

Culture on the Farm

The day is past when culture and social enjoyment were confined to the larger cities and towns, when the farmer was cut off from the musical world. The day of the parlor organ has passed—or is rapidly passing away. Every farm-house in Western Canada regards a piano—and a good one at that—a necessity and not a luxury.

THE NEW SCALE WILLIAMS PIANO

is Canada's foremost instrument. Its improvements and latest features have gone far towards creating a better appreciation of good music all over Canada. It more nearly approaches the ideal piano than any other.

Its tone, quality, construction and architectural beauty are unexcelled. For good music, for accompanying the solo voice or chorus of song, great artists all over the world are loud in its praises. And yet it is a Canadian instrument—perhaps, the highest exponent of Canadian industry.

If you will fill in the corner coupon, cut it out, and send to the Williams Piano Co., we will send you, absolutely free, several beautiful booklets, "The making of a Great Piano," etc. We will also tell you of easy payment plans that will interest you.

THE WILLIAMS PIANO CO. LIMITED
OSHAWA
Ontario

Please send me booklets spoken of in this advertisement, also particulars of easy payment plans.

Woodstock, Ont.

Cancer Cured by Anointing with Oil.

Cancerol, a compound of essential Oils, has been discovered which readily cures all forms of cancer and tumor. It is safe and sure and may be used at home without pain or disfigurement. Readers should write for free book to the originator, Dr. L. T. Leach.

ADVERTISE IN THE ADVOCATE

presented by a small deputation from the association. The arguments advanced on that occasion for a revised tariff have been given wide publicity, not only in Canada but in Great Britain, and have not been answered.

As we have before pointed out, the time to give Canada a tariff to aid in its development is when the country is prosperous. The whole world has been experiencing an era of great trade activity, the United States and Canada particularly so. At present some Canadian industries are struggling against foreign competition. In a time of depression abroad, with increased efforts for trade by foreign countries, these industries could not stand with the tariff as it is at present. The time to build a dyke is when a stream runs low and not when it is swollen by the floods; the latter is the time the dyke is needed. Just so in trade—general business depression is sure to occur sooner or later, and the time to revise the tariff is when the country is prosperous, and so prevent the possibility of ruinous foreign competition.

The committee views with regret the great increase in the importation of dutiable goods during the past year and the continuance of the excess of our imports over our exports, which this year amounts to \$35,000,000. Canada's total import trade for 1905-6 reached \$176,771,000, an increase of \$19,606,000, of which increase \$10,960,000 has been purchased from the United States. It is satisfactory, however, to your committee to note that if Canada has to go abroad to make such large purchases Great Britain's share is increasing very satisfactorily. This year our imports from Great Britain amounted to \$69,289,000, which is an increase of \$7,972,336, or 13 per cent. over the previous year, and which may largely be attributed to the preferential tariff.

It has never been demonstrated more clearly than during the sittings of the tariff commission that the tariff is not now a political question. We regret that some of the newspapers of Canada have not realized this. The tariff is a business proposition and the news paper that puts its politics before its patriotism has not the true interests of our country at heart. The question is one that will bear full and frequent discussion, and actual conditions, not theories or political exigencies, are the principles upon which its revisions should be based.

Your tariff committee believe that sentiment in Canada was never so thoroughly in accord regarding the tariff question as it is to-day. The true Canadian policy is, "Keep your money in circulation at home by buying goods made in Canada." The Canadian aspiration is that every industry, whether it be farming, mining, lumbering, fishing or manufacturing, should be protected and developed by a strong national tariff. Your committee believes that the Canadian government will give the people what they demand, and that the tariff of 1907 will effectively foster and encourage every branch of our national industries.

