NOT POSSIBLE.
When a lady who was "burning up the road" on the boulevard was overtaken by a traffic officer and motioned to stop, she indignantly asked: "What do you want with me?" "You were running forty miles an hour," answered the officer. "Forty miles an hour? Why, officer, I haven't been out an hour," said the lady. "Go ahead," said the officer. "That is a new one on me."

A BACHELOR GIRL REFLECTIONS OF

By HELEN ROWLAND

Copyright, 1921, by The Wheeler Newspaper Syndicate.

In love-making, the more art, the less heart—and alas, no woman knows which to choose!

Flattery is a habit-forming drug. The more a girl gets of it at twenty, the bigger doses she can swallow at thirty, forty—yes, and seventy!

Every man feels sure that he would adore a helpless, little clinging-vine—if she would only LET GO, occasionally.

A man can forgive a woman for making a fool, a pack-horse, or a slave of him—for anything on earth except making a fool of herself over him, so that it is possible for him to go on idealizing her.

An unhappy marriage is the poison-gas which chokes out all a man's ambitions; but it is more often the morphia of a perfectly happy marriage which deadens all a woman's aspirations.

No girl is going to bother her head over the Einstein Discovery in this weather, so long as she can work out a "theory of relativity" that will make the powder stick to her nose.

Perhaps that clergyman is right when he declares that "if there were no vamps, there would be no divorcees;" but, dear me, what credit would a poor man get for being a devoted husband, with nothing to "resist"!

When a woman is especially sweet and tender, it is a sign that she is trying to ease her conscience, for something; but it is man's way of justifying himself for a defection to pick a quarrel with a woman—and then go out and persuade himself that he is "misunderstood."

Sometimes, a woman doesn't know whether to feel flattered or insulted, when her husband declares fervently that he would never marry again, if she should die.

Of course, you can always tell a honeymoon couple. But, why TELL them? They'll find out all the bitter truths about marriage, soon enough!

Physician Explains Who Should Take Nuxated Iron

Practical Advice on How To Help Build Up Great Strength, Energy and Endurance

"Lack of iron in the blood not only makes a man a physical and mental weakling, nervous, irritable, easily fatigued, but it utterly robs him of that virile force, that stamina and strength of will which are so necessary to success and power in every walk of life," says Dr. James Francis Sullivan, formerly physician of Bellevue Hospital (Outdoor Dept.), New York, and the Westchester County Hospital. "It may also transform a beautiful, sweet-tempered woman into one who is cross, nervous and irritable. I have strongly emphasized the great necessity of physicians making blood examinations of their weak, anemic, run-down patients. Thousands of persons go on year after year suffering from physical weakness and a highly nervous condition due to lack of sufficient iron in their red blood corpuscles without ever realizing the real cause of their trouble. Without iron in your blood your food merely passes through the body something like corn through a mill with rollers so wide apart that the mill can't grind."

"For want of iron you may be an old man at thirty, dull intellect, poor in memory, nervous, irritable and 'run down' while at 50 or 60 with plenty of iron in your blood you may be young in feeling, full of life, virile and energetic."

But be sure the iron you take is organic iron—Nuxated Iron—and not metallic iron which people usually take. Organic iron—Nuxated Iron—is like the iron in your blood and like the iron in spinach, lentils and apples, while metallic iron is iron just as it comes from the action of strong acids on small pieces of iron filings and is therefore an entirely different thing from Nuxated Iron. Nuxated Iron represents organic iron in such a highly concentrated form that one dose is estimated to be approximately equal to eating one-half quart of spinach, one quart of green vegetables or half a dozen baked apples. It is like taking extracts of beef instead of eating pounds of meat.

Over 4,000,000 people annually are using Nuxated Iron. It quickly helps make rich red blood, revitalize worn-out exhausted nerves and give increased strength and energy. Your money will be refunded by the manufacturer if it does not produce satisfactory results.

NUXATED IRON ENRICHES THE BLOOD—GIVES YOU NEW STRENGTH AND ENERGY

MESOPOTAMIA GOES TO NEW ARAB STATE

Churchill Announces Policy of Restoring Old Glory and Culture of the Race.

