BLASTING WITHOUT DRILLING. - Experi ments have been lately carried out by Major Lauer, of the Austrian Engineers, at Krems, on the Danube, to show the value of his new method of blasting rocks under water. The chief feature of Lauer's system is to employ a hollow cylinder, like a gas pipe, and to place the dynamite drawn by six iron-grey horses led thinto the rock to be blasted, but in the colored grooms. At the depot the casket cylinder in question. The cartridge only desired to shatter. The explosion of the dynamite is effected by means of electrici ty, and the effect is said to be greater

than with the usual cartridge in a hole bored in the rock. The rock is shattered into fragments so small that a fair stream points the same manifestions of respect is able to wash them away without help prevailed. On the afternoon of the 24th whereas in the case of gunpowder, the the train arrived at Cleveland, and the rock is only split up into blocks more or remains were conveyed to Monumental less large and troublesome to remove. The Lauer system is calculated to effect a saving of fully 40 per cent. as compared Park, every avenue of approach to which was covered by masses of people anxious
