agement that the property and he strongly on further development, and he strongly tends into the Black Bear, and diamond leaves this morning on a business tup on further development, and he strongly endorses the reorganization plans. He is drills will be able to locate it.

The Big Stack at Trail.

Work on the big smoke stack of the smelter at Trail is progressing at the rate Republic started to crushing ore on ed a height of 75 feet, and is to go up plant is 200 tons per day, but provision about 100 feet higher in the sky, and this will take 331-3 days to finish it. The reason that the progress is so slow be allowed for settling so that there will be no danger of its falling down. is that in a stack of masonry time has to

St. Eugene Ore for Chili.

The St. Eugene mine has made another shipment of concentrates to Chili. On Chili, because they make a better flux.

Work on the Green Mountain.

On the Green Mountain work continues along the usual lines. The drift on the 300 foot level has been driven for a distance of 175 feet, and considerable ore is being encountered.

The Development of the Juno.

with Charles Parker, the company's en-gineer. A point was selected forty feet above the Venus line, from which the big 900 foot tunnel will be started. This will give the property the maximum depth obtainable by drifting with room on the group below the tunnel for a The first shot will be fired on Monday, when the permanent camp will be completed and everything ready to proceed with work uninterruptedly. The strong feature of the Juno is that no dead work is required. The Juno vein chased a few days since by Mr. Alexander runs at right angles to the tunnel projected, and intersects the Venus lead on which the drift will be run. By drift-which the drift will be run. By drift-lead the company commences the company commences the surface had been shipto take out pay ore with the first shot, a ing on this lead the company commences desirable condition of affairs which is desirable condition of affairs which is only encountered occasionally. The estibeing done, under the direction of Mr. Sharp, is the sinking of an inclined shaft. lead 900 feet in and at a depth of 300
The intention is to sink on the ledge feet, and crosscuts can then be run east and tollow the dip of the ore down. It and west on the big ledge. The company is thought a mine can be made of the will employ nine men on the start, and this staff will be increased if it is decided to work three shifts.

A Rare Metal Found.

The tramway is certain to be finished in the three months chromium group, and is reduced as tain to be finished in the three months heavy, hard, nickel-whree metal which is allowed under the terms of the contract. quite permanent. Its yellow oxide is used to impart to glass a delicate greenish-yellow tint which is accompanied by a strong florescence, and the market value analyst reports that the percentage of uranium is .31, and experiments are now being made to determine if the rare metal can be saved. In this event the Venus Anglo-American Mining company. property will assume an entirely new

American Boy Will Ship.

The American Boy group will be added to the list of Slocan shippers this win-ter. The property has shipped more or less regularly for some time, but the work carried on was exclusively development, and the shipments were of ore mine is now on an excellent basis, and decided to reorganize the company and mine is now on an excellent basis, and decided to reorganize the company and the management has concluded to ship to make the stock assessible to the extended to the stock assessible to the extended to make the stock assessible to the extended to the stock assessible to the extended to the shipping ore is high grade, the group promises to become one of the best properties in the Slocan. The American Boy needed, for the purpose of development, is just under the Last Chance, and the and hence they will only be called for latter company has leased the two upper at intervals. The additional capital stock levels of the American Boy to take out will be placed in the treasury and will ore. The American Boy has made connection with the Last Chance tramway, and is now in a position to bring its outfit to the railroad at a low figure, instead of having to depend on pack animals or rawhiding, as has been the case up to the present.

Will Commence Crushing Ore.

the Nelson Tribune. The company has a first-class high grade galena property, a large sum has been expended in development, and within the next week their new 100-ton concentrator will commence crushing ore. The property is in shape to ship regularly, and on a large scale, thus making it one of the Slocan's best propositions. The mill was designed by the best people in the mill-building business, and is ready to commence operations. The tramway from the mine to the mill was built by Riblet of Nelson, and is almost ready to carry ore. W. H. in the property, although not unmindful on the signed and new ones during the contact of the mand new ones during the contact of the singuistic of the passage of a train load of ore, the company in a very discouraging condition. The mine was by no means proved and much costly development work would be necessary before it could to ship regularly, and on a large scale, thus making it one of the Slocan's best stated producer. There was only the unwatering of the mine alone—and the vacancies. The what undermined the railway track, had been sufficiently advanced sps to permit of the ompany in a very discouraging condition. The mine was by no means proved and much costly development work would be necessary before it could to ship regularly, and on a large scale, thus making it one of the Slocan's best store; the mine alone—and to ship in any large quantity until such to ship in any large quantity advanced sps to permit of the mine. The condition of the Northport smelter is, however, such that it will be initial shipment of the mine alone—and to ship in any large quantity and one as treating the initial shipment of the mine to the initial shipment of the mine of the mine. The condition of the Northport smelter is, however, such that it will be to ship in any large quantity until such to ship in any large the initial shipment of the mine of the mine. The condition of the passage of a train load of ore, the country to shappend the initial shipment of the mine of the initial shipment o

Resuming Work Around Ymir.

