

HIBBEN BLOCK IS DESTROYED

New Building on Government Street Gutted by Fire Last Evening—Estimated Loss \$75,000

\$17,000 NOT COVERED BY THE INSURANCE

Pioneers' Association Loses Irreplaceable Records and Pictures—Several Tenants are Burned Out

Completely gutted by a fire which is believed to have originated from the furnace in the basement, the Hibben block, Government street, opposite the new street, was for the second time within three years a scene of a serious blaze yesterday afternoon. Within two hours and a half the flames had completely swept through the premises, the only portion not touched being about a third of the first floor at the front on the Government street side. The loss, according to figures secured last night, will approximate \$75,000. The heaviest losses will be those of the Pioneer's Association, stationers and bookbinders, who own the premises. Their stock, a portion of which had just been installed for the Christmas trade, is valued at about \$40,000, on which about \$28,000 insurance was carried. Little was saved, the portion not burnt being ruined by the smoke and the water. The building is valued at \$35,000, on which about \$30,000 insurance was carried. Two years ago the firm spent \$20,000 in extensive additions at the rear, on Langley street.

On the ground floor was also located the cutter and sporting goods establishment of H. & H. A. Fox, which, in addition to the fire loss at the rear, was flooded. The stock of the concern was valued at \$3,000 on which insurance to the amount of \$1,500 was carried. A portion of this stock, however, was carried out before the premises became airtight.

The loss to the occupants of the two upper floors will not be large in the aggregate, being composed of office fixtures, etc., and probably \$5,000, which would cover the entire damage, well covered by insurance.

Wind Fans Flames

Fanned by the strong northeast wind the flames, once they reached headway, swept through the building in remarkably quick time and once they burst through the roof it was apparent the building was doing a terrific work of the fire department, supplemented by the fire walls on the north and south sides, confined the flames to the building proper. Adjoining premises suffered no fire loss and but little damage was done by smoke or water. With the high wind the fire brigade is undergoing the work of the brigade it was fortunate that the fire was confined as it was. The firemen worked like Trojans and despite the climatic handicaps did excellent work.

The blaze was first noticed by Mr. Bonar Law, son of Mr. W. H. Bonar, of the firm of Hibben & Company. Smoke was seen issuing through the floor in the westerly half of the building just downstairs to find the basement full of smoke. An alarm was promptly sent out at 12 o'clock, the headquarters at 12:05 and that from No. 3 responding. When the department arrived smoke was belching in volumes from the trap door in the sidewalk on Government street and from the doorway. Four lines of hose were used and in three-quarters of an hour the cellar was flooded. Fire Chief Thomas Davis believed he had got the blaze under control when the reflection of flames upon the windows on the second floor indicated that the fire had taken its way up a light well, confined only by glass panes, from the basement through the Hibben store igniting the premises above. A second alarm at 12:05 o'clock called out the entire department, and by the time it arrived the whole rear half of the building was seething flames which soon burst through the roof. Three engines supplemented the five streams from the hydrants. The salt water high pressure system, new pumps for which have just been installed, was brought into service. The steam pump was first operated but the pressure was limited to 100 pounds. When the second electric alarm was sent in the general alarm was brought into action and the fire was brought under control throughout the fire hydrant pressure on the hose was limited particularly at the beginning of the blaze.

New Apparatus in Action

For the first time the new fire truck and aerial water tower was brought into play and proved its worth through the slippery pavement and the overhead wires rendered the work of erecting the big ladder a hard task. The blaze had little of the spectacular about it, but large crowds kept back by the police lines faced the cold and stormy weather and stayed until the last minute braving the bad effects.

McNAMARA CASE

Twisted Iron and Pictures of Debris to Figure in Trial at Los Angeles—Contrary Theories

LOS ANGELES, Cal., Nov. 11.—Masses of twisted iron and photographs of great girders will play an important part in the McNamara murder trial in determining the cause of the explosion and fire which wrecked the Los Angeles Times building a year ago with a loss of 21 lives. Whether James B. McNamara, through the use of dynamite, brought about these deaths, will be largely a question of expert testimony, added to the common sense of jurors, it was said today. The defence, it became known, would seek to show that the big steel plates were twisted out of shape by a fire, and by fire alone. Dynamite, it is contended, would tend and not warp the beams, provided the charge was large enough to do material damage anywhere. The position of the steel in the basement, it is contended, is being guarded carefully, but it is said that the theory that a moderate explosion of dynamite ignited a store of gas liberated by a purposely broken pipe, causing the great disaster, may be followed.

