Electric Power Better

For the Small Users Than is Producer Gas

Exhaustive Report on a Vital But Technical Subject is Made by Hydro Power Commission.

BUT GAS IN THE FUTURE WILL COMPETE WITH STEAM

Yesterday the report of the hydroof power production thru the agency of producer gas plants and other prime movers under the conditions obtaining in the Province of Ontario was presented to the legislature.

The report as a whole is exceedingly echnical and will appeal to practical to a discussion which is occupying a large amount of attention among manufacturers and users of power in every line. Very extensive tables are appended, including almost every conceivable detail, and statistics relating to 28 producer gas plants visited by the commission's engineers.

The small consumer is specially kept large ramount of power than any other lass, and because every large power proposition has a condition of its own It is obvious from the technical nature of the report that those who are

interested must obtain a copy and study out their own problems. Estimates are given showing the cost of installing and working suction producer gas plants. Part III. is taken up with a discussion of steam plants, part IV. with oil gas, and gaso-line engines and the final section contains a discussion on fuel and other conditions in Ontario which are summed up as to their main results as

Electricity Best. 1. Users of small amounts of power will be best served by electric power where it can be obtained at a price per E.H.P. not exceeding by more than 15 per cent. to 25 per cent. the cost per B.H.P. of power developed by gas, gasoline or oil engines. If electric power is not obtainable their

justified in paying for electric power 30 per cent. more than the cost per 30 per cent. more than the cost per 10 per 10

satisfactory service.

3. Power users who require steam for heating purposes will only be justified in paying for electric power. per E.H.P. a price equivalent to 80 per cent. to 85 per cent. of the cost of steam power per B.H.P., as shown in these estimates. If it cannot be

obtained for this they will be best served by a steam engine.

4. Where the cost of producer gas power per B.H.P. does not work out 15 per cent. below the cost of hydro-electric power per E.H.P., it will be advisable to use hydro-electric power. Producer gas plants at present are only advisable for those power users having a fairly steady load and who require fairly large quantitles of power, or who use gas for other purposes, such as annealing, brazing, or who may anticipate trouble from smoke nuisance bylaws. In the future the increasing price of coal in Ontario will probably (allow producer gas plants to successfully compete with steam plants, even in those cases where the exhaust steam could have been used for heating and manufacturing purposes. This increase in the price of coal will also, however, extend the areas over which hydro-elec-tric power can be profitably distributed, and the producer gas plant will probably only occupy an intermediary position in the displacement of steam by hydro-electric power.

Natural Gas Supply. 5. Natural gas in some parts of the province, may, for a time, enable power to be produced cheaper than from any other source. The lack of permanence of the natural gas supply will not, however, justify a power use rin sinking any considerable capital in a power plant to use natural gas unless when the supply is ex-hausted he can continue to produce power with producer gas cheaper than

by any other means. 6. The value of the water powers of the province to the province as a whole depends on their conservation and development along lines which will require the selling price of hydroelectric power to be based on the cost of its development and transmission, and not on the cost of generating power by some other agency to compete with it.

Cost of Gas Plants. In the general discussion of the uestion it is stated that in Ontario the field for producer gas plants for power production purposes will be found largely in those industries which not use steam for heating or inthese somewhat narrow limits natural gas and hydro-electric power are likely to be its only serious competiliability of operation, and simplicity of working obtainable from natural gas or hydro-electric normal relations. gas or hydro-electric power will allow these to enter into effective competition with producer plants, even when thecost of pewer so obtained is in ex-

means of producer gas. In Ontarlo it is considered that the suction type of plant using anthracite coal will be in demand. They are less complicated than the pressure and more supervision and are less reliable.

Tune Up for Spring.

man, where the accused had been Judge Perdue sentenced him to four months hard labor and ten lashes.

