Weather Wisdom.

A very curious method of making weather predictions has been discovered by an old French farmer.

"On Christmas eve," he says, "when the bells begin to ring for midnight mass take twelve onions and place them in a row on a table. The first onion will represent January, the sec ond February, and so on. Next make a large slit in each onion and pour some salt into it. If at the end of an hour you find that the salt in the month. Moreover, if the salt in any onion is melted at the top, but not at the bottom, the first fortnight of the night dry."
