doctor told me I could not be cured.

For the past five years the N. S. Department of Agriculture has been nave saved clover for seed purposes. Farmers' Associations and Agricultural Societies have been advised that this policy is to be continued this year, and it appears from applications received that the huller will have a busy season. Groups of farmers from Inverness to Yarmouth have already written to the College inquiring about arrangements to be made.

25% higher than last year.

well; advised in forestalling the situation and providing the farmers with the opportunity to use the clover huller. In addition to operating one huller themselves the Dept. gives a bonus to any group of farmers who will purchase a huler for the district in which they 1 ve. One which was purchased in Kings County will be largely used this year. Another group in the neighborhood of River John, Pictou Co., is buying one this year and there is a substantial quantity of clover seed to hull there. Those not familiar with the hulling process should write to the College for information.

A Warning To Clover Seed Growers

The Dept. of Agriculture was

The college authorities have received an unusually large amount of correspondence from farmers who plan to save second growth clover for seed this Fall. The point we wish to emphasize now is that farmers should not be in too great hurry to cut the clover. Un-Mr. and Mrs. Ervin Dondale, who fortunately through cool and spent a few days at Bear River with humid weather conditions, the perhis brother, William Dondale centage of ripened seed will probably not be as large as in normal seasons. That which is being produced also is slower in maturing. It is better not to cut Mrs. Amy Hutchinson recently at all for seed than to cut when worms should be almost black when Dr. Armstrong has visited our cut, and there should be not diffischool and vaccinated several of the culty in telling the proper stage if a few heads are rubbed out in the Mrs. James White and two hands and some mature seed is seen to be present. There are cases on record of famers delaying the cutting until the snow flies and ing the summer at her brother's even at that date getting good F. W. Ward's, has returned to her results when the seed was threshed. Don't be in a hurry to cut your

Club Root in Turnips

Reports from various sections of

Nova Scotia indicate that Club Root in turnips has become very

serious, and the growing of this

valuable vegetable will have to be

given up unless some remedy can

be found. Splendid results have

been obtained on the College Farm

at Truro from the use of ground

limestone. Turnips had been

grown continuously for many years

on the same field and club root had

become very prevalent. Two years

ago, in the Spring of 1917, ground

the acre were applied, with the
