The London money market, however, has to face some important Government financing during the coming week. Yesterday's 6½ per cent. call loan here is moderate, compared with the usual rate for that period, and disbursements coming back into the money markets are likely to relax the rate next week unless the gold exports shall affect the tone. Stock market demand for loan is insignificant. The mercantile agencies report that high	OF A WEEK IN REVIEW New York, N. Y., April 3.—The dull depression of the securities market	Geo. The advances in wages announced by the New York Central called fresh attention to the prevailing tendencies. Estimates of the quarterly earnings of the U. S. Steel Corporation were of a very favorable showing to be made by the forthcoming report. The bank statement was unexpectedly weak. The loss of upwards of \$10,000,000 in the actual cash holdings of the bank finds no explanation in the known movements of money and leaves the \$2,000,000 gold exported today still to be counted in next week's return. Without that allowance, the actual surplus of the clearing house bank stood at only \$5,345.700 on Friday night.	of special causes, but the most general factor in operation was the growing evidence of congestion of new capital issued, threatening the success of the financial plans of the railroads for the carrying forward of projects of improvement. The abrupt decline in the price of the new Atchison convertible bonds, when first offered in the market, to a price that almost wiped out the value of the subscription rights to stockholders was the salient feature in the bond market. Following the sag of the New York City four and a quarter per cents. to below the subscription price, the influences on the bond market was bad.
