How Pale, Tired Girls Become Strong and Ruddy

The pallid girl always lacks appetite. What little she eats is badly digested. At night she is restless, she dozes but doesn't sleep soundly. Vital force must be increased, new blood must be supplied and a general rebuilding take place before she will feel like she ought. Dr. Hamilton had invaluable experience in these cases and found nothing so prompt in building up the young woman as his vegetable pills of Mandrake and Butternut.

Dr. Hamilton's Pills begin by cleansing the system and purifying the blood; they also improve digestion and render food ready for absorption. Additional nourishment is quickly supplied and the patient is fast strengthened and invigorated. Full of spirit, ruddy and strong is the girl that assists her system by Dr. Hamilton's Pills.

Mr. Harcourt said a serious condition was revealed by the school attendance statistics for 1906. In the rural schools there were 96,000 pupils in the first reader, half as many in the second reader, and only 9,000 in the fifth reader. In the urban schools there were 74,000 pupils in the first reader 27,000 in the second, and only 7.000 in the fifth reader. What became of these children in the intervening period before they adopted their vocation? They were drifting their vocation? Smith of the Soo

Mr. Smith (Soo), regretted that he had not immediately followed the mover and seconder of the address or Thursday, because in the interval, the Government had "stolen a suit clothes" from him by introducing bill benefiting the settlers in the northern districts, which, said Mr. Smith, was only common justice. Yet this very legislation had been termed "balderdash" by the Premier last
