BRANCH OFFICES: Montreal and Maritime Provinces—A. McKim

London, Tuesday, June 24.

THE worst blow which the polygamists of Utah have yet sustained is the passage of a bill by Congress providing that all funds or property lately belonging to the Mormon Church shall be devoted to the use and benefit of common schools in that State. With their religious endowments gone, the work of the elders in the Endowment House should speedily show a vast de-

THE Dominion Government has created another batch of Queen's counsel. The title is conferred in this instance mainly on gentlemen practicing law in the Maritime Provinces. These Ottawa-created Q. C.s. will feel mighty small by and bye if, as is expected, the courts decide that they must play second fiddle and take a back seat when the Provincial Q. C.s put in appear

Mr. Mowar's serious consideration is entirely occupied these days with the reconstruction of his Cabinet. Every Grim member of the Legislature is a born Cabinet Minister, and the little man is puzzied by a surplus of material.—[Berlin News.]

It is better to have plenty and to spare these to the in progress.

than to sit in poverty. Mr. Meredith is not bothered just now looking for Cabinet material, but if the people of Ontario had asked him to take Mr. Mowat's place no could have alleged that he was beset with a surplus of men able to be Cabinet

IT is hard to curtail an interchange of currency between two English-speaking nations that find it profitable to trade with each other, even when the banks put their foot down on the system. The Northwest banks have refused to accept United States silver, except at a big discount, but nearly every retail merchant in Winnipeg con-tinues to take the coin at par. When the money becomes too plentiful, it will be sent to St. Paul and exchanged at little expense.

AT THE recent annual meeting of Mer hant's Bank shareholders, General Manage

The crop of cereals in many parts of Canada was considerably below the average. A short supply ought to bring about better prices. But it is not the crop of Canada that determines the price of cereals. It is the crops of the world. Our farmers, then, for a diminished crop, get a range of low prices.

Mr. Hague is a sound political economis as well as an experienced financier. He cannot be deceived by the statement that ninion tariffs on agricultural products can add to the income of the farming population. The only way in which the farmer of Canada can be helped is by a reduction of the taxes upon the necessaries of life which he has to buy.

GENERAL MIDDLETON apparently cares little for the censure of Parliament so long as the Ottawa Government stands by him. Talking to a reporter on the subject he re-cently said the report that Sir Adolphe cently said the report that Sir Adolphe Caron had requested him to resign because of his being found guilty of looting furs during the Northwest expedition was utterly untrue. With emphasis he added: "In fact I am and always have been on the best of terms with the Minister of Militia. best of terms with the infinister of an armoney.

I have not been ordered to pay this money or resign, consequently I have not refused to do either." That settles it. What matters Parliamentary censure if the individual censured is not compelled to make

IF THE Australian colonies are confederated, as now seems probable, another strong power, built up by the determination of the English-speaking race at the Antipodes, will exist. It is interesting therefore to note the statistics of estimated population in the seven colonies at the close of last year. The following table gives the result at a

DROWNED-OUT MILITIA.

the participants in the annual drill, for pneumonia and dysentery generally follow such a "drowning out" as that which took place at the Strathroy camp on Saturday. On the London camp ground, no trouble of this nature has ever been experienced. The fact is the camp here can be and has been so arranged that flooding and its incident al nfort is out of the question, let the rain fall as heavily and for as long a period as it may. Moreover, it is impossible for Londoners to forget that the taking of the camp to Stratford is in breach of solemn promises by Mr. Carling and his friends at the time when the city agreed to purchase the Carling farm for military purposes. Then it was held out as an inducement to the citizens to close the deal that the camp would be held here always. It was shown, which is a fact, that London is really the center of the military district, and therefore in point of convenience the best place in which to hold the camp. No one for a moment imagined that the Ottawa authorities would so soon be guilty of a breach of faith, especially in view of the great incidental discomfort which the change entails on the force participating. It is a shame to compel men to camp in a swampy hole like that at Stratford while the excellent camping ground here is available, and the chief officers unanimously favor it.

FLEEING FROM "PROTECTION." A cablegram from London says that the ritish Government, in reply to a question in Parliament, has declared that nothing can be done to protect British tailors against contract labor imported from Germany. "This competition," it is added, "is felt very keenly by British workingmen, not only in the tailoring, but in other branches of trade, and there appears to be no law to What have we here? The statement that

ailors and other tradesmen from Germany, These Ottawa-created Q. C.s high tax, protectionist Germany, find it profitable to flock into poor, free trade Great Britain to work!