Officials of the state's attorney's office declined to discuss reports from Cincinnati of the location of a cache of dynamite by George Eckhoff, a citizen. Jurors and salesmen returned late today from a long automobile ride through the orange belt. They will be given another outing tomorrow.

Resigns As C. P. R. Counsel

CALGARY, Alb., Nov. 11.—R. B. Bennett resigned today as C. P. R. counsel for Alberta. The announcement was made today. Senator Lougheed, his successor, also severs all connection with the C. P. R.

MR. LAW CHOSEN TO LEAD PARTY

Will be Named as Mr. Balfour's Successor at Unionist Meeting to be Held on Monday Next

LONDON, Nov. 10.—At a meeting to be held at the Carlton club on Monday, Walter Hume Long will propose, and Austin Chamberlain will second, the nomination of Andrew Bonar Law as the leader of the Unionist party in the House of Commons, to succeed Arthur J. Balfour.

Mr. Law's election is assured, and the leadership of the party will be placed in the hands of a man who has never held a cabinet seat. In his short political career, however, Mr. Law has proved himself a brilliant speaker and a resourceful debater. The Liberals acknowledge his fitness to be opposition leader, and among all suggestions for the position, they regard him the most dangerous.

Mr. Law is sitting for the Beattie division of Lancashire southwest, and is 63 years of age. Unionists consider Mr. Law their most powerful speaker on tariff reform. He is a strong protectionist. The party will more than ever be committed to tariff reform, and expect that his leadership will inject more strong fighting spirit in their ranks.

Mr. Law is a native of New Brunswick, Canada.

Press Comment

LONDON, Nov. 11.—The London papers agree that the appointment of Mr. Law as leader of the Unionist party will attract the interest and sympathy of the Canadian people. The Morning Advertiser says that it is not fanciful to imagine that he may be destined to win in the Mother Country as great a victory for the cause of national and imperial union as that of the Conservative party in Canada. The Unionists may confidently look to him to display the same devotion to principles, the same resolution and spirit in placing the policy of the party before the electorate as marked the successful campaign conducted by Mr. Borden.

The Chronicle says Mr. Law is by far the ablest exponent in either house. His succession to Mr. Balfour means the substitution of a wholehearted, zealous, ambitious convert of boiling water temperature for tepid. The new leader may be trusted on all matters to keep things at a high temperature. Mr. Bonar Law, the Express remarks, is the first son of our great dominions to become leader of one of our great political parties. When the direction of imperial policy is of such critical importance as it is now, nothing could be better than the choice of a son of Canada as the Unionist leader.

Killed by dynamite

ALBUQUERQUE, N. M., Nov. 10.—C. L. Wright, superintendent of the Pacific Coast Gypsum Company plant at Laguna, N. M., was instantly killed this morning by the explosion of ten sticks of dynamite, which he was attempting to thaw. His body was hurled through a solid stone wall.

SALT LAKE CITY, Utah, Nov. 10.—Harry Thorne, convicted of the murder of George W. Fassell, while attempting to rob Fassell's place of business, was sentenced today to be executed December 22. A condemned prisoner in Utah is permitted to select whether he shall be hanged or shot. Thorne chose shooting.

EMPIRE'S FATE IN YUAN'S HANDS

His Success in Negotiations With General of Rebels May Mean Partial Preservation of Monarchy

TALK OF PARTITION AMONG FACTIONS

Tartar General at Nanking Beheaded on Account of Massacre—Country Waiting in Suspense

PEKING, Nov. 12.—(1:40 a. m.)—The fate of the throne of the Chinese empire rests on the action of Yuan Shi Kai. The last message from Yuan, who has been conducting negotiations with the rebel leader, General Li Yuan Heng, indicates that a compromise is possible; that General Li was becoming less irreconcilable, but that there was a difference of opinion between Li and his colleagues on the matter of policy.

According to foreign official telegrams from Hankow last evening, General Li, falling to exact better terms, might perhaps be prepared to agree to the partition of China, that portion of the country south of the Yangtze becoming republican, Manchuria and Chi Li remaining monarchial, and the other provinces making their own choice. Many of Li's followers demand the overthrow of the government and scout the idea of dividing the empire.

