Says Alcohol Baths Good For Influenza

But Dr. J. B. Guillen Strongly Condemns
Use of Liquor Internally

(Toronto Star)

According to a number of doctors throughout the city, alcohol, when applied externally, is an excellent agent for waging war on the "flu." At the same time these doctors emphatically condemn the use of liquor internally when patients have reached the critical stage.

"I have found liquor on the outside

a whole lot better than liquor on the inside," was the opinion of Dr. J. B. Guillen, expressed to the Star, concerning the report that a number of its victims are using alcohol for baths and rub-downs. "In fact," continued Dr. Guillen, "rather than give alcohol internally I have been using a modified form of iodine, known to the profession as Iodine, and have been following this up with local treatments of alcohol. I find that this does not make the strain on the heart in the same way that liquor taken as a beverage most assuredly does."

"After all is said and done, whiskeys and brandies are powerful stimulants, which are positively injurious when a patient has reached the pneumonic stage. When you've got the lungs gorged it is not a good time to stimulate a heart which is already working overtime to do its full duty. Nevertheless, I do strongly believe that alcohol applied on the outside of the body warms the system and brings about a healthy reaction that is helpful to the patient when he most needs help."

—BUY VICTORY BONDS—
LONDON WOMEN POLICE.

To recognize officially a force of women police for London is the latest decision of the Home Office. They will be under the control of Sir Nevill Macready, Commissioner of Metropolitan Police.

As yet the number, duties, and powers of the force have not been settled, and parliamentary powers may be needed. The nucleus will be found in the women patrols, who have done service during the last few months.

Women who join the force will undergo a period of very careful training, and will be subjected to much the same discipline as men police.

It is realized that the problem of the women and girls who frequent the principal thoroughfares can be dealt with effectively only by an official and permanent force of women police.

Do you Believe

in going straight to the weak spot in treating disease? If so, you will never use anything but Peps for coughs, colds, bronchitis, and throat and lung troubles. Listen why!

It is an acknowledged fact that only a remedy that is breathable can reach the lungs and breathing passages direct. Hence the superiority of the Peps treatment over the old-fashioned custom of dosing oneself with liquid medicines, which, as you know, can only go to the stomach.

Peps is a breathable medicine in tablet form. To take the treatment you simply dissolve Peps in your mouth and the medicinal fumes, which are then given off, bathe the throat and are carried by the breath to all parts of the nasal passages, breathing tubes and lungs. On their way they destroy all harmful germs and soothe and heal the inflamed membranes, thus removing at once the cause of the trouble.

It is surprising how Peps and coughs, colds, sore throat, bronchitis, asthma, "clergyman's throat" and laryngitis. Contain no harmful drugs and are, therefore, best for children.

FREE TRIAL Cut out this article across it the name and date of this paper, and mail it with a stamp to pay return postage to Peps Co., Toronto. A free trial packet will then be sent you. All drug stores and stores sell Peps, etc., etc.

RECEIVES PART OF THE SEAT OF AIRPLANE IN WHICH SON WAS KILLED.

Colonel Theodore Roosevelt received on last Monday part of the seat of the airplane in which his son, Quentin Roosevelt, was killed several months ago in an air fight. The presentation was made at the colonel's office, in New York, by Arthur E. Hungerford, a member of the Y. M. C. A. Overseas Force, who returned two weeks ago after eight months at the front.

The seat with other parts of the machine was found by the American forces on Lieutenant Roosevelt's grave in Charnery after the Germans had been driven back. Mr. Hungerford reached the grave two days after American troops

LAST NIGHT'S WAR SUMMARY

New York, Oct. 30.—The Associated Press tonight issued the following:

Over a front of some sixty miles from the Brenta River in Northern Italy to the vicinity of the Adriatic Sea the Austro-Hungarians are being violently attacked by Italian, British, French and American troops.

In the mountain region the enemy is resisting desperately and holding his ground fairly well, but east of the Piave River he is in flight across the plains of Treviso, shaping his course over the same territory through which he drove the Italians a year ago and reached the eastern edge of the plains of Venezia.

Already numerous towns have been liberated, 33,000 persons having been taken, and large numbers of guns and machine guns and huge quantities of stores have fallen into the hands of the Allied troops. Far behind the lines Allied aviators are heavily bombing enemy columns in dense masses which are in retreat over the badly congested roads leading eastward toward the Austrian frontier.

Judging the situation for the rapid advance the Allies are making it would appear that the entire enemy front has been broken east of the Piave and that with the cavalry operating far in advance of the foot troops the enemy forces will be unable to re-form their battle line until the Austrian border is reached. It is not unlikely that many of the Austro-Hungarians are doomed to capture or extermination by the Allies.
