Suspension of Activities

Liverpool and Manchester announce the impending suspension of the tramway services among the miners' effects of the strike is the closing of public school functions.

Late on Saturday the construction gang, known as the "stonepile" gang, which includes more than 20 unions, covering the dockers, the bus and tram workers, the commercial road transport men and the coal trimmers at the ports.

Francis Hodges of the miners' union has issued a statement giving minute figures intended to prove that the miners' wages since 1914 have advanced 100 per cent, while the cost of living has advanced 200 per cent.

The country awaited anxiously a report from the meeting held this morning of the Council of Transport Workers, which includes more than 29 unions, covering the dockers, the bus and tram workers, the commercial road transport men and the coal trimmers at the ports.

Newspapers contrast the attitude of Clynnes and Thomas with that of C. T. Cramp, president of the National Union of Railwaymen, who has given an unqualified warning to members of that union of the serious situation which will be created if the miners are defeated.

CESSATION OF COAL MINING COMPLETED

No Sign of Any Break in Ranks of Men, Dislocation of Industry Widespread.

TRANSPORT WORKERS IN CONFERENCE

Country Awaits Anxiously Report from the Meeting to Learn Their Attitude.

London, Oct. 18.—The cessation of coal mining throughout the country seems complete, for, although the miners in some districts appear to have entered the strike in a half-hearted manner, there is no sign yet of any break in the ranks of the men and consequently the dislocation of the country's industry is becoming widespread.

There is a confirmed report to-night that the Government intends to offer the miners a compromise of one shilling per shift advance, provided they accept submission of the whole dispute to an independent tribunal.

The strike will hit the iron, steel and cotton industries seriously. The great blast furnaces in the Middleborough district are already beginning to damp down; thousands of furnace men and steel workers are idle.
