

### Willie's New Scheme for Sawing Wood

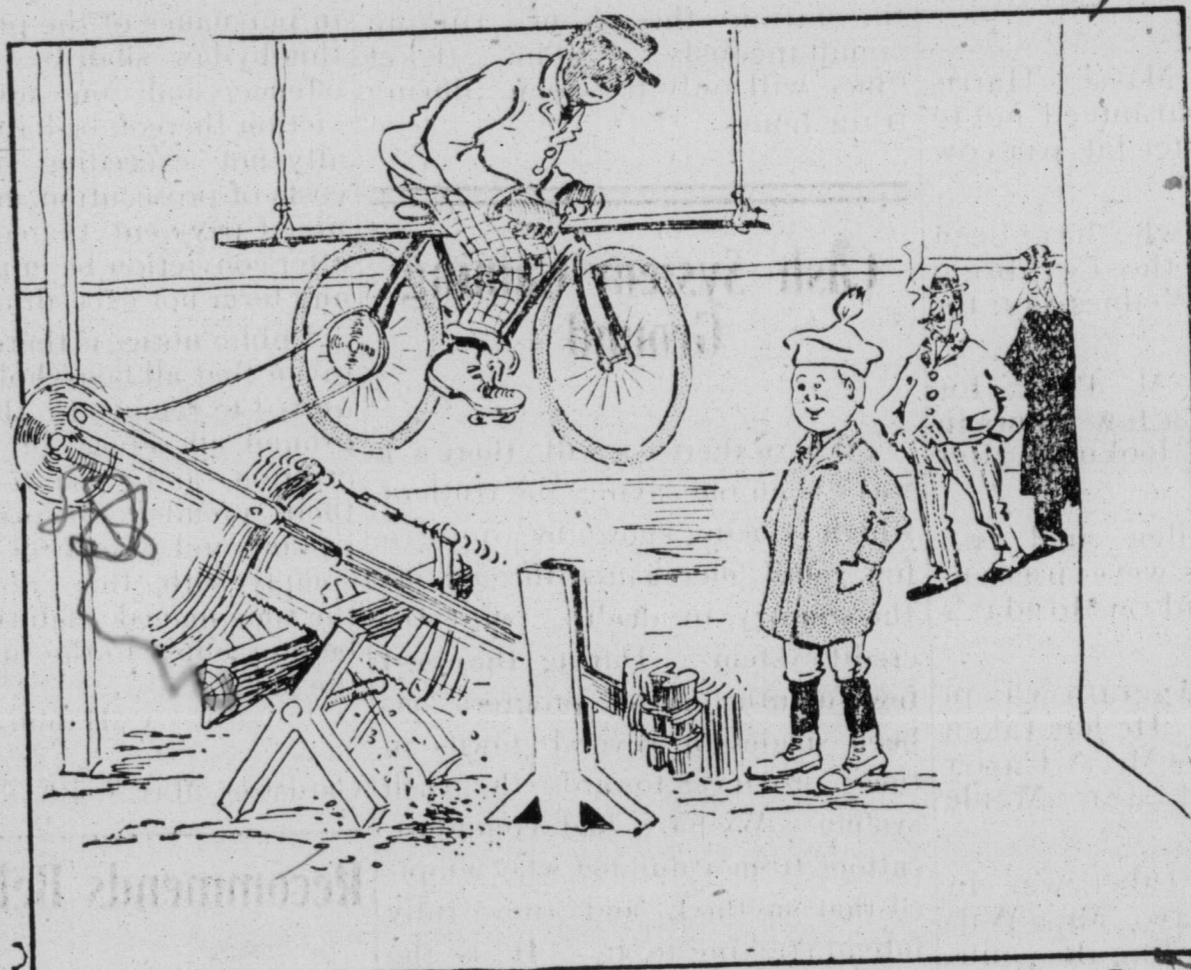

Dear Tommy:—Papa got a cord of hickory wood to burn in the fire-place, and Jim had to saw it.

