1900, 1st JANUARY.

EXPLANATION.

IN the head of the Cross are the years from 1849 to the end of the 19th Century, and in the foot of the cross the whole of the 20th Century. The * denotes Leap Year.

In the heart of the Cross are the names of the days of the week; in the right arm the days of the month, and in the left arm the names of the months required and the number of days in each.

The first horizontal line in the heart shows the day of the week of the first of January or October of every common year (or of January, April or July of every leap year), the vertical line from which shows the first day of any month n the year.

Now when the week-day of the month is found, take vertical column which begins with the same day, follow it down until opposite the day of the month in the right arm, and you have the week-day required. For instance, you were born on the 25th of August, 1856, what day of the week was it?

This leap year began Tuesday; start from the 1st of January, 1856, follow down the vertical line until you come to the 1st of August which is Friday; now follow down the vertical line which begins with Friday until you come opposite the 25th in the right arm, and you will find the 25th of August, 1856 was on Monday.
