BRINGS NINE BEAR SKINS.

R. H. Rockwell of Brooklyn Bagged Big Game in Alaska.

(N. Y. Times.)

With one of the finest collections of bear skins ever brought from Alaska, Robert H. Rockwell, chief taxidermist of the Brooklyn Museum, has returned from the northernmost of Uncle Sam's possessions after a hunting trip covering six months. Besides the bear skins, Mr. Rockwell brought the skins and horns of moose and white mountain sheep. All of the skins will be mounted and placed on exhibition later at the Brooklyn Museum.

The trip of Mr. Rockwell was undertaken to provide material for three large habitats for the museum. He left Brooklyn on April 15 of this year and went by rail to Seattle, Wash. There he met Edward Crab, chief taxidermist of the Oklahoma State Museum, Charles Nob, and C. E. Sykes, an Oklahoma hunter of big game.

The party arrived at Cordova, Alaska, on April 30, and chartered a sixty-five foot power boat. Accompanied by native guides, the party proceeded 600 miles along the coast to the Pavlov Bay section of the Alaska Peninsula. For twenty-eight days they hunted at the base of the twin volcanoes on the shores of the bay, bagging seventeen big bears, mostly brown ones. Mr. Rockwell counted for eight brown bears and one grizzly. One of the brown bears killed by him is said to be one of the largest ever shot in Alaska. Standing erect on its hind legs it would have been nearly nine feet in height. Its skull measured 19 1/2 inches across.

\$459,436 OF AUTOS STOLEN IN A MONTH

Insurance Value of 298 Cars

Taken in New York \$234,961 More in September Than a Year Ago.

(New York Times.)

Two hundred and ninety-eight automobiles of an insured value of almost half a million dollars were stolen in New York last month, according to statistics obtained yesterday by a reporter for The New York Times in a canvass of automobile insurance companies.

Officials of several of the companies explained that although the figures indicated that approximately \$2,000,000 worth of cars were stolen in the five boroughs in the year ending with September, that these figures did not account for thefts of uninsured machines, roughly estimated to total one-sixth of all the cars reported stolen to the police.

The statistic also revealed that compared with the same month in 1920 almost double the number of cars were stolen in the city last September, and that automobile thieves were becoming more select in their thefts, as the value of the cars stolen last month exceeded that of September in the preceding year by \$224,961.

Persons operating automobiles in Manhattan were the heaviest sufferers. Reports received by the insurance companies for September showed that 201 insured cars had been stolen from the streets and garages during the period against 113 in September, 1920.

Brooklyn was next in the number of reported stolen cars, with an increase of thirty-one over those reported in September, 1920.

Insured cars were reported stolen to the extent of one hundred and thirty-nine in the Bronx during the month, with a total of sixty-nine, an increase of thirty-one over those reported in September, 1920.

The statistics for the five boroughs follow:—

1921. 1920.

Manhattan 201 113

Brooklyn 69 38

Queens 21 5

Richmond 4 3

Queens 3 8

Total 298 195

Insured value \$459,436 \$224,475

None of the insurance officials could be induced to discuss the increase in automobile thefts. One of them admitted that sufficient attention was not being devoted by the police to automobile thefts, and that the demand for cars in which detectives could efficiently compete with automobile thieves was increasing.

In Detroit twenty cars were at the disposal of detectives assigned to this work, but that the few detectives in the automobile squad of this city have but two cars.

SAYS POTATOES ARE SHORT CROP

(Toronto Globe.)

While the late summer and autumn rains have helped the late potato crop, the supply of this valuable food product is still a long way below what it was last year. The October Fruit and Vegetable Crop Report, issued by the Dominion Department of Agriculture, places the Ontario yield in potatoes at 10,788,000 bushels, as compared with 23,960,000 bushels and the average for all five years was nearly 15,000,000 bushels.

The Ontario crop for the present season, is therefore, far short of normal. Nor is the general situation improving when a wider survey is taken. The Nova Scotia crop is only half that of last year, New Brunswick is some 5,000,000 bushels short of 1920, Prince Edward Island is 2,000,000 short, and Quebec 25 per cent. down, while Manitoba's increase is

PUBLIC IS URGED TO HEED NATURE'S WARNING

Thousands of People Suffer Permanent Loss of Health Because of Neglect—Nature Has Set the Danger Signals for Us and We Cannot Afford to Pass Unnoticed the Warning That She Gives Us.

Good digestion means good health; bad digestion means bad health.

A sound stomach is worth a hundred times its weight in gold. Probably eighty per cent of all diseases originate in the digestive organs. Dyspepsia, or what is more commonly known as indigestion, is not only one of the most prevalent, but it is one of the most difficult to treat of all present day diseases, and has for years baffled the skill of leading specialists everywhere.