The government has requested that the reported flight of the emperor be denied. Roger S. Green, the American consul general at Hankow, reports that big guns have been mounted for an attack upon Hankow. Chinese officials report that the bombardment of Han Yang began yesterday.

Tartar General Beheaded

SHANGHAI, Nov. 12.—(1 a. m.)—Reports from every point this morning show the country is in a state of suspense. Conditions at Shanghai are nearly normal. Nanking reports skirmishing. The Foo Chow tartar general has been beheaded in consequence of the Nanking massacre.

Rebel Reverse at Nanking

NANKING, Nov. 11.—The Imperialists have gained the upper hand and dragon flag again floats over Kiang Yuen fort. During the night the Imperial gunboat shelled the rebels' camp, and this morning troops found that the position three miles outside the south gate had been evacuated. It is believed that the rebels are discouraged over their failure to receive new supplies of ammunition and by the wholesale slaughter of Chinese by the Manchus yesterday.

G. T. PACIFIC TRAIN WRECK

Express Partially Derailed by Running Into Open Switch at Rivers, Man., Because of the Storm

PASSENGERS ESCAPE WITH SHAKING UP

WINNIPEG, Nov. 11.—The Grand Trunk Pacific express due here tonight, was wrecked at noon, running into an open switch at Rivers, Manitoba. Escaping steam and frosty weather made it difficult for the engineer to see through. The engineer and fireman jumped to safety, but thirty passengers were badly shaken up. The mail and express cars were demolished, and the locomotive went over into the ditch.

Steamship Service to Rotterdam

LONDON, Nov. 11.—The Times' Rotterdam correspondent says an announcement has been made that a line of fortnightly sailings to Rotterdam under the Canadian Pacific and French bankers at Rotterdam.

Great Drop in Temperature

KANSAS CITY, Nov. 11.—Sending the mercury down 60 degrees in nine hours, a cold wave swept over Kansas and Missouri on the northwest today. At 8 o'clock tonight the thermometer here recorded 14 degrees. At 11 o'clock this morning it read 14. A wind, attaining its highest velocity at 10 miles an hour accompanied the cold wave. Zero weather before morning is the weather forecast.

WOMEN JURORS

Several Have Served in Courts at Seattle, and Many More Are Called for Duty

SEATTLE, Nov. 11.—Women jurors are no longer a matter of experiment. Duty no longer a matter of ten women have served as jurors in the criminal division of the superior court, and no word of criticism has come from bench or bar. Of the 143 jurors drawn today for service in the superior court, 29 are women, the largest number yet called.

Princess Patricia Coming

LONDON, Nov. 11.—Princess Patricia of Connaught returns here from Sweden tomorrow and will sail for Canada about a fortnight later.

Very Small Baby

WINGHAM, Ont., Nov. 11.—The smallest baby ever born in Huron county was left by the stroke at the home of Ernest Ansell today. It is a boy and weighs only one and a quarter pounds. Its hands are no larger than a man's thumb nail. Another fact of its diminutiveness is it is a normal healthy child.

Two Dead in Owasco, Mich.

OWASCO, Mich., Nov. 12.—Two dead, several badly injured and damage totaling several hundred thousand dollars at least, is the toll collected by the small-sized cyclone which swept Owasco last night. Communication was cut off and it was not until early today that the news was had. The dead are Mr. and Mrs. Jacob Seligman. Their home was wrecked and they were crushed to death while in bed.

According to partly verified reports at least twenty homes have been wrecked, and five factories with substantial damages averaging \$20,000.

SERIOUS EFFECT OF COLD WAVE

Destruction of Large Percentage of Prairie Wheat by Snow and Frost—Traffic is Badly Blocked

ST. PAUL, Minn., Nov. 11.—Winter rains in tonight on a wind that cut like a two-edged sword. Out of the northwest blew a gale before which was driven rain, snow and sleet, alternately.

Southern Minnesota is storm-wet and snow-bound. Advances from Fargo, N.D., state that practically all wire communication was abandoned by telegraph companies in North Dakota tonight. Six inches of snow is reported. The weather is forecast to be the severest on record at this time of the year, and it is said millions of bushels of wheat are frozen in shock or stack. The disruption of railroad operations by reason of the weather has added greatly to the loss. Fully one-fourth of Western Canada's two hundred million bushels of wheat, it was estimated tonight, is lost.