BECK AND SMITH

Cabinet Ministers Give Member From Soo Proper "Call" for His Injudicious Remarks.

severely called down in the legislature severely called down in the legislature yesterday afternoon. Premier Whitney described the coolness of the member for the Soo as refreshing. He had attacked Hon. Mr. Beck at forty miles distance, according to habit, in a way utterly unjustifiable and beyond the truth, according to habit, again remarked the premier, and then having heard the denials of Hon. Adam Beck and Hon. Nelson Montetth he endeavored to pursue the matter still further. There was a proper place for the matter to be taken up, but it was not at that time.

Mr. Smith intimated that had he

that time.

Mr. Smith intimated that had he understood the position when in committee of supply as he did after what he had heard he would have asked his question differently.

"You can do it yet," intimated the premier tartly, and the incident closed. It all arose out of Mr. Smith's attack on Hon. Mr. Beck, at Hamilton on Thursday evening.

on Hon. Mr. Beck, at Hamilton on Thursday evening.

Before the orders were taken up Mr. Beck rose to a question of privilege, and to correct the assertions made, that notwithstanding \$70,000 had been spent on the "fairy scheme" of the hydro-electric power commission nothing had, or would ever, come of it. "Will the hon. gentleman say where he got the information?" asked Mr. Smith.

Got the Very Words. Hon. Mr. Beck: I got this informa-tion verbatim this time. I say verba-tim because a year ago the hon. member made some allegations in the rid-ing of West Middlesex about the provincial secretary, and in the house de-nied the truth of the report published

worth thousands of dollars to the citizens. The commission was patiently waiting on other municipalities, and had definite information from eleven of these. As soon as four others of the fifteen engaging in the scheme sent in their contracts there would be no longed that in the course of next week an announcement would be made of further steps.

Mr. Smith admitted that he had made a reference to Mr. Beck, quoting from page 201 of the Public Accounts. where the payment had been discussed some evenings before, and he had understood the minister of agriculture to say that Mr. Beck got the money

went on, referring to the power ques-tion and the house laughed, remembering a similar evasion a year ago. The substance of his statement, he said, was that up to date the commission had not delivered a single horsepower to still hope for acquittal. When I am Galt, Guelph, Woodstock or Owen free I will leave Toronto."

"Nor Winnipeg," interjected the pre-Hon. Mr. Monteith thought the horse items had been fully explained. No money had been paid for the expenses

of Mr. Beck's horses.

Mr. Smith wanted him to explain again, once more reading the item from the Public Accounts. Then the premier talked to Mr. Smith. A select party of Mr. Smith's con-

tions in the gymnasium at 10 o'clock last night, a young man dressed in a light overcoast and christy got in his light overcoast and christy got in his ally beaten about the head shortly fine new machine, which was standing in front of the building, turned on the throttle and dashed down the drive at furious speed. Mr. Russell came out in 10 minutes

and was informed that his man had taken the machine away. A few moments later the machine came tearing along Bloor-street, eastbound, traveling at a furious rate. Fred

that he had been severely shaken up.

Dismissing the deeds and misdeeds of the past withea word, Mr. Sifton peered into the future. Whatever he said may have been "off his own bat," or it may have been, as many believe, with the full knowledge of the prime minister, who still entertains high opinions of

who still entertains might opinions the Brandon member.

But whether the speech was intended to prepare the country for the announcement that Mr. Sifton is coming back into the government or retiring from public life, certain it is that it sounded like the utterance of a states-

Mr. Sifton's suggestions were:
Reform of the civil service by the appointment of an independent commission (as outlined in R. L. Borden's Halifax platform).
Establishment of a consular service for the purpose of developing our ex-

for the purpose of developing our expert trade.

Throwing open for homestead settlement 30,000,000 acres of unearned railroad lands in the Northwest, reserving one-tenth for ten or twelve years.

Construction of a railway to Hudson Bay, the cost to be returned to the treasury by the sale of a portion of the 100,000,000 acres of unsurveyed lands in the north that will be available for settlement when the railway is built.

