

ART AT THE FRONT; SALTS IS FINE FOR WORK OF SOLDIERS; KIDNEYS, QUIT MEAT

Exposition of Creations of the French "Poilus" Is Truly Wonderful.

French Front, Nov. 17.—(Correspondence of The Associated Press.)—An exposition of Art at the Front composed of the creations of soldiers of the French army now on view at Compiègne includes contributions from every branch of the service. Pictures in oils and water colors, colored crayons and pencil, charcoal and burnt wood are displayed side by side with statuettes carved out of chalk or soft stone or modelled in plaster colors to represent nature. Metal objects made of shell cases, hammered in beautiful designs to form flower holders and lamps, and splinters of steel shells made into paper weights and inkstands, rifle cartridges transformed into pen and pencil holders, paper cutters, thumbtacks, and other useful things, fuses made into finger and napkin rings, fancy work baskets fashioned out of the long wicker cases in which loaded projectiles for the big guns are conveyed to the firing line—all give evidence that art goes together with war.

Many of the pictures exhibit a strength which can never be found in any accidental salon. They all represent objects of actuality as seen by the men themselves and reproduced in such a way as to bring home to those who see them the conditions under which the soldiers live in face of the enemy. There is no idealism or fantasy in the men's work—all is realism. This, however, does not prevent many of the artists from portraying humor in its broadest sense, for the soldier in the field is very keen on the comic side, and some of the caricatures are excellent. Few people have had the opportunity of seeing the exposition, owing to the difficulty of reaching Compiègne under the restrictions of war time, but arrangements have been made for the transfer of the collection to Paris and possibly later to America. It is probable that the work of the soldiers of other French armies will be joined together with this exhibit.

The soldier-artists are content with very small recompense for their work. They have given them up in order to provide themselves with a few small comforts during the coming winter, on condition that purchasers make a contribution towards the assistance of their wounded and invalid comrades.

There are works by winners of the Prize of Rome of the French Academy who were mobilized while pursuing their studies and some of these in later years may come to be regarded as masterpieces.

Flush the Kidneys at Once when Back Hurts or Bladder Others—Meat forms uric acid.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage, or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a teaspoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complications.

VILLISTAS IN AMERICAN CAMP

Many Followers of Mexican Bandit Are Friendly to "Gringos."

(Associated Press) Field Headquarters, American Punitive Expedition, Mexico, Nov. 17.—Followers of Francisco Villa have been discovered in headquarters camp. Thus far, none has been molested, nor placed in the stockade with the score captured during the southward drive of the Punitive Expedition. They go about the camp openly and even receive American gold, at the rate of about a dollar a day, which is wealth for a peon.

These Villistas, however, harbor no evil designs against the American troops. Neither do they talk about their affiliations with the bandit leader. For they now are pacific and declare that half of the peon people of the southern republic would do just as they are doing, work in a desultory fashion for the army of the north, if given an opportunity.

But few of the laborers stay long in camp. Their fear of Villa is too great. The threat Villa has made to kill every man and woman who turns a hand for the "invaders," strikes a chill to their hearts.

MUSHROOMS HIGH

(Associated Press) Berlin, Nov. 17.—For an explainable reason except speculation mushrooms have soared in price to such a height that the authorities are being called on to step in, establish maximum prices, or take some similar measure to keep them within reach of the common people. This season mushrooms are so plentiful that the price paid by the wholesaler to those who gather them ranges from 30 to 40 pfennigs a pound. Even at this low rate, families during the summer made from 80 to 100 marks a day by making excursions into the country and picking up many mushrooms as they could carry.

MANY WOMEN EMPLOYED

(Associated Press) Berlin, Nov. 17.—According to the official municipal insurance bureau, the number of women now employed industrially has advanced to 47.5 per cent. of all workers, as against 26.8 per cent. a little over thirty years ago. It rose from 24.5 per cent. in 1907, an average year, to 26.3 in 1914, to 42.2 in 1915, and to 47.5 in 1916. Whereas the number of women now at work almost exactly equals the number of men, in some industries female help far outweighs numerically male help. This is especially the case in the textile and the paper industries. Though the excess of women employment seems in no manner to have lessened the number of women who are now offering their services.

TAKE THIS WITH A GRAIN OF SALT

(Associated Press) Washington, Nov. 17.—Saline matter in the ocean is estimated at a little more than 4,800,000 cubic miles which, according to the United States Geological Survey, is enough to cover the entire surface of the United States to a depth of 8,500 feet.

