

Make Your Home A Pleasant Place to Live In

¶ The house with cold halls and draughty rooms—the house in which you breathe the burnt-out gas and dust-laden atmosphere of the hot air furnace or stoves—is no place in which to bring up children. Yet the same house can be easily changed into a pleasant, healthful place to live—by installing

Daisy ^{Hot} Water Boiler & King Radiators

It doesn't require any alterations in the house, either—no tearing down of partitions or bother to the occupants. The system can easily be installed without disturbing the house.

So you don't need to be uncomfortable in the old home. Our system of hot water heating will make it as cheerfully, healthfully comfortable as the most modern house.

Outside the advantages of health and comfort offered by our hot water heating system, no one can afford to continue the fuel wasting

method of heating by hot air or stoves. By installing a Daisy Boiler and King Radiators now, you will in a few years save the cost of the change. And Daisy Boilers and King Radiators will last as long as the house.

You do not only add to the comfort of living by installing a heating system operated by a Daisy Hot Water Boiler and King Radiators, but you also add to the value of your property. Don't you think you had better write for full information? Our booklet, "Comfortable Homes" will be sent free on request.