Here is a state of affairs which our Can

adian high-tax advocates will find it hard to explain. If their contention—that high taxation adds to the wages of working-menholds good, the German tailors would have big wages, and the British poor pay, the Germans would stay at home and enjoy their good wages, and the British workmen would cross the channel to enjoy the fruits f protection. As the contrary is the case, and the

British workman is much better paid and has shorter hours of labor than his fellowworkers in Germany, so much so, that large umbers of Germans annually go to Britain for employment, it is easy to reach the conclusion that it is not the high-tax policy which keeps wages higher on this side of the Atlantic than in the old world. It is the enlarged opporunities which the vacant lands afford people that makes the difference. But to admit that, even with such evidence as contained in the cablegram here given, rould knock a serious hole in the argumen of the monopoly organs. They will still continue to circulate the fiction, but surely

no intelligent man will be deluded by it. ONTARIO AGRICULTURAL COL-

We have received from President Mills copy of the 15th annual report of the On-tario Agricultural College and Experimental Farm at Guelph. It covers 204 pages, is mbellished with a cut of the main building and contains a very complete record of the work of the institution during 1889.

work of the institution during 1889.

"A appecial and determined effort," says the President. "has been made during the year to clean size farm of noxious weeds, which have four the control of the cont ment in the appearance and outside man agement of the farm the Province generally

will be pleased to learn.

Details are given of the course of study, etc., and of all the field experimental work with grains, etc., carried on under the direction of Prof. Shaw and Mr. C. A. Zavitz. The chief points in reference to the grains were published in the ADVERTISER last fall. Farmers who desire the complete data should send to President Mills for a copy of this report. In the dairy, horticul-tural, chemical, botanical and other departments a great deal of important work was carried on. Under the heading, "Live Stock," President Mills says:

Stock," President Mills says:

We have not imported either sheep or cattle to take the place of those which were sold after the fire, but have endeavored to buy suitable animals. Professor Shaw and Mr. John I. Hosen heef breeds—Shorthorns, Herefords, Aberdeen-Angus Polls, Galloways and Devons. They completed their work some time since, and the animals selected are now in our stables for experimental and aducational work. In addition to these, Professor Shaw bought four Jerseys and two Ayrshires some meaths ago; and J. W. Robertson, our professor of the more Ayrshires and suitable samples of the Holstein breed.

With regard to the above the number

With regard to the above the number and values of animals, classified by breeds appears elsewhere in the report. It would have been an improvement had the names have been an improvement had the names been given of persons from whom the stock was purchased, the herd book numbers in case of pure breds, and the name of sire and dam. Of pure breds there were at the time the report was tabulated: 8 Shorthorns, 5 Jerseys, 4 Aberdeen-Angus, 3 Galloways, 3 Harsfords, 2 Halstoins, 2 Aventing, 2

DROWNED-OUT MILITIA.

The volunteers in camp at Stratford have been compelled to pay the penalty of the stupidity of the Minister of Militia and his advisers in this locality. The camp has been deluged with rain, and owing to the situation of the ground there has been, as a local paper puts it, miniature lakes in the tents, setting the moveable articles afloat, and drenching the unfortunate citizen and drenching the unfortunate citizen and drenching the moveable articles afloat, and drenching the unfortunate citizen and drenching the purchased males none appear to have been purchased soldiers.

If Ministers Caron and Carling had that reach any higher than one-sixth the If Ministers Caron and Carling had that reach any higher than one-sixth the taken the advice of the commanding officer for the district and of the medical officers who usually attend camp, officers who usually attend camp, they would have refused to change the lost of the camp from this city. The sation of the camp from this city.

selected? If not, grave injustice may be done at this public institution

farmers visit and young men are trained in agriculture. In comparative tests also the necessity for even representation, as far as possible, is obvious. In fact the strictest mpartiality in the adjustment of all condi tions in experimental work and the greates accuracy are indispensable f the results

the institution are to carry weight with the farming community. The reading farmer lowadays wants to know the why and the wherefore and the bed rock facts ever when the statement is made by one who writes "Prof." before his name and this implies no disrespect to the latter. Throughout Ontario, of course, the Shorthorns are the most widely known breed of cattle, but others are spreading rapidly and surely that the Shorthorns need any odds at the institution.

One of the evidences of special activity at

ing of a monthly paper, the "O. A. C. Re riew," a publication to which the president gives a word of favorable comment. The attendance of students in 1889 was a little larger than in 1888, the total number on the roll being 134, more than 70 per cent. being from this Province. Thirty-one counties of Ontario were represented and the largest representation was from Grey Leeds, Prince Edward, York and Middle sex. Not a few students came all the way

Deducting the college revenue of \$6,570 45, he net cash expenditure of the college during the year was \$23,382 51, leaving an unexpended balance of \$3,552 49 over the sum voted by the Legislature. The total net expenditure for the maintenance of the farm proper in 1889 (less revenue \$1,659 62) was \$13,681 64; experiments, \$4,321 63; garden, lawn, etc., \$2,991 84; instruction \$1,214 73; or a grand total of \$45,592 35. The expenditure on capital account was \$2,236 93, also considerably less than the Legislature voted. This is a satisfactory

showing.