Alfred M. Reeves, aged 37, a barber of Morgantown, W. Va., was instantly killed when a shotgun he was loading was accidentally discharged, the shot striking him in the face.

When 16-year-old Howard Walter, of Bloomsburg, Pa., saw a rabbit he fired directly into the open mouth of his cousin, Russell, son of C. H. Walter, of Bloomsburg, and the boy will likely die.

Get the Habit of Drinking Hot Water Before Breakfast

Says we can't look our right with the system full of poisons.

Eat Less Meat If You Feel Backache or Have Bladder Trouble—Salts Fine for Kidneys.

Meat forms uric acid, which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kidneys occasionally. You must relieve them like you relieve your bowels; removing all the acids, waste and poison, else you feel a dull misery in the kidney region, sharp pains in the back or sick headaches, dizziness, your stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging you to get up two or three times during the night.

To neutralize these irritating acids and flush out the body's wastes, get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine and bladder disorders disappear. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive; harmless and makes a delightful effervescent lithia-water drink, which millions of men and women take now, and then, thus avoiding serious kidney and bladder diseases.

CHOLERA IN JAPAN

(Associated Press) Tokyo, Nov. 17.—Although cool weather has brought a decrease of cholera in the malady continues to spread at Osaka. Up to October 16th the cases at Tokyo had reached 548; at Osaka the total was 2,001, with an increase of twenty daily.

At Tokyo there have been 151 deaths. The authorities believe that cholera at Tokyo is the epidemic will be entirely wiped out here. No foreigner has been attacked by the disease, so far as is known. The spread of cholera to Korea has had a serious economic effect there as the authorities have prohibited fishing in a zone extending along 200 miles of coast. Cholera is believed by many physicians to be easily circulated from fish tissue and the fishermen of Korea are said to have failed to comply with sanitary measures ordered by the health department. Some 270,000 fishermen, commanding 40,000 boats, are thus thrown out of work at the most fruitful fishing period of the year. Fearful of fish as a microbe carrier has reduced the consumption of fish throughout the Japanese Empire and as fish, next to rice, is the chief food of the people the ban placed upon it has caused misery among both fishermen and distributor.

Five companies of the South Carolina Coast Artillery are at Anderson, S.C., to prevent disorders in connection with the strike of textile mill operators. Dr. Percival Lowell, astronomer, who asserted his belief that Mars was inhabited, died at Flagstaff, Ariz., where he had established an observatory.

FAVOR PROPOSALS OF RUNCIMAN

His Solution of Food Problems Is Met With General Approval.

(By Courier Leased Wire.) London, Nov. 16.—The speech of Walter Runciman, president of the Board of Trade, in parliament yesterday outlining the government's proposal for dealing with all parts of problems was welcomed in all parts of the House, Sir Edward Carson, on behalf of the opposition and George J. Wardle, for the Laborites, agreed that the House was ready to grant the power asked without the formality of a bill. The debate on the resolution of William Hewins, Unionist member from Hereford, declaring that it was the duty of the government to adopt further methods of organization, to increase and conserve the national food supply, was not concluded when the House adjourned. It is understood that Premier Asquith will make a statement next week in regard to the appointment of a food controller.

To Remove Dandruff

Get a 25-cent bottle of Dandering at any drug store, pour a little into your hand and rub well into the scalp with the finger tips. By morning most, if not all, of this awful scurf will have disappeared. Two or three applications will destroy every bit of dandruff; stop scalp itching and falling hair.

BOMBARDMENT OF APADAU

(By Courier Leased Wire.) Rome, Nov. 16.—via Paris, Nov. 16.—Pope Benedict has sent a strong protest to Austria in connection with the aerial bombardment of Apadau. AMBASSADOR DEAD. (By Courier Leased Wire.) Amsterdam, via London, Nov. 16.—A despatch from Vienna says the German ambassador to Austria, Count Tschirsky and Bogendorff, died suddenly Wednesday afternoon from a minor operation performed a fortnight ago for an internal disease from which he had suffered for a long time. Count Tschirsky has some times been called "the man who caused the war."

