ORCUTT AND LEE BANNED

O.B.A.A. Rules That Former Pro's. Cannot Play in City League

Hamilton, May 31.—The Executive meeting of the O.B.A.A. held here last night was not the stormy session that was predicted, and Bradley, Orcutt and Lee, the Brantford players have been disqualified from future participation in Brantford City League games.

Brantford was represented by Ald. J. J. Kelly, W. Scruton and Sam Lee, and the message they will take home is that the governing body of amateur baseball adheres to its regulation forbidding players to take part in games against professionals or semi-professionals, and that the permission granted the players in the present mix-up to take part in games pending an investigation has now been cancelled.

It was decided also that the games played in the Brantford City League should stand, as that organization made use of the players in good faith. Bradley, if transpires, did not take part in any of them.

TRANSPLANTING.

This is a good time for transplanting and much care has to be exercised in bringing the tender growths out into the open air. Cabbage, cauliflower, Brussels sprouts, celery and tomatoes should be purchased, rather than grown from the start in the amateur's garden. When buying plants, care must be taken to see that there is plenty of soil in the box and that there is a large root system.

Work swiftly in the garden, making the holes with the hoe or with a round stick. When the plants have been placed in the hollows press the soil just enough to give the roots thorough contact with the earth, allowing no air spaces to remain under the surface. A cloudy day or just before twilight is the best time for transplanting.

If the gardener has started his own plants indoors in seed boxes or pots they should be "hardened off" before being set out in the garden. That is to say, they should be placed at open windows and given less and less water until they are finally taken out. The boxes must not be allowed to become so dry that the plants wilt, however. After a few days the plants can be left outdoors uncovered all day and even on mild nights. Then they are ready for transplanting. The hardening process requires about two weeks.

the present mix-up to take part in games pending an investigation has now been cancelled.

ONE OF NATURE'S COMMON TRICKS

Acts just like a wireless message and "ouch" is the answer

Press an electric button and you form a contact with a live wire which rings the bell. When your shoes press against your corn it pushes its sharp roots down upon a sensitive nerve and "ouch" you get a shock of pain.

Instead of trimming your corns which merely makes them grow, just step into any drug store and ask for a quarter of an ounce of freezeone. This will cost you very little but is sufficient to remove every hard or soft corn or callus from one's feet. A few drops applied directly upon a tender, aching corn stops the soreness instantly, and soon the corn shrivels up and falls right out, red and all, without pain. This drug never inflames or even irritates the surrounding skin.
