It s known to the American Government how Germany's adversaries, by completely paralysing peaceable traffic between Germany and neutral countries, have aimed from the very beginning and with increasing lack of consideration at the destruction, not so much of the armed forces as the life of the German nation, repudiating in doing so all the rules of internaional law and disregarding all rights

Britain to Blame for Lusitania.
The case of the Lusitania shows
the horrible clearness to what jeopardizing of human lives the man-ner of conducting war employed by our adversaries leads. In the most direct contradiction of international law all distinctions between merchantmen and war vessels have been obliterated by the order to British merchantmen to arm themselves and to ram submarines, and the promise of rewards therefor, and neutrals who use merchantmen as travelers thereby have been exposed in an increasing degree to all the dangers of war.

Story of Munitions Again.

"If the commander of the German submarine which destroyed the Lusitania had caused the crew and passengers to take to the boats before firing a torpedo this would have meant the sure destruction of his own vessel. After the experiences in sinking much smaller and less seaworthy vessels it was to be expected that a mighty ship like; the Lusitania would remain above water long enough, even after the torpedoing, to permit passengers to enter the ship's boats.