BAGDAD WILL BE CHOSEN AS CAPITAL

Palestine a Grave Problem—With Arabs Alarmed Jews Will Get Full Control.

London, June 19.—Great Britain's new policy of replacing the existing provisional native government of Mesopotamia by the creation of an Arab state, which should be built up around Bagdad and revive the old glory and culture of the Arab race, was announced in the House of Commons today by Winston Spencer Churchill, Colonial Secretary.

Mr. Churchill declared that this was a clear policy definitely chosen and agreed to within the whole Arabian peninsula, and he indicated the belief that Emir Faisal, son of the King of Hedjaz, would be elected head of the new state. Faisal has already left Mecca for Mesopotamia.

Mr. Churchill's speech dealt with middle Eastern affairs and his visit to Cairo. He contended that a policy of appeasement and friendship alone was compatible with the British pledges and if accepted by the Arab people it was the best possible solution that could be reached.

India Not Concerned.

There were no primary or directly strategic interests concerning India in the British policy concerning Mesopotamia, Mr. Churchill continued. India could better be defended on its strategic obligations, by creating a government which would be a friend of Great Britain and might also be a friend of France. An Arab army to reduce its burdens, while discharging its obligations to the defence of the new state.

Next October he hoped to reduce the British occupying army to twelve battalions, and when the new state was created to withdraw all the British forces and enter into treaty relations with the new state.

Kurds To Stay Out.

Mr. Churchill announced that the Kurds were not anxious to come under an Arab state; hence Kurdistan would still be administered by a British commissioner, but he hoped it would eventually join the new state.

Turning to Palestine, he admitted that this was a grave problem that Mesopotamia, but much smaller in a military sense. The Arabs feared they would be swamped in a few years by Jewish immigration from Central Europe and Russia, and that the Jews would gain absolute control of Palestine. He declared, however, that these figures were quite illusory. No Jews would be brought in beyond the number that could be provided for by the development of the country's resources.

Must Have Turkish Peace.

It was only by securing a real and lasting peace with Turkey that the prospect he held out of substantial abatement of the charges falling upon both countries in the middle East could be realized. In a detailed statement of the military position in Mesopotamia he showed that with the reductions already effected the total expenditure for the current year would be £25,000,000, but he hoped that next year the normal expenditure in both Palestine and Mesopotamia would not exceed £10,000,000.

SHORT CHANGE ARTISTS HAVE A NEW STUNT

\$10 Roll of "Quarters" Had Only Two Genuine Silver Coins.

TWO ARRESTED BY THE POLICE

Gathered Them in on St. Catherine Street—Identified by Swindled Firm.

Montreal, June 19.—What is claimed to be a new variant of the "short change" scheme frequently attempted of which merchants are the victims was introduced yesterday afternoon in the downtown district, and soon after the matter had been reported to the Detective Bureau two men were arrested in St. Catherine street, charged with being operators of a novel plan to obtain money easily.

The victim was the Italian Warehouse of C. P. Macklauer, 211 St. James street, and the individuals alleged to have performed the trick are Jean Heaudry and Alphonse Daurat, neither of whom offered an address to adorn the police blotter.

Silver For Bills.

During the afternoon a telephone call came to Macklauer's from a man who offered to sell him a roll of silver for a quarter of \$10. Macklauer, who was in the shop, was rather "long" on silver. Receiving the reply that silver would be acceptable, the conversation terminated.

Soon afterwards a man entered the shop and proceeding to the cashier's desk offered a roll, supposedly of \$10 in quarters and contained in a carton stamped by a local bank. Notes were pressed his thanks and walked out.

On opening the roll of "silver" it was found that there was a genuine twenty-five cent piece on each end of the roll and all of the same size. An employee of the Macklauer shop went immediately to the nearby cigar store, only to find that the employee of the latter had been sent out for change. It was said, however, that the used the public telephone in the booth for some time.

Effected Quick Arrest.

The matter was then reported to the Detective Bureau and two members of the staff were sent out to investigate. They obtained a good description of the two men, one of whom had done the telephoning in the tobacco store, and the other who had collected the money in Macklauer's.

