

ACIES TRIPLEX

EACH COHORT IN LINE OF BATTLE

COHORS PRIMA

¹ Ce. urio prior cohortis primae, vel primipilus.

² Centurio posterior.

The senior centurion of the legion was the primipilus. The junior centurion was the *posterior* of Manipulus III of Cohort X.

Strength of the cohort: 36 front (12 files to each manipule), each file ten men deep = 360. The cohort was in size like a small battalion, the legion like a division or brigade. The legion, however, was the smallest unit of tactical command.
