CABINET CONSIDERS AIR CONTROL QUARREL

Curzon Submits Documents Presented By Three Allied Ambassadors.

Associated Press Despatch.
London, Aug. 1.—The cabinet at its meeting today was largely engaged with a quarrel between the admiralty and the air ministry concerning control of the air forces; hence, although Lord Curzon, secretary of foreign affairs, communicated the documents and statement presented by the French, Belgian and Italian ambassadors, discussion of these was adjourned for another council tomorrow.

It is understood that Lord Curzon also submitted to his colleagues information submitted to him yesterday by Dr. St. Hamer, the German ambassador, on internal, economic and political conditions in Germany, which, in the view of the British government, have a most important bearing on the question of how great a period it would be safe to prolong the present negotiations.

BANDITS SENTENCED FOR MANY ROBBERIES

Montreal Judge Refrains From Imposing Lash On Request of Relatives.

Canadian Press Despatch.
Montreal, Aug. 1.—Sentences of seven, five and two years in the penitentiary were the sequel to the reign of terror which six young men, all around 20 years of age, caused on the highways around Montreal in June and early July of this year.

Highway robberies with violence had been committed by the men at L'Assomption, Lanoraie, Carterville, River des Prairies, and Montreal North, and Judge Amedee Monette made a scathing review of their crimes before imposing sentence. He said it was only at the request of their relatives that he had refrained from imposing the lash as part of the sentences.

The men who drew the sentences and their terms are: Louis Philippe Longpre, seven years; James Villeneuve, seven years; Louis Dagenais, five years; Victor Groulx, five years; Jos. Deschamps, two years. A sixth man, Giroux, was remanded for sentence to September 11. All the accused pleaded guilty.

DECLARES BRITAIN ISOLATING FRANCE

Deputy Charges Agreement Being Drawn Up With Spain.

CUT COMMUNICATION
By PAUL SCOTT MOWBRER.
Special Cable to The London Advertiser and Chicago Daily News Copyright.
Paris, Aug. 1.—Great Britain reaching a reported agreement with Spain against France in the Tangiers question, is continuing her policy of isolation of France, is the charge of the French deputy Andre Fribourg, member of the Superior Colonial Council and of the foreign affairs committee, in a sensational leading article published in Le Matin today.

He writes: "Great Britain's gigantic operation looking toward the isolation of France, continues, Spain, against her own interest, benevolently has lent herself to this operation. But what is even graver this time is the fact that our adversaries are trying not only to isolate us, but intend to cut our communications at the Balearic and Chafarinas islands, and Gibraltar, and they hope later at Tangiers, too. They hold routes which unite European France to Africa."

Deputy Fribourg adds that Spain has a strong interest in reaching an understanding with France, because French army then could assist the Spanish troops in pacifying the unsubdued and defiant Spanish zone in Morocco.

DENIES AGREEMENT.
Associated Press Despatch.
London, Eng., July 31.—Authoritative denial is given here to reports circulated in the continental press that the Anglo-Spanish agreement has been concluded concerning the future of Tangiers.

ADOPT NEW SYSTEM FOR TAKING CRIMINALS

Scotland Yard Assumes Direct Connection With U. S. Justice Department.

By HAL O'FLAHERTY.
Special Cable to The London Advertiser and Chicago Daily News Copyright.
London, Eng., Aug. 1.—Following a series of conferences with Scotland Yard officials, Rush H. Holland, assistant attorney-general of the United States, has arranged a new efficient system of criminal intelligence, which, when perfected, will make the apprehension of criminals traveling in either direction between British and American ports far more certain than ever before.

Hitherto practically all communications regarding the movements of criminals and international crooks went through diplomatic channels. If Scotland Yard wanted to inform the department of justice that a certain character was en route to New York, word was first sent through the American embassy in London, then forwarded to the state department in Washington and subsequently to the department of justice.

Occasionally the message was received hours too late for them to take any action. The new system of direct communication between the world's two greatest criminal detection bureaus will have been established.

Three Suspects, One Injured, Satisfy Police of Innocence.

PRECAUTIONS TAKEN

Canadian Press Despatch.
Toronto, Aug. 1.—Three men were arrested on suspicion today and released in a few hours after being questioned, but outside of the day brought no developments in the search for the robbers who a week ago shot down Toronto bank messengers and escaped with at least \$38,000 in currency. Citizens are giving the police every possible assistance in the search, and the movements of strangers north of the city in the vicinity of the barn where the robbers' car was found Sunday are being watched and being reported.

They gave their names as Joe Mulcahey, Norman Coulter and H. Griffiths, and were soon able to satisfy the police that they were not concerned in the robbery.

Messenger Duck, one of the wounded bank men, was shown a number of criminals' photographs today, but he failed to identify any of them as of the robbery gang.

The banks now are taking added precautions against a repetition of the robbery. Two R.C.M.P. men, armed, supplement the force of uniformed local constables at the clearing house, and other officers are stationed near to be in readiness if called upon.

STATES BUYERS ALTERED SCALES

W. T. Rogers Testifies Before Royal Grain Inquiry Commission At Moose Jaw.

EXPLAINS METHOD

Canadian Press Despatch.
Moose Jaw, Aug. 1.—How, as a buyer, he shifted his scales to deceive farmers of from 30 to 40 lbs. on a load was told by W. T. Rogers, former grain buyer for the Searle Grain Company, at the Royal Grain Inquiry Commission inquiry here this afternoon.

Rogers' evidence together with strong criticism by Isaac Pitblado, K. C., Winnipeg, counsel for the terminal elevators, of statements made without substantiation by William Rose, counsel for the Order of Grain Buyers, alleging that counsel tampered with witnesses, and an apology by Mr. Rose, featured the afternoon session.

