DIGBY ELECTIONS.

DIGBY, Feb. 5.-The Digby Town Council elections came off yesterday amid sunshine and calm, but to some was darkness and dies viae. Seven for councillors were in the field, and two for mayor. J. K. Tobin and Orbin Sproul opposed each other for the chair. The retiring mayor, G. I. Letteney, refused a re-nomination, and as he had served his term could not be compelled. Mr. Sproul won. George Peters and John K. Bent contested for the vacant seat in the council, owing to the retirement of E. E. Burnham before his term expired. The town will miss "Ernie's" counsel very much. A "catch as catch can" contest for the three regular vacancies took place between S. T. Titus, C. A. Dakin, Eber Turnbull, J. H. Syda and Ralph Oliver. The successful wrestlers are S T. Titus. C. A. Dakin and John H. Syda.,

The mayor elect, lately retired from the firm of D. & O. Sproul, is a young man yet, and has no doubt many years ahead of him to be largely devoted to the good and welfare of the town. Mr. Sproul has filled the position of councillor for several years, and has been a leading member in the council.

POOR SERVICE

Island Man Complains of the I. C. R. Service at Picton.

Rowe, of the Steam Navigation company, Charlottetown, is in the city on a business trip. Mr. Rowe complains of the conduct of the I. C. R. officials of Pictou on Monday last. He says that the steamer Minto, on which he crossed from Georgetown to Pictou. arrived at Pictou about ten minutes before two o'clock. The I. C. R. from Pictou was due to leave at two, and the passengers from the steamer, of whom there were about twenty-five hurried from the boat in order to catch this train. On nearing the station, when the last of the passengers was not more than fifty yards from the train, the conductor signalled the engineer to go ahead and the train pulled out, leaving fully twenty passengers bound for Nova Scotia and New Brunswick points behind. Mr. Rowe says that there would have been sufficient time for the passengers to catch the train, and the conductor might have waited at least that long. On account of missing this train the party were compelled to remain over in Pic tou until next morning and instead of arriving in St. John on Monday night's train got here Tuesday evening.

Opens the System to all Epidemic Diseases

Next to the blood the most important fluid in the body is BILE. This is why the Liver is the largest organ in the body. Without Bile our food would decay in the stomach and bowels. We would soon die from the poison generated by the decay. But the Liver, when in health, keeps pouring Bile into the bowels. The Bile is nature's great Purgative. It is more. It is NATURE'S GERMACIDE. As soon as it touches the food in the bowels it makes it wholesome and sweet. It stops decay, destroys all poisons, kills all germs of disease. Healthy Bile is our best protection against disease of all kinds. It kills the germs and forces them out of the system before they can do harm.

Anybody whose Liver is in thoroughly good working order can go safely through any epidemic without catching it. The germs may enter the system, but they are killed before they can do harm. Where does the Liver get the Bile? It manufactures it from certain strong chemical elements in the blood. When the Liver is diseased it can't do this. These chemicals are very powerful. They aren't meant to stay in the blood. If they are kept there they make it weak and poor. Then the blood tries to get rid of them by forcing them through the pores of the skin. The complexion grows a dirty yellow. Disgusting pimples appear. The perspiration has an unpleasant odor. The breath grows bad. The eyes get dull. The whole body becomes weak and sluggish. Meanwhile the bowels, not having enough Bile to keep them working, become irregular in action. CONSTIPA-TION appears. The food stays too long in the body. It decays and poisons the blood. The whole body is weakened, and the victim falls a ready prey to the next disease he meets.

The only way to cure this is to put the Liver again in order. Purgatives will not do this. They don't touch the Liver. They only work in the bowels and force out whatever little Bile there is there. Purgatives produce an operation of the bowels but they leave the sufferer worse off than before. The Constipation always comes back unless the CAUSE is removed. The most common cause of Chronic Constipation is Catarrh mucus which has clogged the Liver. Doctors don't know this. Those few who suspect it don't know how to treat it. I DO. I have made a special study of it for years. Under my treatment the Liver itself is cleansed. It begins at once to work on the blood. The blood grows clean and pure again. It is able to gain stength from the food. ngly disquisting complexion grows clean and fresh. The eyes brighten. The breath sweetens. New strength leaps through all the body. Best of all, the cure is permanent.

Below are some of the most common symptoms of Catarrh of the Liver. Remember if you haven't Bile enough your strongest defence is down. You

are liable to catch the next disease you are exposed to. Symptoms of Catarrh of the Liver.

Unique methods of telephony are the new achievements has been fully ger of collisions and other disasters at One of the most important of these systems of telephone signals for ships was invented by the late Dr. Gray. By this plan the water of a lake, ocean, or river is made to act as the medium for conveying sounds, as, for instance, the strokes of a bell tolled below the surface of the water.
