THE WELL STATE OF THE WORLD STATE OF THE STA

A SURPLUS **EVERY YEAR**

Preud Record of Liberal Government --- Noteworthy Statistics.

Taxation Reduced—Public Debt Decreased Concurrently With Large Expenditures for Development of Country.

(Special to The Daily News)

Ottawa, May 16-A government that has been in power for 11 years, and is stronger in its personnel and more deeply rooted in the confidence of the public after the expiration of such a term, must have gained its enviable position by an unbroken line of pledges faithfully kept.

This is the position of the liberal government today. When the affairs of the country, which for years previously had been so mismanaged by conserva emigration had practicaly ceased, and the population for some cause, never satisfactorily explained, was dwindling or at best remaining stationary, the lil

erals were called upon to administer the affairs of the country. Previous to 1896 a number of scandalous transactions had been unearthed and exposed to light. It had been found that public money had been squander without any adequate return. Men in power had used thier office and influence in directions calculated to bring advantage to themselves, and in their actions had not consulted the welfare of the people. Public in-terests had been scandalously neglected for private gain, and even the conser-vative cabinet was so divided against itself that the leader of the then gov ernment described his own colleague

as a "nest of traitors."
Under these circumstances there could be but one result, and that distinctly infavorable to the people generally. After the clean sweep made in 189 by the liberals under the distinguished Wilfrid Laurier, conditions changed a if by magic. He called to his councils and from that time to the present, pros perity has reigned where distress pre viously abunded, deficits were turned into surpluses, the business of the coun try became vitalized, industrial affair provided work for the artisan and la over, and peace and content succeede

dissatisfaction and unrest. Such results could only be achieved by honest, economical management of public affairs, coupled with an intelligent public policy, wisely administered That the people of Canada appreciated this was demonstrated very forcibly at the general elections of 1900 and 1904 when the liberals, with their record of trust faithfully kept, were t people asking for a renewal of public confidence. The overwhelming majori-ties given to sir Wilfrid Laurier's government on those two occasins are mat

ters of history.

The liberals during their first year of office succeeded to a conservative deficit of \$519,981, but by the next year all this had changed, and from 1896 to date, the liberal administration of pub lic affairs has resulted in the follow-

This satisfactory condition of affair can only be accounted for by intelli-gent and honest management of the country's business. It supplies in addition the best possible evidence of the properous condition of the commercial

affairs of the dominion. If material advancement may b guaged by revenue, surely this item in the econmic affairs of the dominion deserves attention, showing as it does the immense increase since the liberals assumed office. In the years 1899-90 assumed office. In the years 1899-90 the revenue was \$39,897,925 under a conservative government. It fell to \$36,618,590 in 1895-6, also under a conservative government. What happened the liberals assumed control in From that date to the presen

rent of government could be produced than this? It will be seen that the revenue actually decreased under a conser at ve admin's ration but since the liberals came into power in no single year since 1896 have the revenues decreased, but have always increased until the total revenues have grown rom \$37,829.778 in 1896-7 to \$80,139,360 in 1905-6. A most creditable and satis-

factory circumstance. has been falsely alleged that the increased the taxation, whereas the fact is that the rate of has been bowered. In 1896 the ublic debt was \$258,497,432, in 1907 i is only about \$260,000,000. A very small increase, represented by expenditures account, while the debt per

capita is largely decreased. In 1896 it was \$50.61 per capita, now it is only \$40.20 as the following table shows:

Population Net debt P.C. 18955,054.285 \$253.074.927 50.07

248,497,432 50.61 261,539,596 50.66 263,956,398 50.66 266,273,446 50.50 5.107.918 5,162,121 5,216,899 5.272.258 265,493,806 49.83 268,480,003 49.59 5.328,205 271,829,089 49.0 5.537,500 261,606,988 45.80 260,867,718 266,224,166 44.28 6,085,930 6.320.000

267.042.977 42.25 259,000,000 40.20 portion to an extent greater than that of any other country. The development of financial and materials of any other country. The development of financial and material resources has made rapid strides since the liberals came into power. The following trade statistics will be interesting proof of

1896-Total exports of Can-....\$113,000,000 Today — Total exports of 118,000,000 Today-Total imports 1896-Duties collected 20,000,000 Today-Duties collected 46,000,000

1896-Goods entered for con-110,000,000 sumption Today—Goods entered for .. 290,000,000 .. 575,000,000 Total trade of Canada..... During the past decade France's trade has increased 21 per cent, the United Kingdom 26 per cent, the Argentine republic 26 per cent, Italy 25 per cent, United States 47 per-cent, Cape Colonies 43 per cent, Japan 97 per cent and Can-

ada 100 per cent.

