Sixth Year, Number 42

IN LONDON MARKET THE WINNIPEG MINE FINE CASCADE ORE AT GRANBY SMELTER IN FRANKLIN CAMP IN EASTERN CANADA

HIS RECENT EXPERIENCES THERE.

ORES FROM THE BUFFALO FAIR.

land & Slocan) syndicate, limited, of visit to the property," and has succeeded in successfully plac-

known Showshoe mine, which is situated near Phoenix in the Boundary country. The Snowshoe, which is looked upon as one of the great mines of the province, has from the first been handled in a businesslike manner, and the placing of such a property upon the London market should do much to draw favorable attention to British Columbia, especially as it is understood the recent strike was made in the mine. Apparently the parties interested have every reason to feel encouraged with the results that have been achieved in the mine. Apparently the parties interested have every reason to feel encouraged with the results that have been achieved in the last couple of weeks or less.

Considerable interest, it will be remembered, centred about the long cross-cut tunnel driven to tap the vein at considerable depth. It was hoped that this would locate the ore in place, the trouble heretofore at the Winnipeg bemost of s the line

not engaging in stock-jobbing operations.

Speaking to a representative of the Miner yesterday, Mr. McMillan stated that owing to the British America Corporation fiasco and other difficulties well known to Rosslanders, it had been extremely difficult this year to interest capital in British Columbia. London does not at present look favorably upon investment in this province, and British Columbia mining shares are not fashionable just now. In order to restore British confidence in the mineral wealth of British Columbia, some of the big companies operating in Rossland must begin to pay dividends. Directly this is done capitalists will be disposed again to invest here. Shareholders do not understand how it is there have been dead and its actual width.

Manager Pleasure is his first the crosscut in the Consort the Consort the Miner, the crosscut encountered the ore, and it is gratify into the learn that the ore is not only in considerable quantities but of excellent appearance and assaying very satisfactorily. The management stiff declines to give any figures relating to values, maintaining that in that particular class of rock the only figures at all reliable are smelter returns. One of the ledges is eight feet in width. The second on which work is now being done, is wide, but the distance in feet is still undetermined. The crosscut is 28 feet in ore, but the hanging wall has not been reached and until this is done it is impossible to determine the pitch of the lead and its actual width.

Manager Pleasure is highly decided in the Miner, the crosscut is gratify-ing to learn that the ore, and it is gratify-ing to learn that the ore, and it is gratify-ing to learn that the ore, and it is gratify-ing to learn that the ore, and it is gratify-ing to learn that the ore, and it is gratify-ing to learn that the ore, and it is gratify-ing to learn that the ore is not only in considerable quantities but of excellent appearance and assaying very satisfactorily. The management stiff declines to give any figures relating to val

tario government had a splendid exhibition of minerals in charge of officials of the Bureau of Mines. Not a solitary specimen of British Columbia ore was to be seen anywhere. Oregon, Washington, Colorado and Nevada had fine exhibits. "I had the pleasure," said Mr. McMillan, "of going through these exhibits with Mr. Thomas A. Edison of New York, who explained many of their features to me. As showing how important it is to be representing how important it is to be represent ed at such exhibitions, I may say that day, leaving yesterday for Moyie, Mr. Edison, in looking over these exhibits, came across a certain mineral which he found suitable for some of exclusively. The work in hand consists that a crew of 90 men is employed in the mine on development exclusively. The work in hand consists his scientific operations and of which he will use large quantities each year. Other capitalists were there looking for investments, but British Columbia was investments, but British Columbia was not there. This policy of masterly inactivity on the part of our provincial government is what helps to keep British Columbia in the background."

Mr. McMillan, who expects to be here for the rest of the year, leaves tomorrow to visit the Snowshoe mine, and will be away for some days.

will be away for some days.

A MANILA PAMPHLET.

Vicious Attack Made on the Philippine Commission.

MANILA, Aug. 13.—A pamphlet was published broadcast yesterday contain-ing a vicious attack on the United States Philippine commission, signed by the Centro Catholico. All the mems of that body indignantly deny having any connection with the publi-cation. The leaders say that nobody was more disgusted at such a publica-tion than themselves. They believe the pamphlet was issued by a local paper in an endeavor to create a sensation, as the paper was published simultaneous-

ly with the issue of the pamphlet. The latter was nominally in favor of The latter was pominally in favor of the church calling on the people to rise in their might against Judge Taft, the civil governor, and "the rest of the rickety brawlers running the govern-ment of the United States," and saying "they have declared war against God." Prominent Catholics are awaiting

Prominent Catholics are awaiting Governor Taft's return to Manila in church the sentiments contained in the

THE RECENT STRIKE

OF ORE.

