Kansas City wires: Destruction of corn continues. Business at Guthrie and Oklahoma City at a standstill. Corn withering under intense heat all thru Oklahoma. Southwestern Kansas situation

Liverpool—Broomall's foreign crop sunmary issued to-day is as follows:
United kingdom—Cutting of wheat has commenced and the weather is unfavorable, it being rainy.
France—Weather conditions are still unfavorable. Some authorities report that harvest returns will be sufficient, while the consensus of opinion is that considerable importation will be necessary, as reserves are much smaller than was expected and the crop considerably under last year.

Germany—Rains are hindering harvest and damaging the quality. Rust is spreading and the weather is unfavorable.

Austria—Harvest is in progress and rains are causing damage to the quality and stopped harvest over a large area. Yields are good, but the quality is unsatisfactory. Hungary—Rains are falling and this is delaying harvest and damaging the wheat a already harvested. The yield is good.

Roumania—An unofficial report places the yield at 124,800,000 bushels.

Bulgaria—Harvesting is in progress and

rains are causing anxiety.
Italy, Spain and North Africa—The crop outlook is generally favorable.
Australia—Crop advices continue favor-WHY CORN GOES UP.

The rapid advance in the price of corn futures during the past week has been occasioned by the extreme heat, which prevails in the corn producing states, and the fact that, owing to insufficient moisture, the growing plant is in no condition to withstand the drought, which is being experienced.