The immense expansion of the trade of Japan during the past ten years has been an example for, as it has been

Canada has surpassed Japan in the same period of time. Fielding, when presenting his last budget speech made some allusions to the tariff changes that had been made and were proposed, among things he said: "Just how far sed, among other legislation has a bearing on the growth and progress of the country, always has been, and always will be, a subject for differences of opinion. But so far as we admit that a tariff policy of a counand prosperity, I think all will frankly acknowledge that the tariff of 1897 has has been to encourage a large degree of tariff stability, not a slavish adherence to every item in the tariff but we have been desirus that the impression should go abroad that the government were not willing to hastily make changes, that they were rather slow to do anything in that line, and only when a case be-

came of extreme urgency would we un-dertake to make changes. In the sec-ond revision of the tariff its stability was kept in mind."

The intermediate tariff has been so arranged that if a foreign nation wishes o trade with Canada and is willing to reduce its tariff on certain Canadian articles in return for like concessions from Canada for its goods, the interme-diate tariff will enable this to be done for a term of years. It is simply an inducement coupled with an invitation to other nations, that if they desire to enter into negotiations with Canada

they may secure the advantages of the

intermediate tariff by the giving of ompensating advantages.
While the revenues have increased the responsibilities of the government have been enlarged. With greater revenues came greate rburdens, inseparable from a fast growing country. The government has not been unmindful of this fact. In order that Canadians may reap the greatest benefit from the material advancement and prosperity of the country at large, and avail themselves of their natural advantages and opportunities, the government has entered upon great public works in the general interest. Railways have been assisted, wharfs built, canals deepened, harbors dredged, public buildings erected, all of them for the general advancement of the people and to meet the require-

ments of expanding trade.
Public money has been wisely expended in this regard. Not to enrich the few, but in such a manner that all the people are benefitted. This is the sur-est test of honest and wise administration, that public money is expended in the public interest and for the general

ADVANCE PRICE OF COAL

CONSUMERS WILL PAY MINERS THEIR INCREASE

CALGARY DEALERS HAVE AL-READY TAKEN ACTION

Calgary, May 16-Owing to being notifled by the operators of the Bank-head mines, near Banff, of an increase in the price of coal, local dealers, claiming that they are only raising the price to what they have been raised them-selves, have put the price of coal up from 20 to 50 cents per ton. The general raise at the mines is 15 per cent and the public will have to pay the piper. The increase is likely to cover the new agreement made with the miners, so that the companies can keep on declaring dividends unimpaired by the increased wage scale. So far the other any increase, but it is expected the notice will arrive any day.

Mr. and Mrs. Anthony Turner and city last evening after a six months stay in the old country. They all de-clare that they are delighted to get back to Nelson once more and were pleased at the many kindly greetings and hand shakes they received on their arrival off the Kuskanook last night. They are at the Strathcona for the present. Mr. Turner said they had been instrumental in inducing a party of five English people to come here. They would arrive shortly and settle here-abouts, some of them wanting to go in for fruit ranching. On the way across the ocean Mr. Turner said they were detained three days in the ice and lost another couple of days in crossing the continent over the C.P.R.

DISLIKES DEBS'

BOISE JUROR'S VIEWS ON PRES ENT DAY SOCIALISM

WORK OF SELECTING JURY STILL IN PROGRESS

Boise, May 16-There was an afternoon ession only of the court today in the Haywood case, the attorneys generally atending the funeral of forme judge Edward Nugent in the morning Thirteen men were examined to secure one to fill chair number 2, vacated by the preemptory challenge o William Vanorsdale yesterday. The man secured was Joel Matthews, a far mer. The defence then excused Meller Pride by preemptory challenge, and Frank Madden was called into the box

(Special to The Daily News)

as court adjourned. The men excused during the afternoon were all let off on prejudice, direct or implied, excepting one, who explained that he was not in good health and might be taken down with an attack of a disease of a chronic character, thus

hanging up the case.