LINCOLN UNDER CON-

SIDERATION.

Mr. Anthony J. McMillan, managing "Things have taken a big turn for the director of the British Columbia (Ross- better at the Winnipeg since my last London, England, arrived in Rossland Plewman, manager of the Winnipeg, on Sunday last after an absence of over yesterday. Mr. Plewman has just returneight months. During the most of this ed from a trip to the property and is intime Mr. McMillan has been in England, feeted with the spirit of jubilation that and has succeeded in successfully plac-ing upon the London market the well-the recent strike was made in the mine.

draw favorable attention to British Columbia especially as it is understood to be in the hands of strong people who are looking for investments, and are not engaging in stock-jobbing operations.

of sinking on the Lake Shore and the extension of the horizontal workings on the other claims comprising the St. Euthe other claims comprising the St. Eugene. The big concentrator is shut down, and it is problematical when it will resume. The London market for lead shows no signs of improvement; in fact there is a decline rather than otherwise.

TYPOGRAPHICAL UNION.

An Amendment Regarding Appeals From Subordinate Unions.

BIRMINGHAM, Ala., Aug. 14.-At today's session of the annual convention of the International Typographical Un-

ion consideration of the report of the laws committee was continued.

An amendment offered by President Lynch relative to the manner of appeals from the decision of a subordinate union was adopted. The appeal is first to be submitted to the president, except where allied crafts are organized as district the president of the presi trade unions. The aggrieved party can appeal from the president's decision to

the executive council, and finally to the International body.

Cincinnati was unanimously chosen for B.A., in the presence of a gathering of the convention of 1902.

FROM THE LEAD IN THE TUNNEL

STRUCTING THE WAGON

ROAD.

An important strike has been made at the Cascade mine on St. Thomas mountain. The discovery of the lead in the tunnel, already referred to inthe Miner, has turned out to be of more interest than was at first expected because of the rich ore which the vein has proved to carry. An average of the samples taken from the face of the ore where it was encountered in the crosscut below the shaft was taken, and assays were made by Sam W. Hall. Mr. Hall informed the Miner yesterday that the result of the assay was as follows: Gold, \$338.83; silver, 14 ounces.

The management of the property is naturally jubilant at the splendid results obtained from the assay. If the lead proves to be as wide as it is found in the shaft above, and carries such value.

in the shaft above, and carries such values for even a small portion of the width, it will prove to be a veritable bonanza.

The point from which the samples giving such handsome returns were taken is where the long crosscut tapped the vein at a distance from the surface horizontally of 220 feet and rectically of

the vein at a distance from the surface the vein at a distance from the surface thorizontally of 230 feet and vertically of 110 feet. No effort has been made as yet to crosscut the vein itself, so that the actual width of the ore at that particular point is as yet unknown. In the shaft from above, now down a distance of 90 feet, the ore is five feet in width and averages \$30 in gold and 39 ounces in silver. A comparison of the figures indistington a cates that as depth is obtained the silver cates that as depth is obtained the silver as the same and the gold values insilver. A companison of the figures indi-cates that as depth is obtained the silver values decrease and the gold values in-

tained here and in Chicago have been most encouraging.

If operations are commenced, as is not altogether unlikely, the company's alm would be to make a shipper of the Abe Lincoln, and the addition of a producing mine to the list of Rossland shippers will be an acquisition worth looking forward to.

THE ST. EUGENE.

Charles Biesel, superintendent of the St. Eugene mine, was in the city for a day, leaving yesterday for Moyie, Mr. James notified the owners of the result of the trial run and received a wire from Mr. Will expressing satisfaction and congratulating him on the outcome. The ore for this run was mined on the Maud S. claim. The Yellow Jacket lead is narrower than that of the Maud S., but the values are much higher. A trial run of Yellow Jacket ore is being prepared, and 400 sacks of the ore is already at the mill ready to be utilized when the bonditions in regard to the water supply improve. in regard to the water supply improve. It is confidently expected that this ore will run close to \$100 per ton.

Mr. James left this morning for Halcyon Hot Springs where he will spend a week. He was accompanied by Mrs. James and son.

OLD GOLD CAMP.

Judge Miller left yesterday for the Old Gold camp on the west fork of the Duncan river in the Lardeau. The company is working on the Old Gold and Primrose groups, and ore is being stoped with a view to shipping at an early date. Judge Miller will inspect the properties and determine on the programme for the winter season.

FRANCE'S POPULATION.

A Very Small Increase in the Last Five

PARIS, Aug. 14.—The official census returns show the population of France to be 38,641,333, an increase in the last five years of 421,364. The increase is mainly in urban centres. Twenty-eight departments show an increase and 59 a decrease. The census figures include the troops in China, and the sailors of the navy and merchant marine absent from France on March 24th.

