

# ZOEDONE.

## A Delicious Beverage.

The BRITISH MEDICAL JOURNAL says:

"We can confidently recommend it to the attention of physicians and others who are occasionally at a loss what to direct their patients to take when parched by feverish thirst or depressed by exhausting ailments, notably in cases where alcoholic stimulants would be prejudicial. We feel that it would be found exceedingly useful in mitigating the discomforts sometimes experienced by those suffering from the thirst, loss of appetite, and general malaise connected with the last stage of phthisis and chronic bronchitis. We would also, from our observations and experience, advise its introduction into clubs, taverns, and places of public amusement, where it would judiciously supersede vinous and alcoholic stimulants, seeing that it contains, as its name implies, life-giving ingredients in a form easily assimilated."

## A BRAIN AND NERVE TONIC.

The LANCET says: "ZOEDONE contains the soluble phosphates of lime, iron, soda, and potash in medicinal quantities. Very efficient and pleasant."

The MEDICAL PRESS AND CIRCULAR says: "Is commendable equally for the style in which it is put up and the delicate flavour which it possesses, and also on account of its special merits as a nerve tonic."

## NON-ALCOHOLIC. STIMULATES BY STRENGTHENING.

**CAUTION.**—Dealers should be on their guard against numerous imitations of ZOEDONE, put up in the same style and offered as substantially the same article. The composition of ZOEDONE is protected by Letters Patent, and the Zoedone Company will proceed against infringements.

Every Chemist that has introduced ZOEDONE has found a large and regularly increasing sale for it.

It is put up in Champagne Bottles, and there is no trouble with empties, as the bottles are included in the price.

## The Week.

### HOME NEWS.

(Yarmouth has its annual exhibition on Thursday, Oct. 6th.

SIR LEONARD TILLEY has been elected a corresponding member of the American Geographical Society.

Mr. Hudson is expected to arrive from England shortly. The fate of the Ford Pit will likely be decided on his return.

A rabbit canning factory is to be started at Liverpool. A half a million pairs of rabbits are wanted for this season.

It is announced as a significant fact that two hundred factories have been established in the Province of Quebec during the current year.

It is expected that the Canadian Pacific Railway will be completed from Winnipeg to Brandon and trains running to the latter place early in October.

The buildings now in course of erection on the Prince Edward Island Stock Farm, three miles from Charlottetown, are being rapidly pushed forward.

J. N. Coleman, of Lakeville, Kings, N. S., informs the Western Chronicle that he raised, this season, 8,000 quarts of strawberries, which netted him \$666.

Engineer Ritchie and his staff finished his survey of the line for the Pugwash Railway on Saturday. The distance is 18 miles, and the route said to be a very inexpensive one.

Montreal, Sept. 22.—The Montreal Exhibition was attended to-day by another immense crowd of people, thousands coming in by special trains. The attendance yesterday was 45,000.

Two hundred and forty men are now employed on the St. Croix Cotton Mill and 30 at the quarries—270 in all. The work is being pushed rapidly, and there is no doubt that the mill will be covered in previous to the arrival of cold weather.

Mr. P. R. Crichton launched from his shipyard at Kingsport last week a fine barque of 1150 tons register, and classed 12 years. Dimensions 182 feet keel, 20 feet 6 inches hold, and 38 feet beam. She will sail from Kingsport the last of this week. Mr. Crichton is now putting on the stocks a ship of about 2000 tons.

The Ottawa City Engineer has made his report to the Council in regard to the lighting of the City by electricity. He estimates that it would cost about \$24,800 per year to produce the electric light by steam power, and \$16,600 by water power. The present cost of street lighting by gas and naphtha is some \$13,000 per annum.

The Moncton Times announces on what we have no doubt is good authority, that the increase of receipts on the Intercolonial Railway for the fiscal year ending 30th June last was in the vicinity of a quarter of a million of dollars over the previous fiscal year. The result has been that the road has not only paid its running expenses in full, but has paid a small surplus of about \$1,000 into the public treasury.

Work on the Windsor Cotton Factory has been rapidly pushed forward. Mr. Mark Curry, and Capt. Aylward have supervision of the works. The building is to be 200 feet long by about 80 wide with an extension at one end. The excavation is nearly completed, and the masons are at work on the stone foundation. Stone is arriving by the train and scows daily. An application has been made to the I. C. R. for a temporary siding for the convenience of getting bricks and material coming by rail.

According to Mr. C. J. Bridges, who is the agent for the Hudson Bay Company's lands, Winnipeg, with its surroundings, is in a highly prosperous condition. Speaking of land sales, he says—"After surveying about 450 acres at Winnipeg, and desiring to fix a price on a part of it, I thought I would let the public determine it for me, and in about two hours we sold at auction thirty-two lots, realizing \$123,000." And speaking generally, he says—"Last month, we sold upward of 300,000 acres in town lots and farming lands. Of this, 24,000 acres were farming lands, realizing an average of \$5 an acre. I do not think that the immigration is very much larger than last year, but there is this for it, that the class of immigrants is much improved. The people who are going there now have means, and proceed there with the real intention of settling and taking up land."

There are at present nine collieries in active operation in Cape Breton, giving employment to about 1,000 colliers. The output this year will be the largest on record. The total amount of coal raised in Nova Scotia in 1880 was 1,032,710 tons. That of Old Mines, Sydney, was 110,000 tons. The yield this year, it is said, will be about 120,000 tons.

The Dominion Exhibition which was formally opened in Halifax by the Lieut. Governor on Tuesday, seems to have been badly managed, according to the secular press although the exhibits are in many departments far in advance of anything previously witnessed in Nova Scotia; and the whole Exhibition is a gratifying index of our advance in manufactures and other important industries. The Mayor of Halifax delivered an address, and the General commanding H. M. Forces, and the Governors of New Brunswick and Prince Edward Island, who were present, made speeches. We shall have more to say upon the subject next week.

### NEWS FROM ABROAD.

An English writer estimates that there are 40,000 Americans in England.

4 KENT ST., Halifax, 14th May, 1881.

To Holman Pad Co., Halifax:

GENTLEMEN,—I suffered with a cough for years, upon which no other remedies seemed to have the slightest effect, and which so reduced me that I thought nothing could save me. As a "forlorn hope," I was induced to try the Holman Pad Remedies. Your treatment has made an entirely new man of me. My cough has entirely disappeared; Rheumatism nearly all gone, and I am gaining flesh rapidly. I hear of numbers who are praising your remedies, and I also confidently recommend them, even where everything else has failed.

Yours, very truly,  
JOHN LITTLE.

THE COMMON EXPRESSIONS, "I feel so dragged," "My food don't Digest," "I don't feel fit for anything," which we so often hear during the Spring and early Summer months, are conclusive evidence that the majority of people require at that season especially a medicine that will strengthen the organs of digestion, stimulate the circulation of the blood, and "tone up" the debilitated constitution.

HANINGTON'S "QUININE WINE AND IRON," taken according to directions, produces buoyancy of spirits, vigor of mind, and gives lasting strength to the whole system.

### Rest and Comfort to the Suffering.

"BROWN'S HOUSEHOLD PANACEA" has no equal for relieving pain, both internal and external.