Among those called during the day
was James A. Pinney, a resident of this
city for 40 years, and who served as He had an opinion. J. E. Clinton, Jr., cashier of the Boise

city national bank, also had a fixed A. V. Eichelberger, one of the le ing orchardists of the valley, was an-other of the excused. When he took the stand he said he had formed an opinion which might interfere with his arriving at a verdict entirely based on the evidence and law. He was not opposed to capital punishment on circum vincing nature. He said he could give the defendant the henefit of a reason able doubt, but he was quite certain, he said, that he could not lay aside opinion regarding the merits of the case. His opinion did not affect the prisoner personally. He approved of

labor organizations, "You may examine," said Borah, and of your prejudice "I have no use for latter day social-

"Latter day socialists," repeated Richardson, with the accent on the "day."

"We admit the challenge," announce The most interesting feature of the day was the opportunity given visiting newspaper men to see Harry Orchard the man on whose confession the entire case turns. One party went up to the penitentiary in the morning, another in he afternoon and the last this evening The men of the press were intensely in-terested. They found Orchard in splendid health and alert in mind. He brought into the warden's office for the interviews and greeted his visitors pleasantly. This was the first time a newspaper man had been given an op-portunity to talk with him since his incarceration. It was the understanding that he was to be asked no ques-tions about the case of the accused mer and none were asked. Orchard reiter and the request. He was well dressed and wore a moustache grown since his incarceration. Orchard said he had employed much of his time in reading. He has studied English history and read a number of religious works, including life of Christ In former times he said he had read trash, but no longe had a taste for such reading matter He stated that he walked much in the prison yard for exercise, but did not associate with the other prisoners. There were some men there, he said, who had come to digrace through mifortune and he pitied them and talked with them in the hope of helping them. Orchard was calm throughout these interviews and spoke frankly, and with such manifest earnestness and sincerity that he made a profound impression on his visitors. He was not boastful nor was he obsequious, but spoke in a manly manner that appealed strongly to those present. Orchard was asked whether any form of coercion had been brought to bear by captain McPharland to induce him to make a statement. He re-plied there had been nothing of the kind, but everything he had told was of

the entire time of his confinement. MINING RECORDS.

FATALITY AT GREENWOOD

MINER EMPLOYED AT MOTHER LODE CRUSHED TO DEATH PUMPED FROM LOADED ORE CAR

ON WRONG SIDE

(Special Correspondence) Greenwood, May 16—A fatal accident occurred at the B. C. Copper company's Mother Lode mine in Deadwood camp on Wednesday about 1:30 p.m., when W. A. Clark, who was riding on one of the ore trains coming out of the tunnel, jumped off on the wrong side and was severely mangled by being crushed against the wall. He was immediately taken by the Greenwood ambulance to Sister's hospital and was attended by Dr. S. Oppenheimer, who found that he was injured internally. Clark died at

BIG IMPERIAL PROJECT

ESTABLISHMENT OF GENUINE FAST STEAMSHIP SERVICE.

JOINT UNDERTAKING OF BRITAIN AUSTRALIA AND CANADA.

The Toronto News publishes the fol-owing special cable from its London correspondent anent the proposed fast Atlantic steamship service, to which sir Wilfrid Laurier has devoted so much, and such successful, attention

during his visit to England:
However fruitless the Colonial Conference may seem in some respects, there is now every reason to believe that it will result in the long hoped for establishment of a genuine fast Atlantic steamship service. Speaking in the conference on April 26th, sir Joseph Ward advocated a speedier steamship service between these islands and the colonies. It was noticed that sir Wilfrid Laurier applauded. A conference was held between sir Wilfrid and the promoters of the Blackson Bay-Halifax scheme, in which the Ca nadian premier betrayed deep interes in the project. On May 2d sir Wilfrid Laurier suggested that the motherlan n.__. give a quod pro quo for the preference by subsidizing fast steam-ship lines between Great Britain and the colonies. Mr. Lloyd-George opposed this, but it made a direct appeal to the conference. Different dispatches from here have outlined the suggested

scheme of a fast Atlantic service, an

in improved Pacific service.