The report was immediately sent to the Bureau, from where it was transmitted to all detectives as they reported and to all police stations. It was 4:05 p. m. when the first report was sent to the Bureau, and according to Chief Lepage, it was 4:50 o'clock when Detectives O'Donnell, Gorman and Isaac Savard reported that they had picked up the two men of the description on St. Catherine street west near Bleury.

Both prisoners were brought to the Bureau and were later taken to Macklauer's and to the tobacco store, where Chief Lepage stated they were identified positively as the two men concerned in the affair. The prisoners were then brought back to the Bureau and were searched. Chief Lepage stated that there were found in their pockets rolls similar to the one presented at Macklauer's. He said that he was 39 years of age, and Daoust stated that he was 32 years old.

The Joyous Road.

Life's no dream—no ciddle, But better smile than weep; We'll keep time to the fiddle And dance the stars to sleep! Light the world adoring And thank God for the light, And when the sun says "Morning," We'll follow him tonight!

—Atlanta Constitution.

The first time a man succeeds in kissing a clever girl she looks at him in a way that makes him wish he had got busy sooner.

WHITE COLLAR MEN JOIN THE JOBLESS ARMY

High Class Executives and Office Employees Among Those Affected.

MANY WILLING TO ACCEPT LESS MONEY

Slackening of Industrial Engine Hits Workers in All Lines of Endeavor.

New York, June 18.—The ranks of the army of unemployed are being recruited now by highly skilled as well as unskilled industrial workers. The present business depression is laying off in increasing numbers also all grades of office employees from the higher salaried specialists and executives to the secretaries and clerical forces.

Dr. David F. Flynn, who is in charge of the New York city office of the State Industrial Commission, 124 East Twenty-eighth street, said yesterday he had noted increasingly within the last few months the same conditions as those commented upon by H. M. Coolbaugh, superintendent of the Pennsylvania State Employment Bureau in Philadelphia, who said:

Important Men Hit.

"The depression of the last six months, as reflected in the men applying at this office, show that it has affected men in all walks of life. The salaried executive and office employee is affected as well as the skilled and the common laborer."

"The failure of general contracting to open up this spring," said Dr. Flynn, "has thrown out of profitable employment many engineers and other high grade men. Office forces, too, are being depleted rather than recruited, which is a natural consequence of the slackening of the industrial engine all along the line. Unfortunately this particular condition in its influence upon the fortunes of the more highly skilled employees is not likely to show improvement, I fear, at least before next autumn."

Miss Henrietta Rothstein, superintendent of the women's department of the local office of the State Industrial Commission, said:

"Unemployment among all grades of women office workers has been growing for the last nine months. During the last two or three months the number of applications for employment which come to us for positions of this kind has doubled as compared with a like period of last year, whereas a number of available jobs for this increasing army of applicants has been cut down 50 per cent. This is true of persons who are qualified to rank as office managers. It is true of women to fill skilled secretarial posts, as well as of the less highly accomplished clerks, stenographers and others."

Another reason why there are so many marriageable women who never get married is because there are so many men who are not worth marrying.

Drop Over Ears.

Flowers, feathers and berries are arranged to drop over the ears. Green and gold grapes and bunches of coronets of wired metal lace; powdered glass, jet cabochons, coral plaques and dangling strings of gilded and colored wooden beads are other novel trimmings. Flower wreaths made of waxed and colored leather are bright and attractive.

Young girls remain faithful to the narrow garland of flowers. A pretty arrangement is to roll the hair over the ears and encircle each shining coil with a ring of tiny white flowers. Wide silk scarves are tied tightly round the head for day-time tennis and golf wear. Also for the on-ice doors girls are the gaily colored silk handkerchiefs which, when put over the hair and their ends twisted and knotted, make becoming little turbans.

London, June 19.—Now that evening headresses repeat some detail of the gown the well dressed woman finds it necessary to have one for each toilette. Fortunately, the prettiest are not always the most costly. Turbans entirely covering the hair are less worn, garlands of leaves being the most popular ornament. The leaves are sometimes composed of small colored feathers, or they may be of so unseasonably a variety as holly or mistletoe.

Very becoming are the Roman wreaths of gray-green eucalyptus leaves, meeting to form a high point in front and tied at the back with narrow gold ribbon.