Your committee desires:
(1) That the Halifax resolution of 1902, which has been reaffirmed at every annual meeting of the association since that date, be reaffirmed. The resolution is as follows:

"Resolved, that in the opinion of this association the changed conditions which now obtain in Canada demand the immediate and thorough revision of the tariff upon lines which will more effectually transfer to the workshops of our Dominion the manufacture of many of the goods which we now import from other countries;

"That in any such revision the interests of all sections of the community, whether of agriculture, mining, fishing, or manufacturing, should be fully considered, with a view not only to the preservation but to the further development of all these great national industries;

"That, while such a tariff should primarily be framed for Canadian interests, it should nevertheless give a substantial preference to the Mother country, and also to any other part of the British empire with which reciprocal preferential trade can be arranged, recognizing always that under any conditions the minimum tariff

Rex Flintkote ROOFING

We Say That It Will Do Only What It Has Done

Mr. E. Plows, of East Plato, Ill., built a 120-foot poultry house on his farm last fall. He used Rex Flintkote for roof, sides and ends; an ordinary farm-hand laid it. This spring he writes of Rex Flintkote: "In spite of the very hard winter, I find it very satisfactory in every way. It has proved absolutely wind, water and weather-proof."

We have other letters telling how Rex Flintkote has proved fire resisting and wind-proof. The writers of some of the letters tried imitations too. One man says that none of his other roofs lasted over 30 days on his dry kiln, but that Rex Flintkote stands the extreme high temperature perfectly. He is Mr. John F. Weathers, President of the Columbia Show Case Co., Columbia, Ga. Rex Flintkote is not an experiment. It has been tried and tested by fire, water, wind and wear for years, and you take no chances in buying it. You do, however, take serious chances with most other roofings.

SEND FOR FREE SAMPLES

If your dealer hasn't the real Rex Flintkote with the boy trade mark on the roll, stop, sit down and write to us for the name of a dealer who has. We will send you also samples to test, and a complete booklet on roofing. Everything to lay comes in the roll. We make a special red paint for Rex Flintkote if you prefer a red roof to a black one. For 4c. to pay postage we will send a valuable booklet, "How to Make Poultry Pay."

Dairy Talks by the EMPIRE Dairy Maid—No. 5.

Anybody Can Make Claims—But YOU Want the Cream Separator That "Makes Good."

That may be a little "slangy," but you know what I mean—you want the separator that will do what its manufacturers promise it will do, and what you expect it to do.

How are you going to decide which separator it is that will "make good" for you?

Big talk and big claims are made for all of them. You have to decide the question for yourself and your milk-profits depend upon your decision.

Therefore, I say don't take anybody's claim until he proves it. He may be a little over-enthusiastic in his praise of his own machine.

But, look here! Here's something worth thinking about:

Since the first cream separator was invented no separator has ever made such rapid strides in sales and in popularity as has the Improved Frictionless Empire. In five years its annual sales have increased 1,500 per cent.

What do you suppose is the explanation of that? Why do so many people buy the Empire? There can be only one reason: The Empire gives better satisfaction in the hands of its users than any other separator ever made.

There's no doubt about it.

And this is how and why it does it:

It is Simpler in Construction. All unnecessary parts are eliminated. It simply has a bowl with a few light cones inside it and the simplest gearing necessary for driving it.

It Turns More Easily. The bowl being smaller and lighter, as a matter of course, it does not take so much "elbow-grease" to turn it. Besides, the bowl runs practically without friction, because of its patented bearings.

It is More Easily Washed. The bowl containing only a few light cones—being entirely free from discs and other complicated parts—is as easily washed as ordinary dinner plates.

It Requires Fewer Repairs. Having no complicated parts it simply can't get out of order, unless it is greatly abused.

It Skims Perfectly. All milk in it is given five distinct separations. It is impossible for more than a trace of butter fat to escape.

But goodness me! It would take the whole paper to tell you all the points wherein the Empire excels. I can't do it here, but if you'll send your name the Company will be glad to send you their separator books, full of dairy facts you ought to know. Just send a postal card telling how many cows you keep and what you do with the milk. Address