The President asks for a convocation hall and gymnasium, new green and propagating houses, a house for the professor of chemistry and a house for the professor natural history. Taken all in all, the college never issued

a better report than the present, and it is to be hoped that many of our farm readers will be able to secure copies of it.

"About two years ago, after suffering for nearly two years from rheumatic gout, being able to walk only with great discomfort, and having tried various remedies, including mineral waters, without relief, I saw by an advertisement in a Chicago paper that a man had been relieved of this distressing complaint, after long suffering, by taking Ayer's Sarsaparilla. I then decided to make a trial of this medicine, and took it regularly for eight months, and am pleased to state that it has effected a complete cure. I have since had no return of the disease."—Mrs. R. Irving Dodge, 110 West 125th st., New York.

"One year ago I was taken ill with testimony:-

ANOTHER RAPID CURE!

For years my right lung caused me great anxiety, trouble and expense. Finally my physician advised my immediate removal to a warm climate, otherwise, he said, I would die of CONSUMPTION! It was not possible for my husbard to remove South, and for a while I lingered undecided what to do, but I grew so weak and emaciated that I finally called, about a year ago, on Dr. James P. Campbell. I was then taking Cod Liver Oil Emulsion, but to na curative end. Dr. C. advised me to continue the oil and to take three of Dr. Campbell'd Arsenic Wafers five minutes after each dose of oil. I carried out this treatment for six months, at the end of which time I had ENTIRELY regained my health, strength and flesh and versince my lungs have been perfectly sound and healthy, as any one may see for themselves by calling on me.

MRS. M. SMITH, 187 West 80th St., New York.

AT DEATH'S DOOR! JAMESBURG, N. J., April 2, 1890.

JAMESBURG, N. J., April 2, 1890.

DR. JAS. P. CAMPBELL.
220 SINTA Avenue, New York,
DEAR SIR.—You are indeed a public benefactor. But for your InvALUABLE Preparation of ARRENIC in the form of CAMPBELL'S WAFERS I verily believe that "my time here would have been short." Following frequent exposure to inclement weather while absent from home, a racking cough, profuse expectoration, pain in eft side and exhausting night sweats harassed me continually. On my return I requested my family physician to give me his candid opinion as to my condition. He said that hasty consumprion had a firm grip on me, and that nothing but cool Liver oil and Arsenic would saye me, He prescribed Norwegian Oil and Liquor Arsenicalis (Fowler's Solution), which in three days landed me in Bed. Next he prepared an EMULSION of Arsenic and Cod Liver Oil, but I could not swallow the nauseating compound. Then as my stomach would not lolerate the Arsenic, he said, "Stick to the oil alone," which I did, but regained neither health, strength nor appetite. One day I read in the New York World of the case of Mrs. John Sibley. who took CAMPBELLS ARBENIO WAFERS in conjunction with Was ENTIRELY CURED. I sent to your office for three boxes of your wafers and commenced. Cod Liver Oil, and in a to your office for three boxes of your wafers and commenced by taking two, half an hour after each dose of oil. As no nausea followed, I increased to three and later to four wafers the crimes a day. In ten days I realized that this combination of remedies "worked like a charm" and that the progress of the disease was at least stayed. My appetite and strongth improved daily, my color was natural and in two months I was able to resume much an metricy recovered and am again well anour efficiency called several times at John kentry. I have called several times at John kentry. I have to the companion of the control of the co

Above letters and numerous others to the me effect can be seen at depot. Above letters and numerous others to the same effect can be seen at depot.

In advocating the introduction of the above wonderfully CURATIVE system of treating Pulmonary Consumption. Pr. Campbell is simply among the most advanced clinical practice william Gull, of London, and Drs. Gepmain, Sec, Lafage, Labord, Robin and others, of Paris. Indeed, it is the RECOGNIZED treatment in all the great French hospitals, as the Hotel Dieu, Le Beaujon, Le Charite and the different naval and military hospitals, and with results the most ASTOUNDING. The great objection to this method of treatment has been the difficulty of so preparing the Arsenic, as to be loss of Fensive and delicate stomaches. In actual combination with Oil or Emulsion, Arsenic makes so nauscating a mixture, as to be less of Fensive to the majority fortunately end for Campbell, which never derange bell elaims this combined treatment of Campbell' Arsenic Wafers with Cod Liver Oil, pure, or with Cod Liver Oil Emulsion, RADICALLY CURES CONSUMPTION.

HOW THE WAFERS ACT Not only by arousing all the powers of the body through Increased Nutrition, but by CAMPBELI'S ARSENIC WAFERS acting also as a PARASITICIDE, "destroying the MICROBES," which according to the researchers of Koch and other eminent pathologists are the undoubted CAUSE OF CONSUMPTION!

To Sufferens! ATA pamphlet giving a more extended outline of this most efficient known mode of treatment and CURES for PULMONARY CONSUMPTION, with full mame and address of invalids literally "SNATCHED from the GRAVE," will be forwarded to any address on receipt of postage, only 2c stamp.
