THURSDAY, AUGUST 19, 1908

AN ANNUAL CONTRIBUTION TO IMPERIAL DEFENCE.

nor the fortresses that line its bound aries nor the troops that manoeuvre a numerous population, with intelligence and national spirit, and in pros perous conditions, they will find of make the means of defending them selves when they are convinced such are needed ar advisable. The money Canada spends in inducing immi grants to come here is a steady and substantial contribution to the cause of Imperial defence. It is admitted by the war lords of Britain that the present white population of the Empire is insufficient to properly ensurits defence under all possible, or ever all liable, combinations that may come against us. At present we have be tween fifty five and sixty millions o whites within the bounds of the Mother Land and the other over-se Dominions. It is calculated by My Haldane that one hundred millions are needed to constitute the basis for proper desence. Under these conditions, and the argument seems to b a reasonable one, it is surely of the highest type of patriotic service to induce people in the over-crowded portions of the Empire to move out where the possibilities of producing wealth are greater-for the long purse is all guns. And under our circumstances it is better placed. Money spent for a battleship or a fort is gone forever. For it we have the defensive power of the ship or the fortress for a limit ed number of years. It has no earnfrom which armaments are drawn; to cern clearly the difference between fifty years her existence has never getting a large number of people into the two modes f taxation, and the been imperilled; even her status their interest conjoin in making them defenders and upholders of the country, and where they have the means fact that the four recent bye-elections and upholders of the country, and where they have the means fact that the four recent bye-elections and upholders of the country, and where they have the means fact that the four recent bye-elections and upholders of the country, and where they have the means fact that the four recent bye-elections and upholders of the country, and where they have the means fact that the four recent bye-elections are the rowers has never almong the rowers has never been really threatened. Much of the credit for this belongs to the fleet and the credit for this belongs to the army, but more of it belongs to age each year for inducing immigrants localities. of the classes needed to bring our land ships and forts. But it is going a ough education of The coming of the whole question. The coming of sive means must be small, but who time it takes place, the pleas working on the tremendous resources That they will do both is amply attested by the character of the immireturning Canadians who went abroad time is on the side of the Liberals. years ago when things were not prosperous in their own country.
