## NEW TEXT-BOOKS FOR PRIMARY SCHOOLS.

---

### MURRAY'S ELEMENTARY SERIES.

*In the Press and in Preparation.*

---

THE Reports of the Royal Commissioners and Inspectors of Schools express a very general and reasonable dissatisfaction with the text-books at present in use. The result is a daily increasing want of suitable manuals, and nowhere is this greater than at the very outset of all teaching.

The object of the present Series is therefore twofold : to supply a graduated course of *English Instruction*, from the very alphabet up to the writings of our classical authors, of such a nature as to comply with the requirements of the New Code, also to provide a set of suitable manuals for those schools which do not come under any government supervision, and for private use.
