

## Fatigue from Poisons in System

AND GOOD HEALTH CAN ONLY RETURN WHEN THE BLOOD FILTERS, THE LIVER AND KIDNEYS, ARE SET RIGHT BY

## DR. CHASE'S KIDNEY-LIVER PILLS

Tired, languid feelings are the result of the accumulation of waste products in the system. On the failure of the liver and kidneys to remove these impurities, the blood becomes filled with poisonous substances which instead of aiding the functions tend to arrest them and give rise to pains in the limbs, backaches, headaches, and tired, worn-out feelings.

There remains to be discovered a more prompt and effective means of enlivening and invigorating the action of the liver and kidneys than Dr. Chase's Kidney-Liver Pills. In fact, this medicine is unique in its combined influence on the liver and kidneys, and to this double action is attributed its extraordinary success in the cure of complicated diseases of these filtering organs.

Biliousness, headaches, indigestion, kidney disease and constipation are promptly and thoroughly cured by Dr. Chase's Kidney-Liver Pills, and the whole system is cleansed of the foul impurities which result in disease and suffering.

Mr. John Guheen, who is in the fish business in Port Hope, Ont., states: "In my business I do a great deal of driving over bad roads, and the constant jar of the rig, along with exposure to all sorts of weather, brought on kidney disease. I was in miserable health, and suffered a great deal with sharp pains in my back. I heard of Dr. Chase's Kidney-Liver Pills, and decided to try them. Before I had used all of the first box I felt better, and three boxes have entirely cured me. I am very glad of an opportunity to recommend Dr. Chase's Kidney-Liver Pills, for I have proven their wonderful control over kidney disease."

Dr. Chase's Kidney-Liver Pills succeed where ordinary kidney medicines fail, because of their direct and combined action on the liver and kidneys. This has been proven in thousands of cases of serious and complicated diseases of the kidneys.

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, at all dealers or Edmanson, Bates & Co., Toronto.

## Just the Thing for Sore Teats & Caked Udders

Softens the glands, relieves congestion, cools inflamed tissues, breaks up the bunches and makes the milk flow easier and natural. Heals, but does not chill. A remedy that every dairyman who gives it a trial will appreciate. If your dealer cannot supply you we send it direct. Write, Dairy Association Co., Mrs., Lyndonville, Vt. U. S. A.

### GOSSIP.

Mr. J. W. Innes and Mr. Schaefer, of the firm of Innes, Schaefer & McClary, leave on the S.S. Salacia for Scotland, where they intend purchasing Clydesdale fillies and stallions, which will be sold at their own stables by auction, notice of which will, in due time, be given in these columns.

Mr. D. M. Watt, St. Louis Station, Quebec, writes: "The past year has been a very successful one in our business. There has been 17 head of Ayrshires sold from this herd since September 1st, most of them going to the townships, a few to Western Ontario. The summer was very hot and dry, the pastures suffering; but with mill feed the herd was brought through in high condition. A number have just freshened in and are doing nicely. The demand is steady for good quality. I am sold out of bulls; have booked a few orders for spring stock. Parties wanting to secure sum nice heifers would do well to send orders at once."

Mr. Wm. Thorn, Lynedoch, Ont., writes: "The imported bull, Holchouse Pilot, now at head of my Ayrshire herd is bred from heavy-milking stock, and started out with a good show record in Canada, winning second at Toronto and first at London in a class of seven. My cows are doing good work at the pail, and I have some very promising young ones coming on, among which I might mention, my show cow, Lottie, with milk record of 644 lbs. per day, and Lesnessock Grace Darling (imp.), sired by Lesnessock Flashlight, bred from some of the best stock in Scotland. The young bull I am offering for sale is of good dairy quality, and sure stock-getter, sired by Sensation of Glenora, dam Bell of Neidpath, from heavy-milking stock, and fit to head any herd. The geese I am offering are mostly yearlings, and are very large birds of choice quality. The ducks are also good. My Ayrshires, at four shows last fall, won 34 firsts, 26 seconds, 13 third prizes, two diplomas and a silver medal for three best dairy cows any breed."

Messrs. John Dryden & Son, Brooklyn, Ont., write: "During the past season we have had a good trade with all of Canada and some parts of the United States. 'The Farmer's Advocate' found most of our best customers, and through this medium and the animals that have left the farm we have added many warm friends. Our trade in Shorthorns and Shropshires, by correspondence, is increasing each year, and during the past season we have had satisfactory reports from every individual sold this way. Our statement in our advertisement, on another page, that we now offer the best lot of young bulls ever produced on the farm, we think is correct. They are most uniform, and not a bad one among them. They have size, constitution and natural feeding qualities, combined with type and breed character. We do not pamper our bulls, or keep them in high flesh. Our object is to keep them healthy and in the best condition to give a good account of themselves after they leave our hands. The most satisfactory method of sale for us is to have the purchaser at the farm to make his own selections. This way relieves us of the responsibility of supplying satisfactory animals. But we know that it is often inconvenient for purchasers to visit the herd, and under such circumstances we undertake to describe fully any animal that should fill our customers' requirements. We have a printed bull catalogue, and shall be glad to supply them to any interested parties. Prince Gloster is yet at the head of the herd, and at seven years old maintains his youth and vigor in a wonderful manner. He is very active, and now that we have tried and tested him in every way we do not hesitate in saying that he is the best all-round sire that ever stood on our farm. To aid him, we have been using the young Scotch bull, Scottish Prince, bred by Marr. He is a half-brother (sired by the same bull) to the winning animals shown by the King at the last Royal Show in England. Scottish Minstrel, purchased at the late Duthie-Marr sale, came home from quarantine last week, arriving in fine condition, and we are more than pleased with his development since the sale."

