

Your Farm
Needs
This
Worry Saver

Expect more of this mowing machine than you ever did—or dare—expect of another. It will surely meet your expectations. For the Frost & Wood Number Eight actually DOES run easier (and so spares horses). It actually DOES stand the hardest usage year after year, with fewest repairs. It actually does get the mowing done more quickly, and with less wear and tear on you, on the team, and on the machine itself. These are not mere assertions—they are facts, and can be proved to you. Write us for reasons why YOU need a

Frost & Wood

number eight mower

There is no room here to fully describe the betterments (found alone in Frost & Wood Mowers) illustrated here. But you should inform yourself about them. You should know the value of the double brace and roller bearings (see picture B)—of the big bearings and double-strength stay (picture C) between cutter bar and main frame. You should appreciate the quick starting device of the Internal Gear (picture A) and the Wearing Plate under the cutter bar (picture D). Each of these, and many other Frost & Wood improvements greatly add to the life of this Mower and vastly increases its service. This is the mower that will not stall in the heaviest hay—that gives least bother and most efficiency. There is a catalogue worth reading that tells everything about it. Ask for it.