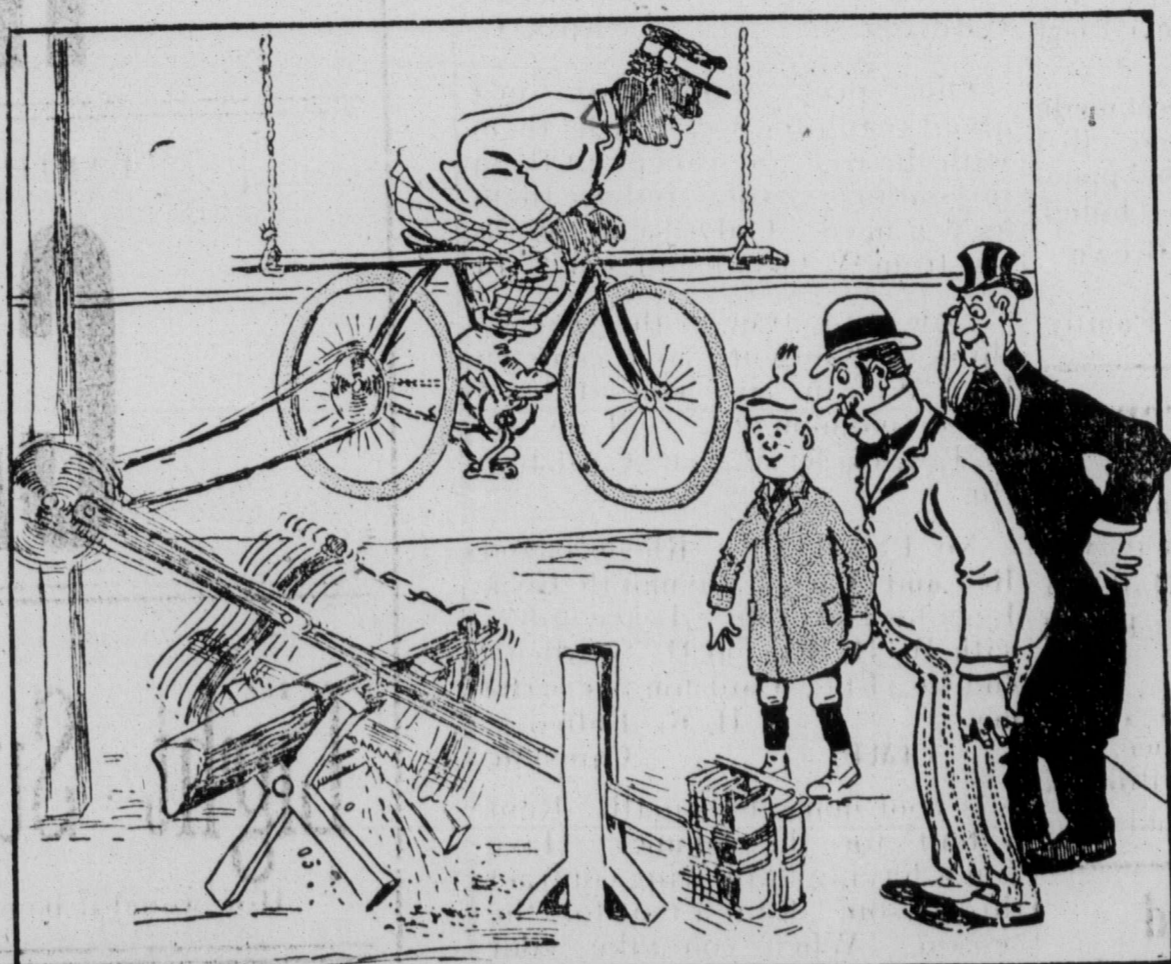

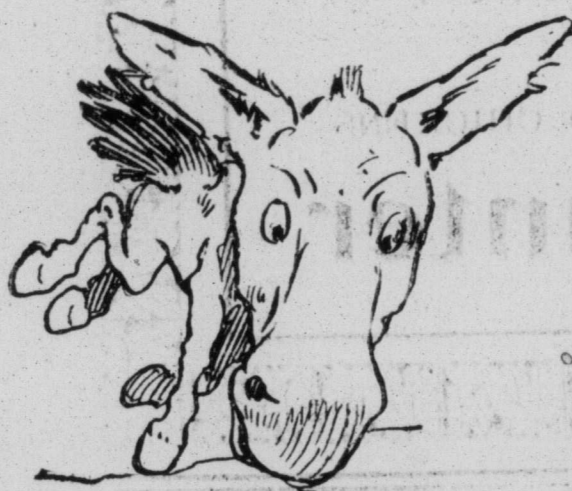

It's awful hard work, so I rigged up a scheme like this diagram.