The evidence of Rogers was given in connection with charges of incitation to theft by Mr. Rose.

Examined by Mr. Rose, Rogers said that he was a buyer for the Searle Grain Company at Star City in 1920-21 when J. M. Stewart, a traveling superintendent of the company, visited him, and they used a file on the scale in such a way that when grain was weighed it was possible to take at least thirty pounds, and as much as 40 pounds, from the farmer selling grain. He filed the claim, Rogers said, the whole action of filing and rebalancing the scale to suit the adjustment, taking about 30 minutes.

He was asked by Mr. Stewart, a traveling superintendent of the company, if he knew it was a dishonest act. He was perfectly willing to do so as long as he was paid for it, he said. He was asked by Mr. Stewart if he was willing to get the extra grain. When the scales' inspector came he was to "fix up the scales again."

He was asked by Mr. Stewart how long the scales stayed "fixed" and he said, "One time, witness said after they were first tampered with they had stayed that way for about one week, while the farmers' complaints of some of the farmers he had 'got leery of losing some business,' and had replaced the scales on an honest basis."

The success of selling Alberta coal in Ontario depends upon what rate railway companies will fix for carrying the fuel, Premier Greenfield writes.

The recent experiment of shipping Alberta coal for demonstration purposes in Ontario was so successful that the Alberta government is hopeful that the railways will see their way clear to cut the present rate of \$9 per ton.

BRAZEN NEW YORK BANDITS HURL COBBLESTONE THROUGH JEWELER'S WINDOW.

Associated Press Despatch.
New York, July 31.—Four auto bandits this afternoon smashed the window in Rothenburg's jewelry store on Third avenue and fled with a tray of diamonds worth \$15,000.

The robbery was one of the most brazen on record. The quartet drove up in their car, halted in front of the store and stepped out, leaving the motor running. Then two flourishing revolvers, cleared the sidewalk of pedestrians while their companions, taking deliberate aim, hurled a cobblestone through the window.

After seizing the diamonds, the bandits jeeringly told the tray under the noses of the crowd which they were holding back with pistols. Then they entered their motor and sped away.

SAY STORES LOST NEARLY \$40,000

L. R. Steel Inspectors May Close Up After Unsuccessful Trial.

CUT DOWN EXPENSES
Canadian Press Despatch.
Toronto, Aug. 1.—L. R. Steel stores in Canada are stated to have shown a loss of nearly \$40,000 during the months of April, May and June, when they were on trial. Inspectors and creditors, who will meet in a few days, may consider a shut-down.

L. R. Steel enterprises, which have been directing the operation of the stores on the trial plan, declares that expenses were cut down to the minimum. It is claimed the greatest losses were incurred in the Montreal and Hamilton stores.

At different meetings of the shareholders various means of operation of the stores were considered, but proposed reorganization schemes are said to have fallen short of success. The L. R. Steel enterprises, which prior to the collapse rented suites of offices in the Royal Bank Building, are now represented in that building by only one office.

Were the Canadian end of the business closed out, the shareholders in Canada, who invested nine millions of dollars, would have to look to the proceedings in Buffalo to give them any return for their investment.

BOUNTIFUL YIELD ASSURED IN WEST

Losses From Storms Affect Individuals Rather Than Communities.

ALBERTA IS FAVORED

Canadian Press Despatch.
Winnipeg, July 31.—On the eve of the harvest early promise of bountiful yields of wheat and other grains is not in the least diminished, though a few localities have suffered from the vicissitudes of the weather, which have affected individuals rather than communities.

The crop report of the Canadian National Railways for the week ended July 28, states: "In a comparative small section of Southern Manitoba, prospect wheat yields are threatened with depreciation by rust, but conditions in this respect are not very serious. Elsewhere in the province the situation is generally favorable."

"Reports from all sections of north of the Assiniboine River, west of the Souris, forecast a good harvest, while the greater part of the southern section of Manitoba will contribute largely to the total production in the province. Some wheat cutting is now being done, and the harvest will be general by the 15th if the weather becomes more propitious."

"Reports from Saskatchewan are very optimistic. While there have been heavy local rainstorms, sometimes accompanied by hail, no widespread damage has been done. In some places grain has lodged as a result of winds and rains, but it is expected that this will recover."

"Perhaps the three provinces Alberta gives greatest promise for a uniformly heavy yield of wheat and oats. There is a heavy stand of straw, harvesting has been touched by hail, according to reports received from practically all Canadian National points in the province. The harvest will be general about August 20."

WHEAT SIX FEET HIGH.

Canadian Press Despatch.
Edmonton, July 31.—Wheat is standing six feet high in some Edmonton districts, while oats are growing rapidly and show prospects for heavy yields. Despite hailstorms, conditions on the whole are bright, and by August 10 the binders will be out in some sections.

Harvesting in wheat will likely be general between August 15 and 20, says the sixth semi-monthly crop report issued by the provincial department of agriculture.

RAIN BENEFICIAL.

Canadian Press Despatch.
Lethbridge, July 31.—July crop weather is winding up with a general rain all over Southern Alberta, which following ten days of the hottest period of the year, is very acceptable to the 13th weekly crop report of the Lethbridge Herald, issued today. The total July rainfall is 2.29 inches, as against an average of 4.92.

Hail and hot weather during July have served to cut the grain yield in many sections of Southern Alberta. During the past week many sections have been touched by hail, the worst being west of Staveland district. Early in July an estimate of 30 bushels to the acre for the Southern Alberta wheat crop was made by the Herald. This, in view of the adverse conditions, will now be cut to about 26 bushels, though there still is a good prospect where there has been no falling off in conditions, and a bumper crop with plenty of 30-bushel yields, will result.