Stomach trouble is almost always followed by a complication of diseases. One of the first being an overworked liver, with all the symptoms of biliousness, followed in turn with headaches, coated tongue, nausea, dizzy spells, in the back, palpitation of the heart and other distressing symptoms. Sooner or later the kidneys will become involved and that is just why these danger signals should be heeded in time. A wise man puts out the fire before there is too much destruction. The same theory should apply to stomach trouble.

Gas in the stomach means fermentation instead of digestion; decay, instead of nutrition, for fermentation produces poisons, which are absorbed by the blood, and which frequently bring on the condition known as auto-intoxication or self-poisoning. This is also why the development of acidosis, which brings on so many complications such as rheumatism, hardening of the arteries, high blood pressure and other conditions, which may mean permanent loss of health. Acidosis is one of the main forerunners of Bright's disease and diabetes, hence it is evident that if we have stomach trouble, however slight, we are foolish indeed if we do not take prompt steps to correct it.

If we are not fit as a fiddle in the morning, if we feel better than when we went to bed; if our breath is offensive; and we have that bad taste in the mouth, which has set the danger signals for us and we cannot afford to neglect the warning that she gives us. That is just why the demand for Tanlac, the great Stomachic, Systemic and Reconstructive tonic, has broken all

World's records. The Canadian people have learned that it probably provides the surest, safest, and quickest remedy for all such troubles, and millions upon millions have taken it with the most astonishing and gratifying results.

Tens of thousands of men and women of all ages and in all walks of life afflicted with stomach, liver and kidney disorders, some of them of long standing, as well as thousands of weak, thin, nervous men and women apparently on the verge of collapse, have testified publicly that they have been fully restored to their normal health, strength and weight by its use. Still others who seemed fairly well, yet who suffered with indigestion, headaches, shortness of breath, dizzy spells, sour, gassy stomach, coated tongue, fogginess of breath, constipation, bad complexion, loss of appetite, sleeplessness at night and terribly dejected, depressed feelings state that they have been entirely relieved of these distressing symptoms and restored to health and happiness by Tanlac.

NOTE: Tanlac Vegetable Pills are an essential and vitally important part of the Tanlac Treatment wherever constipation is present.

You cannot hope to get satisfactory results from first establishing a free and regular movement of the bowels. It stands to reason that no treatment can do the greatest amount of good when you are suffering from constipation or biliousness, or when your system is clogged up with waste products and poisons.

Tanlac is sold in St. John by The Ross Drug Co., Ltd., and F. W. Mann, and by leading druggists everywhere.

THE DRY GOODS TRADE

(Toronto Globe.)

Business at wholesale dry goods houses continues to show a satisfactory degree of activity, and merchants are now ready to admit that the corner seems to have been definitely turned. The improvement which has been in progress for several weeks now has been well maintained, with the volume of sales steadily growing. In fact, at least one large wholesaler states that for the current week sales so far have shown the first increase in the past twelve months over last year. Demand for many lines is such that Canadian mills have difficulty in filling their orders, and among these may be mentioned flannel blankets of certain classes.

One section, however, which is still adversely affected by conditions in other lines of industry is heavy grey wool blankets, and this is due apparently to the reduced operations in the lumber woods. As has been previously stated, reports from the lumber companies are to the effect that smaller numbers of men are being sent into the woods this year, and this is naturally affecting the buying of blankets. In ordinary years, orders for these goods at this time have been coming in a lot of the buying now coming forward at the present time sales are slow. It is not expected that there will be much improvement in this respect. White blankets, on the other hand, are said to be moving fairly well.

A lot of the buying now coming forward is for what are known as package goods, such as hose, underwear, etc., and the same condition as mentioned above,

FUNERALS

The funeral of Miss Jane Pattison was held yesterday afternoon at two-thirty o'clock from the residence of her sister, Mrs. Elizabeth L. Arrowsmith, 314 Princess street, Rev. R. G. Fulton conducting the service. Interment was made in Fernhill cemetery.

The funeral of William Jackson was held yesterday afternoon at 2:30 from the residence of his brother-in-law, Joseph O'Brien, Gilbert's Lane, to the Methodist burying ground. Service was conducted by Rev. Canon Armstrong.

THE MARCH OF PROHIBITION.

(Toronto Star.)

The victory for prohibition in New Brunswick makes seven of Canada's nine provinces "bone dry." Prince Edward Island, a pioneer in the temperance movement, has probably the strongest law, as it is an offence in that province to have possession of liquor not obtained on prescription. Ontario, Manitoba, Alberta, Saskatchewan, Nova Scotia and New Brunswick will now all be under the one dominion law, prohibiting importation, which, in Ontario, is enforced by the Sandy Act (provincially), forbidding the delivery of liquor within the province (short-dracting). British Columbia and Quebec have government sale systems, with a few Quebec municipalities under the Scott Act. Who would have said, a dozen years ago, that all this would so soon come to pass?
