

A FINE DISPLAY OF BEE APPLIANCES, PRODUCTS, ETC., AT THE RECENT AGRICULTURAL FAIR, VICTORIA, B.C.

A COMPREHENSIVE BEE APPLIANCE PRODUCT

By E. F.

The photo needs perhaps. The two the life history of the nation to the floral kingdom. Mr. Frank Cheshire Microscopical Society is a case of nectar below this is a brood with the lesser wax the moth and larvae card to left. Beneath illustrating the mathematics with queen, cells; also microscopic tongue, etc. Below servatory hive, and a rhomboid dodecahedron further comb construction right you will notice of honey in glass can eleven pounds each capped. They formed yield of an exception This particular colony queen which has per year, and I have six of this queen raised in testing. Both 1910 showed not the slightest could be handled like play any apparent greativity, but just piled up did not require any feeding. They are of the dark Italian and I have named Nos. 1 and 2. Further be interesting.

On the right hand corner full size observatory hive frame with cell protectors cups ("cradles in which posed") together with a single comb above. From
