"There's a Reason"

Tarnished Silverware-

There's the Rub

It is so beautiful when clean and brilliant, but what a difference when tarnished.

There is no practical way to prevent tarnish—to remove it there are many ways, good—bad, and indifferent. One way—(the best), proven by 50 years' experience is Electro Silicon. This great polishing powder does not injure the finest surface. Its fame is universal. Beware of the kind that takes off the silver with the tarnish—they work easy but—

You can now purchase Electro Silicon in *cream form* as well as powder. The *cream form*, which is wonderfully popular, comes in large glass jars, 25c. Powder form—full size box, 15c. Sold by dealers everywhere.

THERE IS NO SUBSTITUTE