### QUESTIONS AND ANSWERS. Miscellaneous.

#### CANADIAN WILD RYE GRASS.

Am sending a new weed found growing by the roadside. Please identify.

S. K. McT.

Ans.—Canadian wild rye grass, an innocent plant, characterized by the two-pronged plumes in which the grain is enclosed.

#### WET CELLAR WALL.

I built a basement or cement cellar under my house. Three-inch tile were put all around the wall, just inside of wall; but water comes through the cement wall. Is it the fault of the drain, or of the wall, or cement work not being properly done? The tile have a good outlet. Would it have been better to put tile on outside of the wall? The water comes through the side walls, not floor, which is of cement.

E. C.

Ans.—Our experience is that the tile should have been around the outside of the wall, and run into a tile drain with a good fall running away from the site of the house. As the wall gets older, it will not be so porous. It should have a light coat of cement plaster.

#### LEAKING CEMENT TANK.

I have recently built a concrete water tank in a corner of my basement, but which fails to hold water. The walls are 18 inches thick, plastered and white-washed with cement. No holes nor cracks are visible, but the water seems to escape by absorption through the walls. Could you suggest a remedy, something to form a filling of the pores? How would a coat of paint do?

READER.

Ans.—In similar cases, as the cement has hardened with time, the seepage has ceased. Can any reader suggest any other remedy?

### Veterinary.

#### UMBILICAL HERNIA.

Three-year-old filly has a rupture the size of the end of a man's thumb, about ten inches in front of the mammae.

1. How should it be treated?
2. Would it hurt her to do a little light driving?

C. C. K.

Ans.—1. This is umbilical hernia. When so small as this, even in a three-year-old, a truss will sometimes effect a cure. A truss should be made by a harness-maker, and consists of two pieces of leather about four inches wide lined with felt, and with a buckle on each corner. On the center of one piece, a second piece of soft leather—round, about 4 inches in diameter—should be sewn and stuffed with horse hair to make a protuberance, which should be placed to press upon the hernia, and keep it pressed back into the abdomen; the second piece of leather placed over the colt's back, and the two fastened together by straps between the buckles mentioned. On the center of each strap should be a buckle attached to a split strap, which is placed around the colt's neck like a collar, to keep truss from working backwards. The truss must be properly adjusted, and kept on for about three weeks. A truss may be arranged with canvas to take the place of the more expensive one. If this fails to effect a cure, an operation by a veterinarian is the only alternative.

2. It will not hurt her to drive. It is quite possible it might never hurt her, but there is a danger of it enlarging under severe muscular strain at any time.

V.

Messrs. A. Duncan & Sons, Carluke, Ont., breeders of Shorthorn cattle, write: "Thanks to 'The Farmer's Advocate,' we have recently sold to Mr. A. D. Schmidt, of Elmira, our stock bull, Greengill Archer (imp.), which has proved a grand stock bull; but owing to his heifers being of breeding age, we had to part with him. Also sold to Jas. A. Lennox, of Thornton, a young bull, from a Rean Duchess cow, and sired by Greengill Archer (imp.). We have no more bulls of breeding age left, but have a few of last fall's calves coming on, and any person looking for show calves of either sex can find a few high-class ones; all sired by our former stock bull, Greengill Archer (imp.)."

## EARLY LAMBS

Early lambs will bring big money if you save them, and get them to market at the right time. Give them a little of Dr. Hess Stock Food in the grain they eat—then, if you keep them warm and dry, there will be no losses, and they will be "fit" at the very moment when prices are best.

## DR. HESS STOCK FOOD

The prescription of Dr. Hess (M. D., D. V. S.) contains bitter tonics for the digestion, iron for the blood, nitrates to expel poisonous material from the system and laxatives to regulate the bowels. These ingredients are recommended by Professors Winslow, Quinlan, Finlay Dun, and the most noted medical writers in the country. It is not a food in itself, but makes all the food of the farm produce more milk, more meat and more work by increasing digestion and regulating the system generally.

Sold on a Written Guarantee.  
100 lbs. \$7.00 25 lb. pail \$2.00

Smaller quantities at a slight advance. Duty paid.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

If your dealer cannot supply you, we will. DR. HESS & CLARK, Ashland, Ohio, U. S. A. Also Manufacturers of Dr. Hess Feeding Pan-a-cos and Instant Loose Kibble.

## Study at Home

We teach you by mail, in your spare time. If you can read and write, we can help you.

Courses in Bookkeeping, Shorthand, Penmanship, Arithmetic, Complete Commercial, Commercial Law, Agriculture, Stock Raising, Poultry Raising, Electrical Engineering, Steam Engineering, Mechanical Drawing, Civil Service, Public School Course, High School Course, High School Entrance, Matriculation, Teachers' Certificates (any Province), Special English, Spelling, Composition. Instruction in any single subject, or more as desired. State what you want. Draw a line through course wanted, clip out the advertisement and send, with name and address, for prospectus and full information.

THE HOME CORRESPONDENCE SCHOOL OF CANADA, LIMITED

Toronto, Canada.

In consolidation with the Canadian Correspondence College, Limited.
