one of many good things you will find in this free book—there are hundreds of other suggestions, some perhaps more valuable to you than this one. It shows you how to use Concrete in building a Silo—a Barn Foundation—a Water Tank—a Culvert—a Walk—or a fence post.

Remember! Concrete Improvements are fireproof; rot-proof; vermin-proof; sanitary and indestructible.

Do You Stay Home When Roads are Bad?
There's a reason for the road re-up that handicaps you farmers every spring. It happens because our Roads are made of materials that are not permanently bound together—they are readily softened by water and "work up" into mud every Spring.

Permanent Highways of Concrete
never become muddy—because the particles are "bound" together by Portland Cement—forming a road as durable as your Concrete Silo or your Concrete Barn Foundation.