Bad For Farmers

WINNIPEG, Man., Nov. 11.—The cold wave which entered Northern Alberta on Wednesday night worked its way east into Manitoba. This early closing down of winter has put an end to remaining hopes of a week or ten days' mild weather in which some fall ploughing might be done. Owing to the continued wet spells and early frosts together with the heavy snow, the usual ploughing has been got ready by Manitoba farmers for spring ploughing and the effect itself next season in decreased acreage seeded to the prime cereal.

Conditions are even less propitious in Saskatchewan and Alberta where in some districts not 50 per cent. of the grain has been threshed, and very few can report threshing completed. Some farmers propose continuing threshing as soon as the weather becomes settled, but threshing from the stack with snow on the ground is a doubtful expedient. Those farms with grain in the stack can wait with some complacency until spring.

Liberal Leader Nominated

WOODSTOCK, Ont., Nov. 11.—North Oxford Liberals nominated N. W. Rowell, the Liberal leader, in Ontario today, although considerable opposition was made to importing a Toronto man.

Playing With Loaded Pistol

EVERETT, Wash., Nov. 11.—George Belges, the 16 year old son of Lee Belges, shot and killed himself in the woods half a mile from Everett today while showing a boy playmate, Arthur Humphreys, how to handle a hammerless safety revolver. To convince his comrade how harmless the weapon was in experienced hands, he pointed the pistol at his head and pulled the trigger, supposing that the mechanism would prevent a discharge. To young Humphreys' horror the pistol was discharged, and Belges fell with blood streaming from a bullet wound in the head. Humphreys ran to town and notified a physician, who went to the place of the accident in an automobile and brought back the body of Belges. He found that death must have been instantaneous.

Appeal in Workman Case

TORONTO, Nov. 11.—Leading Methodists of the city and members of the general conference special committee rendered in connection with the Dr. Workman case. The case will be carried to the higher courts and probably to the privy council. An appeal has been filed.

RIOTS CONTINUE AMONG STRIKERS

Rougher Element in Fernie Makes Daily Demonstrations Against Men Who Are at Work

MANY CONSTABLES KEPT ON DUTY

Severe Cold on Prairies Causes Great Anxiety Over Fuel Question—Suffering Now is Inevitable

LETHBRIDGE, Alberta, Nov. 11.—Rioting continues daily at Fernie. No settlement has been reached yet by the conference committee, and the city of Fernie is filled with strikers anxious to return to work.

Demonstrations are made principally against the four Barrs, father and three sons, and a half dozen Virginia negroes, who are working in the Coal Creek mines, but come to Fernie each night to eat and sleep. Hundreds follow these men, and they are now guarded by a staff of sixty constables, who have all they can do dodging stones aimed at the strike-breakers. Several shots were fired by the police at the crowd, but none took effect.

A number of arrests have been made, but in the present temper of the rioters it is dangerous to send anyone to jail.

All are hoping that Monday may bring a settlement, as only two union points remain to be cleared up.

In the meantime the unusual cold weather on the prairies has made everyone anxious to see the coal mines start up to avoid the terrible suffering which can hardly be averted even now in certain sections where no stock of coal has been laid up before winter sets in.

Theatre and Hotel for Toronto

TORONTO, Nov. 11.—Toronto is to have a new theatre and a million dollar downtown hotel. Caythorpe Mulock, manager of Hamilton's point, are behind the movement.

Rodgers to Fly Today

LONG BEACH, Cal., Nov. 11.—Cal. P. Rodgers will fly from Pasadena to this city tomorrow, despite ministerial protests at both ends of the journey. The protest of the local ministers against Mr. Rodgers' visit is reported to be the severest on record at this time of the year, and it is said millions of bushels of wheat are frozen in shock or stack. The disruption of railroad operations by reason of the weather has added greatly to the loss. Fully one-fourth of Western Canada's two hundred million bushels of wheat, it was estimated tonight, is lost.