It may now be stated authoritatively that a definite plan has been made, de tails worked out, and it only waits rat ification by the two parliaments to consummate the greatest imperial project of many pears. The plan involve the formation of a new Atlantic steam sup company; the commissioning of vessels which represent the latest de-velpments in naval architecture, with a speed of 25 knots, and able to main tain an average of 24; this service to be subsidized by the British and Canadian governments, each to pay prob It also involves the Australian com monwealth and New Zealand joining in the project by subsidizing the Pacific service, which would then be increased from 13 to 18 knots, and extended to The scheme is a magnicfient concer tion of the soundest and most practical kind of imperialism. It should appeal to the whole of Canada, as it has appealed to sir Wilfrid Laurier. And, despite the opposition of Mr. Lloyd-George, it is expected here that the British government will assent if the Canadian government will also agree. It has long been recognized that the great bar to the fullest development of trade and travel between Britain and Canada has been the lack of a fast and reliable steamship service plying between the Canadian Atlantic seaboard and British ports. Most of the high-class passenger traffic between Britain and America is via New York. Most of the mail service is via New York. So that, notwithstanding the fact that Halifax is about 800 miles nearer Liverpool than is New York, the want of a fast service has diverted the bulk of the traffic away from Canadian ports to New York. While there are steam-ships plying between Britain and Ca-

from 12 to 14 days, which is too slow or business purposes.

Besides the loss of trade which this diversion of traffic away from Cana-dian channels has occasioned, it has diminished Canadian prestige and inreased that of the United States Ca handicap in competing for the trans-Atlantic trade. Generally it has retarded Canadian development to a serious degree, and the ratification of the resent scheme should give enormou mpetus to inter-imperial trade and

The fastest boats from New York to Queenstown take five days and from nine to eighteen hours. Assuming a vernool, the time would be rejuced to four days, practically from one to two days-at least 20 hours quicker than the crack liners of the North erman Lloyd, Cunard and White Star ines, sailing out of New York.

This would establish a Canadian mail service quicker than the zervice via New York by at least one day. It would provide ample, rapid and promp service for certain classes of perishable freight. The certainty of fast transportation on fixed dates by steamers, properly equipped, and with proper rail-way connections, would tend to an enormous development in this tragfic. would inevitably place Canada on a di-rect line of traffic between Britain and China, Japan and Australasia. It would transfer a great portio nof the high-class passenger traffic toward the east to the Canadian route, as well as a large portion of the trans-Atlantic pastraffic from the United States. From an imperial standpoint, the development of a fast service on both oceans wuld perfect an all-British route to China and Japan over British erritory and in British ships, to which the all-British cable would be subsidi-

It would, of course, be necessary to establish a fast train service from Hal-ifax to New York and Montreal, the latter to connect at Montreal with the service to the American west via Toronto and Chicago, and with Vancouver and the Pacific steamship lines by the Canadian Pacific railway and Grand

The dominion, as well as various interests domiciled there, have expended vast effort on the development of Ca-nadian ports and Canadian channels of transportation. It is obvious that the stablishment of the Atlantic fast line and the perfection o fthe railway serv

LATEST GOLD STRIK Edmonton, May 16 - A great gold strike is reported from On nica river, B.C.

ice is the natural complement of tha policy, and the one thing yet essential to Canada securing the large proportion of the trans-Atlantic traffic. Even the present rather slow service on the Pacific has secured all the business it can handle, despite the competition of the steamship lines plying from American Pacific norts. To increase this 12-knot. **WAY PROJECT** Pacific ports. To increase this 13-kno

service to 18 knots would be to insure to the new boats all the traffic they

The inauguration of this long-needed, long-looked-for fast Atlantic service will be a great boon to Halifax and

e maratime provinces, and to the hole of Canada. It is a question

whether even a preference in the man

kets of Britain could do more for Ca

for strengthening the bonds of empire

than this fast atlantic service which i

We are informed that a Spokane com-pany will during the summer harness

up the immense water power of the

Lardeau river and supply electric power to the whole surr anding country, on

ractically the same lines as the West

Cootenay Power and Light Co.

