

a move which would only be another temporary solution of the great problem, the need for an Art Museum in Toronto which would serve the needs of the Society and the School of Art. A note has been inserted in the catalogue of the exhibition stating that the subject of an Art Museum is under discussion and that it is the hope of the Society to be able to publish in the near future some of the results.

A new seal has been adopted, following a competition among our members which was judged by a committee composed of Mr. B. E. Walker (President of the Guild of Civic Art), Mr. Frank Darling, Architect, and Mr. A. H. Howard, R. C. A., Designer. The design by Gustav Hahn was chosen and the judgment was duly confirmed by the Society.

Another competition among our members for window cards advertising the 27th annual exhibition has been held, and the Guild of Civic Art was asked to appoint a committee to place the designs in their order of merit.

At the Industrial Exhibition the exhibit made under our auspices was exceptionally successful—371 pictures were hung, our own members' work having been supplemented by pictures loaned by the following citizens to whom the thanks of the Society are due : Messrs. J. Henderson, W. Christie, Jas. Blakey, A. Stone, J. J. Palmer, Elias Rogers, W. D. Anderson, James Wylie, W. C. Jephcott, E. B. Osler, R. Y. Ellis, O. A. Howland and Mrs. Livingston.

The exhibit made by our Society at the Industrial Fair is very properly considered of great importance in our capacity as the representative Art body of the Province, and realizing this and the possibility that new quarters would have to be provided for the Art Exhibit, the Society decided to place in the most convincing way possible before the proper authorities the need for a well equipped Art Building which would accommodate all the Art Exhibits which have heretofore been scattered, and a pamphlet was published which gave a history of the Art Exhibit and stating the difficulties encountered in making it at all creditable and also gave two designs, with estimates, suggesting the accommodation required. No result can be reported at the present time, but no effort will be spared to render the idea effective.