FROST HAMPER LAKE TRAFFIC

Unseasonable Weather Causes Trouble in Kootenay—Worst on Record for Month of November

C. P. R. USES SLOCAN LAKE ROUTE

NELSON, Nov. 11.—The coldest weather for November known during the past decade in the Kootenay is now being experienced and mails and freight are disorganized. Owing to the frost sealing up the rivers tributary to the Arrowhead lakes the water is exceptionally low and the steamer bearing the mails and passengers from the coast is reported to have run aground today, with the result that no mail from the coast is being received tonight. The Canadian Pacific is using its winter route via Slocan lake for the first time this season, it being the earliest on record.

Boys Accidentally Shot

ORILLIA, Ont., Nov. 11.—When George Coffee, aged 15, was loading his rifle, it was accidentally discharged, the bullet going clean through the body of James McDonald, aged 8, an inch below the heart, and lodged in the thigh of William Doolittle, aged 7. Both boys will recover.

Appeal in Workman Case

TORONTO, Nov. 11.—Leading Methodists of the city and members of the general conference special committee rendered in connection with the Dr. Workman case. The case will be carried to the higher courts and probably to the privy council. An appeal has been filed.

WHITE PLAGUE

California State Board of Health Gives Statistics of Tuberculosis Ravages

SACRAMENTO, Cal., Nov. 11.—According to figures compiled by the state board of health, the deaths from tuberculosis in this state for the year 1910, were 4,872. Of these 2,637 reported occupations showing the following percentages: Deaths among professional men, 7.29; clerical, 10.61; mechanical and trading pursuits, 6.50; public entertainment, 2.16; police and soldiers, 2.15; laborers and servants, 13.42; manufacturing trades, 10.47; agricultural, transportation and other outdoor pursuits, 16.07; all other pursuits, 14.55.

Louisville Hit

LOUISVILLE, Ky., Nov. 11.—A terrific storm hit Louisville last night. Much damage was done, but no lives were reported lost.

Hits in Indiana Town

INDIANAPOLIS, Ind., Nov. 11.—A disastrous cyclone struck Waterloo tonight. The loss is estimated at \$4,000. The city hall, fire department building, post office, eight residences and numerous other buildings were reduced to ruins.

Which Damage Done

DANVILLE, Ill., Nov. 11.—A heavy rain and wind storm, accompanied by much lightning, that broke over Vermillion county this evening, developed into a tornado at Roseville, where much damage was done. At the Elgin, Joliet and Eastern railroad round-houses several small buildings were blown down and the coal chutes were blown across the tracks.

MEANS CONTEST ON NEW ISSUES

Canadians Who Took Part in Last Political Campaign in England Speak of Mr. Law's Leadership

TORONTO, Nov. 11.—The announcement of the selection of Mr. Bonar Law as leader of the Unionist party in England is received with expressions of approval and high commendation by many Toronto citizens. Among the Canadians who supported the platform of tariff reformers in England during the last campaign were George T. Blackstock, K.C., A. C. Pratt, M.P., for South Norfolk and A. W. Wright.

Mr. Blackstock said today: "Mr. Bonar Law is a practical man of business, whose views are strongly, firmly and enthusiastically held, and who believes that upon their adoption depends the prosperity and safety of the state. He is a hard-headed debater, alert, tenacious of his point and thoroughly capable of holding his own against his adversaries. His selection is one more evidence, if any were wanting, of the great and preponderating influence which Canada now enjoys in England. Considerations which influenced his choice were no doubt largely his Canadian origin and the fact of his coming from a country where imperialistic and preferential causes had recently achieved a great victory, and with which he is familiar."

"His elevation to the leadership signifies that tariff reform will occupy a foremost place in the Unionist programme. Mr. Law has been looked upon as the most powerful exponent of the party of the Empire, a leadership which bears what is almost certain succession to the premiership. On tariff reform and imperial preference, he will lead rather than wait and follow, as Mr. Balfour did, and these questions will decide the next contest in the Motherland. Mr. Balfour was always regarded as something less than wholehearted in his support of these two vital and closely related questions, but no one will doubt the new leader's entire devotion to them.

"Of fine ability and with high ideals, with a splendid imperialism influencing and determining his attitude on all questions, Mr. Bonar Law is the man of the hour."

MRS. QUINN HELD

CHICAGO, Nov. 10.—Mrs. Jane Quinn today was held to the grand jury on a charge of murder in connection with the death of her husband, John M. Quinn. Quinn was found dead in bed November 2, with a bullet wound in his body and Mrs. Quinn declared he had been killed by burglars.

