Fathers Showed Wisdom on Tariff

"Our fathers decided we would hoe our own row on tariff matters, to maintain the industrial integrity of this nation, and keep within our country all those occupations natural to our country, and into which our children may go and find opportunity for the exercise of the talents with which nature has endowed them. Our fathers had from Missouri or Mr. Crerar to determine what was the right trail to blaze in directing the fiscal policy of this country. I don't think that three people out of four in this Dominion would fail to register their firm conviction that that course, our policy for forty years, is the right course, and we are not going to be turned aside from it at the instance of any party."-Rt. Hon. Arthur Meighen at Simcoe yesterday.

There will doubtless be in the revision lines of goods in which even now you can make reductions. There may well be lines of goods on which increases will be necessary, but we will stand by the policy we have always stood by, in Omtario, the Prairie West—and it needs some courage to stand by it therefor that policy we stand, because it is right, whether there are parts of the country where it is unpopular or not, and I ask you, who believe in it, isn't it an honest response to your hearts

and I ask you, who believe in it, isn't it an honest response to your hearts and minds to support that policy if you stand for it, and vote for those who are fighting for it, not only in Ontario and Quebec, but in the Prairie West, where it needs to be fought for? Isn't it the right thing to stand by those who in all winds and under all skies fight for the principle in which you believe? I have discharged my duty in placing these things before you. You must exercise your responsibility in the decision and I am perfectly happy to abide by it, whatever the result may be." "My employees on my farms, which have grown in the last two years from a modest 50 acres to some 2,000 acres, have not accepted my offer, knowing that they will make more money in wages than they could make out of the farm.

"I now suggest that one of the farms should be run on a co-operative scheme, in charge of the workers and their unions. There would have to be an agreement that accepted methods of good husbandry be observed. It would be possible, of course, to enjoy several years of prosperity by taking everything out of the land and putting nothing back. The farm must be kept in good order, fences kept up, ditches drained, land fertilized and buildings maintained.

"What I am deeply concerned with is that I made this offer.
