

Drawn for Photo-lithography by C. O. Sisson, C. E.

MAP SHEWING THE EARLY PLEISTOCENE VALLEY OF OLD C CHE CREEK
 Together with the Intercepting Streams tributary to the Thompson, which have robbed it of its waters, and are due to erosion
 consequent on the Later Pliocene epoch of elevation.

(The course of the Old C che Creek Valley is shown by the pink line. Topography based on map in course of compilation
 by J. McEvoy, B. A.; Sc., by permission of the Director of the Geological Survey.)

To illustrate Dr. G. M. Dawson's Paper on the Rocky Mountain Region.