Establishment of an "all-red" route from England to New Zealand. This would be possible by subsidizing the venture to the amount of a million pounds sterling a year, the proportions being: Great Britain, £500,000; Canada, £525,000; New Zealand, £100,000; Australia, £75,000. This is Mr. Sifton's petscheme. A twenty-four knot service on the Atlantic and an eighteen knot service on the Pacific will reduce the

following words: "I am not an advo-cate of the construction or operation of a railway by the government. I have no faith whatever in the idea that when a public utility is being properly car-ried on by a corporation there is any sense in the government taking it out of the hands of the individuals of cor-porations and driving them out of busi-ness on the plea that the government OTTAWA, March 20.—(Special.)—"I consider that the bond which bound me to the independent party is now dissolved and from now on I will support the Conservative party and the principles laid down by Mr. R. L. Borden."

In these words, Dr. A. T. Thompson, member of parilament for the Yukon, made a declaration of faith in the course of a brief address on the budget to-night.

Dr. Thompson was elected in 1904 as an independent, defeating the straight Liberal nominee, ex-Governor Congdon, of the Yukon.

H. Wess emiliated by Liberal and driving them out of business on the pica that the government can do the work better. Everybody knows it cannot. For my part I have not the slightest faith in the idea, and I would like that other gentlemen who likewise do not believe in it in the slightest degree would say they do not. Too many of us are inclined to hed ge on questions of this kind because we think public opinion is apt to be strong on a question in an improper direction if the men who take healthy views of it are afraid to say what they think. I am not in favor of the government acquiring public unit to the government and the principles laid down by Mr. R. L. Borden."

In these words, Dr. A. T. Thompson, member of parilament for the Yukon, made a declaration of faith in the course of a brief address on the budget to-night.

Dr. Thompson was elected in 1904 as an independent, defeating the straight the brief with the same will be a strong upon them. But, of course, public opinion is apt to be strong on a question in the slightest faith in the idea, and I would like that other gentlemen who likewise do not believe in it in the slightest faith in the idea, and I would like that other gentlemen who likewise do not believe in it in the slightest degree would say they do not. Too many of us are inclined to he dege on questions of this kind because we think public opinion and other who likewise do not believe in it in the slightest faith in the idea, and I would like that other gentlemen who likewise do not believe in it in

> Delved Too Far Back. Mr. Sifton congratulated Mr. Fielding on his presentation of the budget. On the other hand be thought Mr. Foster delved too far into the past. The country took no more than a languid interest in trade returns ante-dating interest in trade returns ante-dating 1896. What was important was the the method of raising revenue. The present tariff was based on the principle of moderate protection, and it was interesting to know how the opposition proposed to apply a remedy. At the present tariff had not been successfully assailed, that was pretty good proof that the system was a success. As investors had ceased to have confidence in speculative investments, Mr. Sifton in speculative investments, Mr. Sifton thought that the minister of finance would have no difficulty in disposing of government bonds.

Develop a Foreign Trade, Mr. Sifton suggested the organiza-tion of the department to deal with foreign trade. Mr. Foster had suggestbefore United States Secretary of State Root yesterday by Baron Takahira, the Japanese ambassador.

The invitation, which was couched Try, but he did not go far enough. Mr. Cowan of St. George-street was run down, and before the machine could be stopped by the reckless driver it jumped into the telegraph pole at the corner of St. George-street. The driver made his escape before the officer on the beat could get to him.

John C. Eaton came along in his car, picked up Mr. Cowan and conveyed him to Grace Hospital, where it was found his ankle was dislocated and the had been severely-shaken up.

The injured woman states that an elderly man named Haskin had been severely-shaken up.

The injured woman states that been knocked down in the rear of his been knocked down in t great importance, and he desired to secure the opinion of the house on the

question.

It was greatly to the credit of the leader of the opposition that he had placed in his platform a plank to bring about this reform, and he would be glad if Sir Wilfrid Laurier would join Mr. Borden in changing the system. Patronage was not to the advantage of