Several properties at Ymir have recum-ed work recently. The Summit-Ymir company has recommenced work on the Summit claim, about two miles north of the the Big Four group on Porcupine creek.
The tunnel which is being run to tap the vein is within about 30 feet of it.

will be submitted. It will take a couple of months before the reorganization can be fully

The Simeoe Mining and Developme company has let a contract for the completion of the crosscut tunnel, which is in some 290 feet. The face of the tunnel is in quartz, which is becoming more mineralized as the work progresses

The Shiloh claim, recently sold to W. Harris of Spokane, representing a syndicate of Spokane capitalists, is being developed with very promising results. The M. S. Logan, managing director of the property lies between Wild Horse and Bear creeks, and overlooks the town, about a mile away. It is traversed by an immense vein of quartz, which in some places outcrop with a width of about 50 feet, following a pay streak of about four feet. The ore from this streak carries considerable galena and copper.

THE WINNIPEG COMPANY.

following to say: In February of the present year the mine was shut down by

of the difficulties before them in attempting to make a mine without either funds (Anica or treasury stock. Some thought of reorganization at that time was entertained, but after obtaining the services of Mr. N. F. Tregear as superintendent and consulting with him, it was finally decided to make a strong effort to make the mine self-sustaining without reorganization. For some months the effort was in a measure successful, but the compulsory development work and the heavy reight and treatment rates were too nuch for the resources of the Winnipeg in its present stage of development. An important crosscut on the 100-foot level nas been run 120 feet, and should be continued, but at every turn the work has been hampered by lack of funds, without be prosecuted. The Winnipeg ground considerably broken up above the 300-fe level, and it was very desirable to sink agement that the property promises well confident that the Winnipeg will make a mine, although he acknowledges that the difficulties encountered have greater than he expected.

Many of the nur Winnipeg are of low grade too ship profitably to the Trail smelter, the freight and treatment rate is \$7 per ton-where most of the 1,200 tons shipped from the mine were sent, or even to Granby for \$5.50, but in December next the Greenwood smelter will give a \$4 rate. On the ore the Winnipeg has already shipped a \$4 rate would not only have saved the company several thousand dollars, but it would have enabled the shipment of a lower grade of cie, which the \$7 rate made prohibitory. At the forthcoming meeting, to which the Wednesday six carloads passed through mit claim, about two miles north of the forthcoming meeting, to which the Nelson from the St. Engene consigned to Ymir mine, on the north fork of Whid reorganization scheme will be submitted, the smelter of the Guggenheims in Chili. Horse creek The British Lion Gold Minates a full statement of the company's affairs This ore is mixed with those produced in ing syndicate has also resumed work on will be submitted. It will take a couple

Peoria Mines Meeting.

The annual general meeting of the Peoria Mines, Limited, will be held this (Tuesday) evening at the office of Mr. W. J. Whiteside. Important business will come up, and a full attendance is re-

SILVER QUEEN MINES.

First Meeting of the New Directorate Will Be Held on Saturday Next.

The reorganization of the Silver Queen Mining Company has been completed and the first meeting of the new directorate will take place on Saturday next. company has been reorganized as the Silver Queen Mines, with a capital of \$375,000 ver Queen Mines, with a capital of \$375,000 divided into 1,500,000 shars at 25 cents each, which are assessable up to five cents. The president is the Hon. George E. Foster, and the vice president the Hon. 1'. Mayne Daly. The secretary treasures in P. W. Communication of the secretary treasures. Hon. T. Mayne Daly. The secretary treasurer is R. W. Grigor, who has acted as liquidator of the old company. The company has just been registered in Victoria. The object of Saturday's meeting is to

make an allotment of the new stock which vill be carried out in the usual manner Whether any work will be done on the mine this winter is a question to be deterpossible to commence immediately this will be done. The property is situated on Cariboo Creek, which flows into Lower Arrow lake at Burton City. The mine is well up on the divide, and is consequently somewhat difficult of access. In Burton City it is regarded, and by none more emphatically as the state of the state o emphatically so than the miners, as one of the best properties in the district. Quite a lot of work has been accomplished with years fair another. with very fair results. There are plenty of cabins and sufficient plant upon the grounds to allow of work being carried on through the winter, if supplies are now taken in and work started at once.

A wagon road has been built part of the way up Snow Creek, an affluent of the Cariboo, flowing into the latter stream near the mouth, and it is over this route that access to the mine is most easily

THE ELECTRICAL COMPRESSOR.

Progress of th Work-Completion of the

Stone Outer Foundation. The heavy stone foundation of the new Anglo-American Mining company. The Rossland is a promising property, carrying gold and galena. The consideration was 15,000 partly in cash and the balance in the partly in the pa ing on the wall to the east, the others naving been completed. The masonry wall is upwards of three feet thick at the top, and measures considerably more at the footings. The northeast corner is only Capital Stock to be Increased and Stock 35 feet in height, while the opposite corner, the lowest part of the wall, is over 15 feet. The footing at the former corner The directors of the Winnipeg Mining and Smelting Company, Limited, have decided to reorganize the company and to make the stock assessible to the extied into the stone filling with anchors so as to have the whole massive structure braced in the best way possible.

In the meantime the frame building, which has been substituted for the white brick erection first proposed, because or the lateness of the season, will be immediately proceeded with, the first sills having been laid yesterday. For so substantial a bit of work the expedition which has been used is remarkable, only 16 days having elapsed since the starting of upon the proposition.

The Rossland Great Western has ha The forthcoming week will inaugurate that condition for three months. About that condition for three months. About that condition for three months. About the middle of May, some large blocks of the compressor foundation, which, at the company has the Nelson Tribune. The company has were elected to fill the vacancies. The were elected to fill the vacancies. GRAND FORKS
