Pay Off Your Mortgage. Why Not?

Continued from Page 8

Important Features to Borrowers

Here are a number of the principal features of importance to prospective borrowers of funds from this association:

1.—Loans may be made to persons residing or intending to reside on land within the province.

2.—The amount that may be loaned is fifty per cent. of the appraised value of the land offered as security.

3.—The security required is a first mortgage; all encumbrances must be paid off out of amount loaned and leave title clear.

4.—The mortgage extends over a period of thirty years, but may be retired at the end of the fifth year, or at any time thereafter by payment of the balance of principal still outstanding. No notice of repayment is necessary and no bonus is demanded.

5.—Repayment of loans is made by equal annual payments composed of principal and interest on an amortization plan so that every payment is equal in each and every year and retires the debt at the end of thirtieth year.

6.—The rate of interest charged including cost of administration is six per cent. per annum on the amount of unpaid principal.

7.—No loan may be made to any borrower for a greater amount than ten thousand dollars.

8.—The loan must be made to make improvements, to increase productivity, or to pay off prior encumbrances on the land.

9.—Every borrower must subscribe for shares in the capital stock of the association to the amount of five per cent. of the amount of the loan and such shares must not be transferred or hypothecated.

10.—No person, other than a borrower with the exception of the province of Manitoba may own shares in the association.

11.—In the event of the sale of land that is mortgaged shares must be transferred with the mortgage to purchaser, or if mortgage is retired must be surrendered and will be accepted at par by the association.

The first year the inspection charges on land are free. The association has three inspectors out now and the commissioner and chairman of the association, Lachlan McNeil, does a lot of inspecting. Mr. McNeil has had a most extensive experience in every province of western Canada for various companies in this work. The association also has competent men in different localities on whom it can call to make inspections. The association board is composed of six men: Mr. McNeil; F. P. Hamilton and George Anderson, Winnipeg, both well known and able real estate men; D. D. McDonald, merchant of Dauphin; J. S. Wood, Oakville, vice-president of the Manitoba Grain Growers' Association, and Arthur R. Tomlinson, secretary.

Some individuals have criticized the stock feature of the association, but not one farmer who has yet applied for a loan has made the slightest objection to it. Borrowing through the association does not impair further security but it puts the farmer on a sounder basis and starts him toward better farming. He can handle more money and make more money. He can borrow now in proportion to the security he can offer.

Where Does The Money Come From?

Where does the money come from? It comes from the issue of government bonds, and already a large sum has been arranged for at a sufficiently low rate of interest to guarantee the six per cent. rate.

Under the Farm Loans Act the association is permitted to issue deposit or savings certificates bearing interest at four per cent. Anyone can go into the association office or send in and purchase these certificates at any time and receive interest from the day he buys them until he turns them over to someone else. He may deposit them at their face value in a bank and the bank receives four per cent. for them until they are turned over to another, or