MR. A. J. McMILLAN SPEAKS OF PROMISE OF GOOD RESULTS FROM A VERY ENCOURAGING ASSAY THE WORK OF ENLARGEMENT IS GOOD REPORTS OF THE SHOW- ACCIDENTS THROUGH THE MIS-GRESS.

FIELDS.

GRAND FORKS, Aug. 13.—(Special.) -A trail will be built immediately from tain. The discovery of the lead in the the forks of Kettle river, 35 miles north

ed this season.

Good progress in the work of enlarging the Granby smelter is being made. The labor troubles in the United States however have delayed the completion of some of the machinery. One carload of electrical machinery arrived this week, and two additional carloads, with other machinery, are expected before Saturday. The power house is being enlarged and the extended foundations have been completed. The power plant will be incompleted. The power plant will be increased by a 250 horse power horizon tal turbine water wheel and a 250 horse power electric generator directly con-nected with the water wheel, making

hydraulic pump which will rurnish the pressure to operate the various machines in the converter building. The blowing engine will be run by a belt from a 20 horse power alternating motor. It is of the power type, has an air cylinder 36x36 inches and has a special unloading device attached, so that when the pressure reaches a maximum of 12 pounds the valves are so arranged that they remain open and no power is consumed when open and no power is consumed when the converter is not using air. This unloading device was especially built for the Granby company, and has never been used on any low pressure blowing engine employed for converter purposes.

It was decided to pay the president and secretary-treasurer \$1,800 each annually, with travelling expenses added.

Delegate Cutting of Boston proposed a resolution prohibiting any member of the number of the number of the sum of from becoming a member of the National Guard or other military organizations. This gave rise to an animated debate. Finally the whole proposition was tabled.

Cincinnati was unanimously chosen for the convention of 1902.

The last sad riles in connection with the demise of the late Mrs. Rose took the demise of the cortege to Union, 50 strong, escorted the cortege to the Mrs. Rose took the demise of the late Mrs. Rose took the demise of the palace car running on the Nelson & Fort Sheppard and was accompanied by the public executioner armed with a Winchester. They bagged about a dozen dogs whose owners refused to settle the municipal tax.

ENT CLAIMS. -

ABSENCE OF BRITISH COLUMBIA QUESTION OF WORK ON THE ABE UNFORTUNATE DELAY IN CON- A TRAIL TO BE BUILT TO THE PLANS OF THE RAILWAY ROUTE EXTENSIVE ROBBERY ON

GRAND FORKS, Aug. 14.—(Special.) Leo Long and Thomas Clark, well-known mining men, passed through here today en route to Republic for the purpose of inspecting the Lone Pine-Surprise.

E. Charles, right of way agent of the V. V. & E. ra.lway, has nearly completed his duties in this section.

The members of the International boundary survey are now engaged east

of Cascade.

The plans of the V., V. & E. route between here and Phoenix have been submitted to the provincial lands and works department for approval. Work cannot be started until the government grants the necessary authority to cross crown lands. This permission, it is expected, will be forthcoming shortly.

Harry Donough has returned from Franklin camp, situated on the east fork of the north fork of Kettle river, about forty-five miles from Grand

One of the balls struck Layeu in the arm. Viau was in a bean dive, at the corner of Clarence and King streets, and was are immense, the formation is perfect and the values in gold, copper and silver are exceedingly high. The same applies to Gloucester and McKinley apparent reason for firing the shots.

LINDSAY, Ont., Aug. 14—R. Doherty. son's development work has shown up the claims better than ever, while new strikes have been made daily. An open crosscut twelve feet wide and sixteen feet deep on the Banner is all in ore, and the walls on either side have not been reached. This ore will average \$20 per ton. A crosscut tapping the hill at depth 250 feet distant has traversed over thirty feet of \$20 cm.

crosscut twelve feet wide and sixteen feet deep on the Banner is all in ore, and the walls on either side have not been reached. This ore will average \$20 per ton. A crosscut tapping the hill at depth 250 feet distant has traversed over thirty feet of \$8 ore. As soon as the lead is followed I have no doubt high-grade pay chutes like the surface showing will be encountered. "John Myers has opened up the Banner lead on the Bullion, the adjoining claim, by means of an eight-foot shaft. Newby, Merchant and Gamet have a bonanza in the Gloucester. They have sunk a forty-foot shaft through solid ore that would almost stand transportation by wagon. On Gloucester creek, Hill and Minion, by means of a twelve-foot surface crosscut have opened prich copper-gold lead the width of the working."
