

LITERATURE.

Any of the undermentioned works can be obtained by applying to the EDITOR of the CANADIAN MECHANICS' MAGAZINE.

Now ready, demy 4to., price 6s. cloth,
MANUAL OF BULL-WORK and **MARQUETRY**, with ninety coloured designs, and practical instructions for learners in these arts. By W. BEMROSE, Jun., author of "Manual of Wood-carving," "Fret-cutting, and Perforated Carving," &c. &c.

"This is a sequel, by W. Bemrose, Jun., to his two popular books on wood-carving and fret-cutting. The present like its predecessors, is written for amateurs, but trained workmen would find in it not a few useful hints, as well as a collection of beautiful designs. Bull-work and Marquetry have not hitherto been considered within the province of amateurs, nor have the been classed amongst amusements and pastimes; but so concise and sufficient, and apparently so easy of execution, are Mr. Bemrose's instructions, that we should not be surprised to find these beautiful arts become popular. The illustrations are both numerous and beautiful."—*Public Opinion.*

Sixth Edition, crown 4to., price 5s. cloth.
MANUAL OF WOOD-CARVING: containing upwards of 120 original and selected designs for the guidance of amateurs, and imparting all necessary information to beginners in this useful art. By W. BEMROSE, Jun., with Introduction by LLEWELLYN JEWETT, F.S.A. &c.

"Wood-carving is one of the mechanical arts practised in the present day by amateurs of both sexes, and it is chiefly to assist these that Mr. Bemrose's Manual is intended; its plan is brief, but comprehensive. The examples are well selected, and engraved with much accuracy and delicacy."—*Art Journal.*

Sixth Edition, demy 4to., price 5s. cloth.
FRET CUTTING AND PERFORATED CARVING, With Practical Instruction. By W. BEMROSE, Jun., author of "Manual of Wood-carving." With fifty-four designs suitable for every description of useful and ornamental articles of furniture and ornament.

"Worthy of the former work, 'Manual of Wood-carving,' by which our author is so favourably known. Amateurs liking to employ their time in fret-cutting and perforated carving will here find suitable directions for the practice of this graceful yet useful art, laid down by one thoroughly master of its details. The illustrations are admirable, and the book is a marvel of cheapness."—*John Bull.*
 NEW COPYRIGHT DESIGNS IN FRET-CUTTING.
 A complete List on application.

MATEURS, INVENTORS, AND OTHERS interested in Model Engineering, send for BATEMAN'S Prospectus, free on application, or by post.

MATEUR'S MECHANICAL HAND-BOOK. BATEMAN'S new descriptive catalogue, enlarged edition, elaborately illustrated by nearly 100 engravings of Engines, Tools, and Amateur's Sundries, &c.