WOMEN'S INSTITUTE

The Cainsville Branch of the Women's Institute held its regular monthly meeting on Tuesday afternoon, November 7th at the home of Mrs. Nelson Ramey, there being a good number of ladies present. Mrs. Ross, the president, had charge. The meeting was opened in the usual way. The president made the announcement that one hundred dollars had been raised to help buy the Field Ambulance for the 215th battalion, it being the full amount of their share. It was decided to spend twenty dollars in yarn and the ladies were present and gave a most earnest and touching address. Mrs. Secord of Brantford, also addressed the meeting along the lines of "Equal Rights" showing the necessity and the benefits of such a world-wide movement. A great many signed their names to the Women's Suffrage petition, which is being sent to the government. A most profitable meeting was closed by all singing the National Anthem.

STOP CATARRH OPEN NOS TRILLS AND HEAD

Says Cream Applied in Nostrils Relieves Bad Colds and Cures. If your nostrils are sore and your head is stuffed, if you sneeze and feel uneasy and if you have a cold, get a small bottle of Eucalyptol at any drug store. It is a natural product of the Eucalyptus tree and it penetrates through every passage of your head, soothing and healing the inflamed, swollen mucous membrane and giving instant relief. Ah! how good it feels! Your nostrils are open, your head is clear, no more hawking, sneezing, or pinching for breath. Eucalyptol is what sufferers from colds and catarrh need. It is a natural product.

New Gloves, Collars, Ties, Shirts for Men and Boys. Men's Odd Pants, extra values at \$1.50, \$2.25, \$2.75 and \$3.50. Come by early. The assortment is better and prices lower than they will be later on.

R. T. Whitlock & Co. The Men's and Boys' Clothing Store, Temple Buildings, Two Doors East of G.P.O.

Frank Boyder, 18, met death in frightful form at Lebanon, Pa., when he was caught in the loop of a bar of white-hot iron and both of his legs sawed off by the bar as it flashed through the rolls of the seven-inch mill at the Lebanon Valley Iron and Steel Co's plant, in Hebron. A turpentine bath, which he said his wife gave him, featured the funeral of Rev. John E. Triplett, a Presbyterian minister, of Woodbury, N.J., who is suing his wife, Mrs. Dorothy N. Triplett, for divorce. The minister testified that his wife poured the turpentine down his collar as he was leaning over.

Rubber Actually Drops In Price While Everything Else Goes Up

How British Government's Foresight Saves Canadians Millions of Dollars. It Pays to Protect Expensive Shoes by Wearing Rubbers and Overshoes Which Cost So Little.

Rubbers have not gone up in price because, though labor costs more and the cotton and chemicals used in their manufacture have increased 50% to 100%, the rubber itself actually costs less. Up till about 1908, the rubber forests of South America and Africa, producing about 60,000 tons a year, easily supplied the demand, and rubber sold at \$1.00 to \$1.30 a pound. But when motor cars began to multiply, and the use of rubber belting, hose, footwear and a hundred other things kept on increasing, the consumption of rubber grew phenomenally, quickly exceeding the supply. By 1910 raw rubber had gone up to \$3.00 a pound and rubber goods of all kinds kept pace. Probably you remember paying excessive prices for rubbers for a year or two.

In this alarming situation relief came—not as the World expected, from synthetic rubber invented by German chemists—but from plantation rubber grown in Ceylon, Sumatra and the Malay States, with the encouragement and aid of an Empire-building British Government. These plantations, begun several years earlier, came into the market in 1910 with 5,200 tons—11% of the World's supply. By 1914, when the war broke out, they were producing 60% of the total—and controlled the situation.

Then, with a practical monopoly of raw rubber and absolute control of the seas, Great Britain was in a position to supply the enormous war requirements of the Allies and to cut the Teutons off completely. This, of course, she has done, but, instead of chasing the rest of the world high prices, the British Government actually lowered the price to less than 70 cents a pound—a figure below that asked before the war.

This means a substantial saving to every man, woman and family in Canada—a saving doubly important on account of the 80% advance in the cost of shoe leather. It means that a pair of rubbers, costing from 75 cents to \$1.25, will practically double the life of a pair of shoes, costing five to ten times as much. Under these conditions it certainly pays to have a pair of rubbers to fit every pair of shoes, heavy as well as light, worn by every member of the family—for nothing rots and destroys even the most expensive shoes like wearing them in bad weather without rubbers.

Besides the saving of money and the invaluable protection to health, wearing rubbers helps to win the war. The soldiers MUST have leather in vast quantities for shoes and equipment—and it is getting scarcer all the time. So every pair of boots we save releases leather for military use and is but a fair return to the British Government, whose foresight and fairness have made our rubbers so cheap.