The Chicago police will continue their investigation into the deaths of Mrs. Quinn's two former husbands, John McDonald, whom she married in London, Canada, October 23, 1883, and Warren Thorne, whom she married at Sable Lake, Michigan, in October, 1910. McDonald is reported to have died of alcoholic poisoning on September 28, 1891. Thorne was found shot to death in his home at Jackson, Michigan, under circumstances similar to those attending the shooting of John.

STORMS' HAVOC IN THE STATES

Eight Dead and Scores Injured by Tornadoes that Visited Portions of Illinois, Missouri, and Wisconsin

UNUSUAL HEAT PRECEDES GALE

Case of Death from Prostration in Chicago—Fatalities in Several Small Towns—Damage to Property

CHICAGO, Nov. 11.—Reports received tonight tell of death and injury and extensive property loss resulting from cyclonic storms that raged late today in northern Wisconsin, Illinois, Iowa and on the Great Lakes. The tornadoes came between an abnormally warm period, in which one heat prostration was reported in Chicago, and a cold wave bearing sleet, snow and rain. At least eight persons are known to be dead, several dying and scores injured. Intense suffering from the bitter cold, snow and sleet which descended upon the shelterless homes is reported in the wake of the storm.

Southern Wisconsin was the hardest hit. Near Otorville, in Rock county, six of the eight deaths reported occurred, and a few miles away, at Milton, a seventh was found dead in the ruins of a storm-wrecked home Henry Meyer, 25 years old, was killed at Belvedere, Ill.

In the village of Virginia, near Springfield, Ill., nearly every public building was damaged, including stores, churches and city property. Many were injured in the swirl of flying lumber, and some of these probably will die. In Iowa a 50 degree drop in the temperature turned the pouring rain into a driving sleet and a coat of ice covered the city, stopping entirely traffic and street lighting.

Property loss mounted up rapidly in the trail of the Wisconsin cyclone. Severe weather conditions are reported all the way from the Rocky mountains. In Chicago the wind attained a velocity of 44 miles an hour, and in the Yellowstone Park and at Helena, Montana, the thermometer in government weather bureaus registered 8 degrees below zero. At the Sault Ste. Marie canal in Michigan more than an inch of rain fell.

John Mahoney, a freight handler in Chicago, was overcome by the heat while at work in an open freight warehouse during the afternoon. The government thermometer registered 74 degrees at the time.

This was the hottest November day since 1881, and the first heat prostration in November of any year on record. Late in the day, however, the heavy wind that sprang up brought on a driving rain, the heaviest fall for a month being reported. Vivid lightning and heavy thunder accompanied the downpour.

Nine Reported Dead

JANESVILLE, Wis., Nov. 11.—Nine persons are dead and another is dying, many are injured, and nearly half a million dollars' worth of property was destroyed as the result of a cyclone that swept over Rock County this afternoon. Near Orfordville the whole Smith family, three daughters, a son and the father, were killed. Mrs. John Johnson, 60 years old, Mrs. Brode, a bride of a few weeks; Fred Lentz, a carpenter, and Amy Korban, 8 years old, also met death. Welter Korban is dying.

The storm broke with a fury never before equaled in this part of the country. Farmers and villagers were caught entirely unawares. A high wind had prevailed during most of the afternoon. About 4 o'clock the clouds lowered and it became dark as night. Unusually warm weather had marked the day. Although the weather had been the subject of much comment none was prepared for a tornado. Few had time to seek their homes.

Farmers who were in their fields sheltered themselves as best they could and many arrived home to find their buildings destroyed and in some cases wives and children missing. The storm passed almost as quickly as it came up and left the country desolate. Attempts to establish communication with neighboring cities were futile. The roads were almost impassable, but messengers were pressed into service and made their way to Janesville and Beloit as swiftly as possible. Orfordville is equally distant from both the cities and assistance was hurried to the stricken village.

In the vicinity of Orfordville the greatest havoc was wrought by the storm. First aid parties were organized and at once set about giving relief wherever possible. The loss caused by the tornado which swept Rock county runs into hundreds of thousands of dollars, according to David Wood, who made a trip into the country immediately after the storm passed this city. The loss of the tobacco crop will be more than a half million.

Just north of Janesville a girl named Korban was killed. At Milton one person was killed. (Continued on Page 2.)
