

I Quickly Cured My Superfluous Hair

You May Cure Yours Too by a Simple Remedy Learned From the Japanese

I Will Give the Benefit of My Experience to Anyone Free of Charge

Ever since I was a little girl, I was cursed with a growth of Superfluous Hair. I didn't mind it so much then, but when I grew to young womanhood, the humiliation grew upon me until it became almost a nightmare. It finally got to the point where I was ashamed to go out of the house, and at the coming of a stranger, I wanted to run and hide my face. The thing preyed on my mind until there were times when my spirits were at their lowest ebb, and I often thought life a burden.

I tried every sort of powder, paste, cream, lotion and remedy that I could lay hold of—even the painful electric needle—but to no avail. The hair not only would not leave, but it grew worse. What I suffered under the needle, I can't describe.

One day a friend, who had travelled much, recommended a simple little remedy learned from the Japanese. It removed the hair at once and without pain, and in a few days I was the happiest girl in America. The hair had disappeared. It left no scar, and it didn't hurt at all. To-day my face is still free from any trace of it.

I am so happy at my own success that I want every other woman to have the chance to remove the ugly disfiguring hair from her face, neck and arms so that they can go into society or to business, free from embarrassment, able to wear short sleeves, and go without a veil. All who want to destroy their growth as I did may secure full particulars to enable them to do likewise, free of charge, by just sending me a two-cent stamp—that's all I ask—just to pay actual postage for reply in plain sealed envelope. Please state whether Mrs. or Miss and address. Mrs. Caroline Osgood, Suite 905 B. I., 118 East 28th St., New York City.

SPECIAL ENDORSEMENT: As the method above referred to has been endorsed by doctors, true specialists and many other publishers, we advise all readers thus afflicted to take advantage of Mrs. Osgood's offer and write her at once at above address.

able in each one. Every possible objection was urged by the superintendents to see whether there was any flaw which did not appear on the surface, but none could be discovered. The records of the school and the testimony of all present showed that the pupils were taking a new interest in their school work.

The secret of the whole plan is that the teacher has made practical use of his pedagogic training and has shown the parents how to make farm life more attractive. He has brought the life of the school into close personal relations with the life of the home. These little boys and girls have learned that they can make articles, grow products, and raise chickens, sheep, pigs and cattle that will be recognized in the commercial world; for these are the things that the various parents say they are going to let their children do. The prizes first offered by the farmers of the district were cash, but now that interest has been aroused, blooded poultry, and other high-class stock and choice fruit trees will be given as prizes.

The sixteen county school superinten-

Duke of Connaught was usually addressed as "Pat" in the home circle, a familiar appellation which, in his more sedate years, has given place to "Arthur." The Duchess of Argyll has two entirely different autographs, one bold, dashing, and vigorous, when written outside the Royal pale; the other small, and much more formal in her family letters. But both are equally "Louise." Princess Henry of Battenberg, daughter and mother of queens, loves to be called "Trixie" by her august relatives.

Eggs in the Window.

The district known as Eden Valley, in Westmoreland, England, still observes a peculiar custom. Sometimes rows of hens' eggs are placed in windows, and strangers and tourists wonder why. The reason for this custom when known supplies you with information concerning the inhabitants that often proves useful. Should there be two ordinary eggs in the window, it denotes a married

dents have gone home to their sixteen different counties and are telling to the teachers and the parents the story of what is being done in the little school district of Spring Valley. It is not too much to say that the leaven at work in this valley will give a new impetus and change the character of the agricultural work of the whole state of Oregon.

Royal Nicknames.

King George is still "Georgie" in the privileged family circle, just as he was when he wrote his home letters in his cabin on the Bacchante. Queen Mary was long known and loved as the Princess "May;" but this pet abbreviation is no very great favorite with her. She prefers to be addressed as "Toria" by her friends and relatives, and always signs this name to her friendly letters. The Queen of Norway is "Audie" or "Maude" to all who enjoy her intimacy, just as the Duchess of Fife is "Louie." The Princess Victoria, her sister, is either "Vicky" or "Victoria." As a boy, the

couple are in residence, while a bantam egg represents each child. Thus, if there are six children, there would be six tiny eggs. If a parent dies, his or her egg is painted black, and after a year is removed altogether. Should any of the family die or leave, a small egg is taken away. Should a widow or widower marry again, she or he is represented by a couple, which means there would be three large eggs—or one for each marriage. Bachelor or spinster occupants, for some reason or other, are exempt.

On one occasion there was a window bedecked in one village with sixteen eggs, registering the parents as each twice married, and twelve children, including three sets of twins, when two eggs are added at once.

Costiveness and its Cure.—When the excretory organs refuse to perform their functions properly the intestines become clogged. This is known as costiveness and if neglected gives rise to dangerous complications. Parneelee's Vegetable Pills will effect a speedy cure. At the first intimation of this ailment the sufferer should procure a packet of the pills and put himself under a course of treatment. The good effects of the pills will be almost immediately evident.

Fascinating Eyes

Famous Professor of Chemistry Offers Free, Secret How to Have Strong, Healthy, Beautiful Eyes

Many with Weak Eyes Can Throw Away Their Glasses

EYELASHES AND EYEBROWS Can Also Be Made Beautiful

Without beautiful eyes, no one is really beautiful, while even a homely face is made attractive by eyes that please or appear forceful.

Without strong eyes no one can enjoy life to the utmost. Those whose eyes are weak and those who have to wear glasses are greatly handicapped in life's race.

Through the wonderful discovery and free advice of the famous English chemist, Prof. A. P. Smith B. Sc., F. I. C., etc., formerly Professor of Chemistry at an English University, you may have eyes as radiant as the Evening Star—eyes that attract and fascinate—eyes that have the power to influence others—eyes that people call wonderful.

Better still, Professor Smith's scientific discovery enables many with weak eyes to throw their glasses away and make their vision stronger and more capable. Neither operation nor dangerous drugs are necessary.

His secret will also enable you to secure long, silky eyelashes and thick, well-arched eyebrows, which are to a beautiful eye what a fine setting is to a brilliant diamond.

In addition, this remarkable discovery makes weak eyes strong, and quickly overcomes smarting effects of wind, dust and sun, besides clearing the eyes of "bloodshot" and yellow scar. If you wish to make your eyes bright and beautiful, write today, enclosing 2 cents in stamps for reply, (please state whether Mr., Mrs. or Miss) and address your letter to Prof. A. P. Smith, Dept. 995 F. E., Pine St., Providence, R. I., and you will receive the secret free.

Cure that Bunion

No need to suffer bunion torture another day. DR. SCHOLL'S BUNION RIGHT
