

## GILSON ENGINE HARVESTER ATTACHMENT

HAILED AS THE GREATEST INVENTION SINCE THE SELF BINDER

A trailing attachment with universal joint and friction clutch. Standard GILSON "GOES LIKE SIXTY" air cooled engine, useful the year round. Extra weight rests on truck wheels. No strain or vibration on binder. Saves grain, horses and time. You can cut on any kind of ground, no matter how wet or rough. Fits any style of binder.  
Write for detailed description.

GILSON MFG. CO., Ltd., 460 York Street, GUELPH, ONTARIO

Harmer Implement Co., Winnipeg, Man., Western Agents.

## HAVE YOU HAD ENOUGH OF LONG COLD WINTERS AND CROP FAILURES?

Can you afford to work year after year for nothing and endure the above conditions too?

There are no drouths, cold winters, hot summers, crop failures nor any other hardships to contend with in Chilliwack Valley.

We are placing many Prairie farmers on beautiful farm homes and we can place about 500 more this summer. Come and see it yourself, and if you do not find what you expected it will be because such an ideal place does not exist on earth.

Send for illustrated booklet and view of the valley, which measures 12 x 18 inches. Information free to all.

T. J. POLLEY & CO., CHILLIWACK, B.C.

No Other Paint Made Specially to Stand the Western Climate

Don't take chances when you buy paint. Don't experiment.

One paint only—STEPHENS—made specially to suit the climate of the West; very hot in summer very cold in winter.

That tells why STEPHENS Paint leads. The big Elevator Companies use STEPHENS. The big Railway Companies use STEPHENS. They know what kind of paint this country needs. You are safe when you follow their judgment.

Buy STEPHENS—the product of the Western Paint Specialists—28 years' Western experience back of it.

At all hardware dealers.

Write us for descriptive booklet No. 11 and handsome color cards.

## Investigate The Record of The Spreader You Buy

BEFORE you buy a manure spreader, find out what it has done for other farmers. That is the best proof of what it will do for you. Investigate carefully, and you will find that in the matter of service rendered, there are two machines that rank high above all others. These are the—

### I H C Spreaders

Cloverleaf      Corn King

They have proved their value in actual use in the hands of hundreds of satisfied farmers. Choose one of these machines, and you will be sure of getting the full value of your manure by spreading it in the most economical and efficient way.

Here are a few "reasons why":

The mechanism which transmits the power from the axle to operate the apron and beater on I H C spreaders is simple and efficient. It requires little power to operate—does not get out of order.

The beater is strong and positive in its action. It thoroughly pulverizes the manure and distributes it evenly. It can be quickly regulated to spread manure as thickly or as thinly as desired. This adjustment can be made from the driver's seat while the spreader is in operation.

The wood in I H C spreader frames is hard, resinous, non-porous, very regular and narrow ringed. It is air-dried so that the sap is retained—cementing the wood fibres together. This prevents manure liquids from penetrating it and makes it proof against the action of the acids in the manure.

Wide-tired wheels and roller-bearings insure light draft, making I H C spreaders easy on the horses.

The Cloverleaf spreader has an endless apron. The Corn King spreader is of the return apron type. Either can be furnished on special order with lime hood for spreading commercial fertilizers, and drilling attachment for distributing manure in rows. Both styles are made in several sizes, so when you choose from the I H C line, you are sure of getting just the machine that will meet your needs.

Call on the I H C local dealer and go over the matter with him, or, if you prefer, write nearest branch house for catalogue and full information.