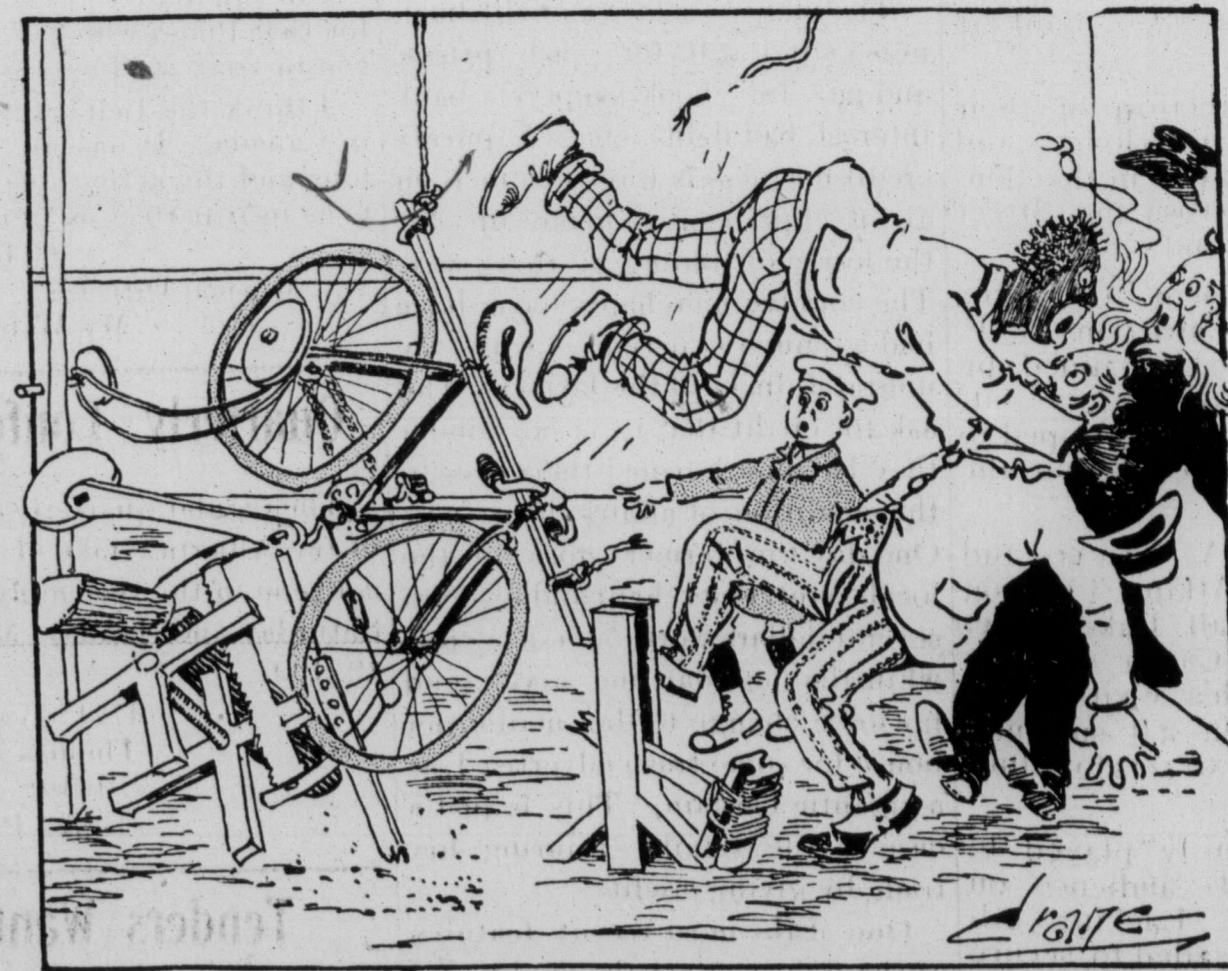

I tried it first. It wasn't like work at all. It was fun.

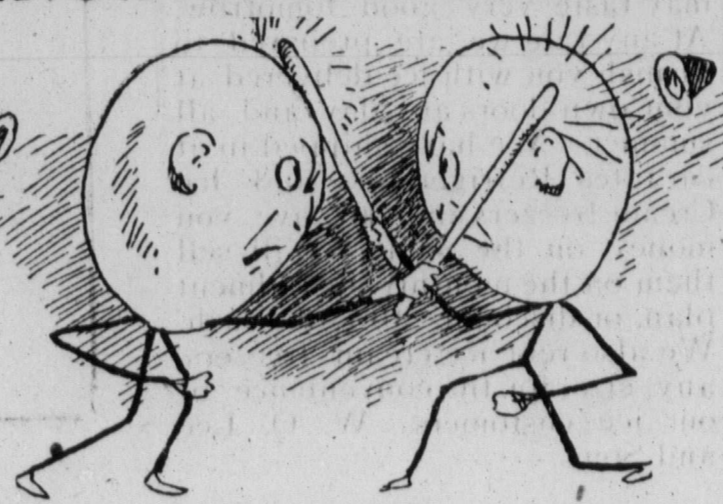

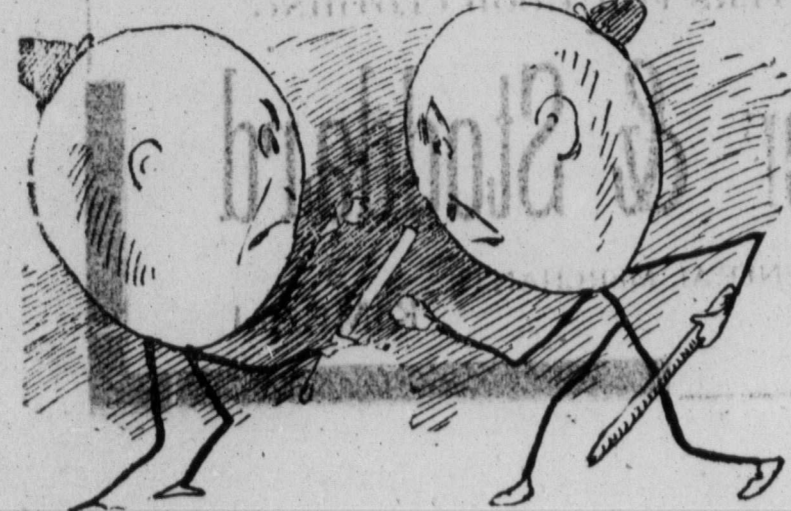

Then Jim climbed up on the wheel and was just starting when Papa and the Minister came along.

Jim liked the sport and started to scorch, but just then the forward rope broke—

And down came Jim on top of Papa and the Minister. Nobody was hurt very much, but they all got mad. Yours, WILLIE.