Another industry, which as yet is

only in its infancy, but which has grea

possibilities, is the ranching, market-gardening and small fruits. The val-ey between Trout Lake and Beaton is

rtile and rich and will add thousands

of dollars annually to the wealth of the district.

As a summer resort and for tourist

travel the Lardeau presents an ever changing scene of beauty. In the valleys and foothills are found

lakes and streams abundantly supplied with all kinds of fish, while higher up

in the peaks and glaciers the hunt

can delight in getting after the bigger game. Here the tourist can have a cli-mate unsurpassed. No excessive heat, no mosquito pests everything that is

Yesterday morning Chief of Police

Davitt of Trail brought over Gustave Bouchard of the smelter city, charged with the wilful murder of David Hos-ker on Sunday last, and lodged him

in the provincial goal, where he will remain until his trial at the fall as-

sizes, next October. Bouchard is a

fine looking man and seemed to feel his position very keenly

Line to Be Built From Fort Churchill to Port Simpson.

Will Shorten Route From Liverpool to Yokohama by 2,768 Miles and Open. Up Rich Farming Country.

(Special to The Daily News) Winnipeg, May 16-It is learned that syndicate of New York and London capitalists has been organized for the purpose of building a direct line between Fort Churchill and Hudson's Bay, The proposed road, which is announced as a certainty, will shorten the route from Liverpool to Yokohama by 2,768 miles. It will be 300 miles north of any other transcontinental line and open up one of the richest farming and

mining countries in the world. The Fort Simpson and Eastern Railway company, which is road, is capitalized for \$100,000,000. David B. May, former special agent of the United States department of the interior, in Alaska, is secretary. He spent 16 years in the great northwest restigating the possi

road and it may be said that he is the ounder of the new undertaking "I have always believed that the plan was feasible, but I have had great difficulty in convincing the people that the northwestern country is warm and fertile," said Mr. May recently. "The country has been little explored and most people believe it to be cold and barren. It is just the opposite. The chinook winds sweep across the level land and the Japan current makes it almost tro-pical. I have never seen such crops of wheat as are raised in the northwest

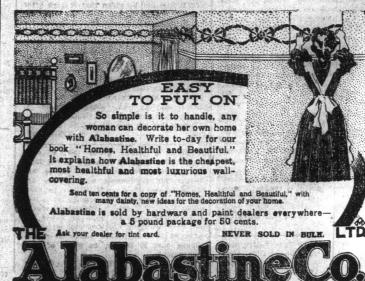

The country is also wonderfully rich in minerals and there are millions of tons of fine asphalt. "Our road will be 1450 miles long We expect to run trains from Port Simpson to Fort Churchill in from 30 to 35 hours. We have already obtained terminal facilities at both places and in six days expect to have our sirveyors in the field. This road will supply an almost direct route from Liverpool to Yokohama. From Liverpool to Churchill the distance is 3363 miles and from Churchill to Port Simpson 1450 miles, and from Port Simpson to Yokomiles, and from Port Simpson 1450 miles, and from Port Simpson to Yoko-hama 4445 miles. That will be our route compared to the following other transcontinental roads: Liverpool to New York, 3406 miles; New York to San

Francisco, 3390 miles and San Francisco to Yokohama, 5140 miles. It is thus seen that we save 2768 miles of travel. "I would like also to state that Hudmost of the time, as is generally be-lieved. We have contractel for two steamers, capable of carrying 25,000 tons, to run from Port Simpson to Yokohama, and have assurances from Eng-lish capitalists that a line will be es-tablished from Liverpool to Churchili. The country this road expects to develop has 500,000 square miles of the pelop has 500,000 square miles of the pest wheat land on the face of the earth. Forty bushels to the acre are taken off the farms. I have been all over the country on horseback and know every foot of it. Another advantage we have as high as they are in the south. Where is equal to the climate of Maryland. It is 30 degrees warmer than in Winnipeg. There are 250,000 Americans who went into the great Northwest last.

NOTICE

NOTICE is hereby given that the regular annual shareholders' meeting of the Lucky Boy Mining and Development Co., Ltd., of Erie, B.C., will be held at the Company's office in Erie o nthe 27th day of May, 1907, at the hour of 7 p.m. for the suing year and such other business as may come before the meeting. purpose of electing directors for the en-
