

Mining Stocks Show Slightly Improved Undertone

Beaver Leads the Cobalt Issues Gold Stocks Move Up and Down

Early Exhibition of Strength in Porcupine Shares Does Not Hold—
Net Changes for Day Are Small.

World Office.
Monday Evening, April 10.
Porcupine stocks made further advances in the early dealings in the mining markets to-day, but the selling movement was resumed on the afternoon board, with the result that values were forced back to their former levels and in some cases dropped lower than the ruling quotations at the opening of business.

It is not to be expected that the gold mining stocks will recover in one or two days from the heavy depression of last week. Whatever improvement is realized will probably be gradual, and the list is more likely to move up and down in an erratic manner for the time being than to take on any pronounced tendency.

Today's market was fully in accord with this idea, and the reaction late in the day was only a natural one, and such as will suffice to keep the situation in a healthy condition.

Hollinger made an advance to \$3.03, or 8 points in advance of the price on Saturday, but was back to its former levels before the close. Preston East Dome sold as high as 40 during the morning, but lost two points of the advance when selling orders invaded the exchange. The other gold issues showed no material net change.

Poley-O'Brien has not met with any flattering recognition since its entry to the market, and to-day the shares were under renewed pressure, selling here as low as \$2.15. In New York a bear raid was evidently in progress, for at the close the stock was offering at \$1.78, with bids \$1.75.

Beaver was the feature of the Cobalts, these shares being heavily traded and advancing two points to 42, closing almost at the high figure. The buying is founded on the assumption that with a 2-1-2 cents dividend to come off, the shares look attractive at present levels.

Timiskaming dropped three points from its early price of 70, on the news that the miners on the property had gone on strike. Prices elsewhere in the list were comparatively unchanged.

Porcupine Gold Trust Doing Active Work

Twenty Men Put to Work on Shillington-Richmond Claims—Many Leads in Prospect.

PORCUPINE CITY, April 7.—(From Our Man Up North).—Twenty workmen are employed on the Shillington-Richmond claims which taken over by the Porcupine Gold Trust and yesterday camp buildings were finished. The accommodations are ample for a crew of 40 men. Engineer James Miller is now planning to increase the force and push surface work.

The new holdings of the trust lie to the north of the Armstrong-McGibbon Pearl Lake claims and along the west boundary of the Rea Mines, Limited. Most of the big leads, it is said, now hidden with the trust, that cross the Rea and the Armstrong-McGibbon upon these two claims.
