IF THAT GIFT TO THE FAMILY

Is To Be a Phonograph

Then the Merits of the "Symphony" and the Reason of Its Moderate Price, \$55.00, May Interest You.

Its price is brought about through the fact that the "Symphony" is made and the parts are assembled in the EATON factory. Consequently the middleman's profit does not figure in the cost of the "Symphony."

It is equipped with one of the best motors obtainable, for good phonograph music depends upon a perfect motor, which must meet not only the demands of the laws of mechanics, but also the rigid laws of music.

Must be precise and delicate in its operation, and yet able to endure the handling of the most inexpert.

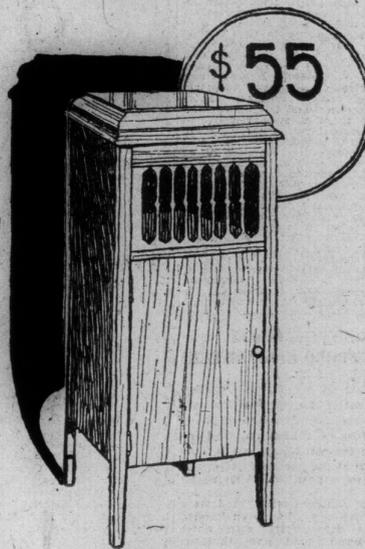

Must turn the turn-table with perfect rhythm, without the slightest shade of hesitation or the music would be thrown entirely off key

You'll find it silent in operation, steady in regulation and sturdy in construction. Next, the "Symphony" has a sound regulator, shelves in the cabinet for records or album.

And one of the largest sound boxes and tone arms procurable.

The "Symphony" plays all makes of disc records. Extra sapphire points for this purpose may be procured.

Furthermore, the "Symphony" has a mahogany cabinet in square design, that is good looking and should prove quite an appropriate addition to the most select collection of furniture.

Remember, in the "Symphony" you get exceptional value. Splendid tone and satisfaction. And a machine that is quite striking and appealing.

Ask about it in the Phonograph Section, Fifth Floor. Those in attendance will gladly demonstrate its many qualities to you.
