There is little now for him to do. Munitions are in the hands of the imperial munitions board and that body is directly responsible to the imperial minister of munitions. Clothing and other supplies are handled by the war purchasing commission, recruiting is practically under the control of the mational service commission, the details of the militia department are looked after by F. Equilibrium in Artillery Restored, According to Enemy's

Berlin, Tuesday, Oct. 31 .- (Via London Nov. 1.)—The stiffening of the German defensive on the Somme, which is credited here with stopping the allied push on Bapagme and Peronne and limiting the advance of the French and British to insignificant gains, is due to the restoration of the equilibrium in the matter of artillery between the two armies.

Now that this has been achieved, it may be stated that Germany in August was confronted with difficulties in the supply of munitions and the replacement of worn-out or damaged guns, which, it is declared, was largely responsible for the successes then scored by the allies. For the second time during the war—the first being during the concluding phases of the 1914 campaign—the German experts found that their calculations were outrun by facts, and were faced by a consumption of guns and shells far beyond what was expected.

Output of Munitions.

The formation of a department of munitions, amounced yesterday, is an outward sign of their determination not again to be caught napping, but to increase the production of munitions to the utmost possibilities. German industry in this production has already passed the requirements of immediate consumption; but, as Field Marshal von Hindenburg, chief of staff, recently declared, it must not stop here, and a margin of safety must be established limited only by the possibilities of production, as is already the case in enemy countries. Nov. 1.)—The stiffening of the German

And speaking of nickel the British people are somewhat interested in the revelations now being made by an American writer, one D. Thomas Curtin of Boston, who is presenting a series of articles in The London Times as to the widespread and malign influence of Germany and Germans thruout the British Empire; and how that enterprises inimical to our empire seem to have more or less an Anglo-German backing, with powerful friends in London, Milan, Rome, Madrid, New York, Montreal, all thru South America—everywhere in fact except Austraerica—everywhere in fact except Austra-lie. When we read this statement of The Times as reproduced in The New York Sun we thought of Canadian nickel and we thought of Montreal and the activities of papers like The Montreal Gazette in aiding the International Nickel Co., and we thought there might be some innuendo in this statement of Mr. Curtin's that squinted at banking centres in Can-Times and Mr. Curtin are after the International Nickel Co. and after the great countries. Choice Set Aside.

All these moves have been the ideas to some extent of General Hughes himself, but the plans were not worked out according to his intention. For instance, before he left England a few weeks ago be had started to organize a Canadian militia overseas department, and had actually named the deputy minister. News of the apwas exposed and driven out. Some day soon, we hope, it will be unearthed and expelled from Canada; but it is still leeply entrenched, perhaps, as The Lonion Times says, in Montreal, But it all has to come out, and is coming out, and will come out very suddenly some of these

In the meantime, we observe The Globe is very quiet in regard to nickel, and so is Mr Rowell, and Sir Wilfrid Laurier has not said much, altho he is said to be thinking. Apparently, Canadian statesmen who are in the governments at Ottawa and Toronto are still convinced that about the finest institution we have in Canada today is International Nickel, which is now about to build a refinery for the treatment of Canadian nickel ore in our own country. They also want, of course, to send a lot of our ore into the United States to be treated there—whence they can send it, if they wish, over to Germany and to the allies of Germany They are willing to let us say that the portion needed for the empire and for Canada may be refined in Canada: perhaps this is something to be thankful for: but it does not seem to be good national show an over-zealous care that the lives missing follows: of our Canadian boys be not sacrificed to

## FOE ATTACKS RUSSIANS FIERCE FIGHT PROCEEDS

Slavs Repulse Teutons Everywhere, Except in Wood in Brzezany Region in Southeastern Galicia.

London, Nov. 1.—The Turks and Germans are violently attacking the south of Brzezany, southeastern Galicia, on a wide front, and at one place, the Michishou Wood, they pressed the Russian detachments holding this position, back to its southern portion. But this was not accomplished before the Russians had put up a stubborn resistance and had inflicted heavy casualties on the assailants. The fighting was preceded by a fierce bombardment by heavy artillery.

If the foe made some headway in the Michishou Wood, he encountered such a terrific resistance from the Russians in another sector, the regions of Lipsitadolna and Svistelniki, that all his attacks were failures. His losses in this region were enormous.
