## QUESTIONS AND ANSWERS.

## Miscellaneous.

## CAPACITY OF AND MATERIAL FOR SILO.

1. How many tons of corn will a silo hold, ten feet in diameter and thirty feet high?

2. What is the best to build of, wood or cement concrete?

J. A. R.

Ans.—1. Between 50 and 55 tons, if well filled, i. e., settled and refilled once or twice.

2. Cement concrete is the best; wood is cheaper.

## SEEDING ALFALFA—RAPE FOR HOG PASTURE—RATION FOR DAIRY COWS.

1. Which would be the most suitable to seed alfalfa on, fall-wheat ground (well-drained clay), or on barley ground after corn? What time would be best to sow it, and how much to the acre? If sowing on barley ground, should I sow with the barley or later, in front or back of the hoes?

2. Am intending sowing some rape for hog pasture. How early would it be safe to sow it to come in early pasture for pigs, and how much per acre?

3. Would you consider this a well-balanced ration for milk cows that have been milking since July, and are giving three times the value of grain fed: Two bushels ensilage, half a bushel mangels, six pounds shorts, and two lbs. oil meal, and what oat straw they will eat?

F. B.

Ans.—1. By all means seed it with barley after corn, as early in the spring as the land can be worked up to a fine tilth, say the end of April or the first of May. Some sow as little as ten or twelve pounds per acre, while other very successful growers are convinced that it pays to sow thirty. We advise twenty to twenty-five pounds per acre. Sow at the same time as the barley, and in front of the drill hoes.

2. Rape is not usually sown before corn-planting time, but may be sown as soon as the ground is warmed up nicely in the spring, say about the first of May, or, perhaps, even in April. Four pounds of seed per acre broadcast or three pounds in drills should be ample. It is well to use plenty of seed, as swine do not like the coarse stalks.

3. Yes, excellent. It will undoubtedly pay, however, to vary this somewhat, according to individual response. To do this to the best advantage it is necessary to weigh and test each cow's milk.

## TRADE TOPIC.

PRaise FOR STUMP PULLER.—The Smith Grubber Co., of La Crosse, Wis., are sending out free copies of a book called "Evidence," containing letters from owners of the famous Smith Grubber or Stump Puller, and actual pictures of the hundreds of stumps they pulled with this machine. One man tells about pulling 50 stumps per day with a Smith Grubber and one mule. Another man says: "My son and myself have pulled 100 stumps a day with the Smith Grubber." The only man, apparently, who finds fault with the machine is a fellow in Ohio, who "kicks" because the neighbors want his Smith Grubber all the time, as it does such good work. Write a postal to the above company for the free book of "Evidence."

A motor car was proceeding along a country lane. In it were seated two motorists wearing the most correct thing in the way of fur coats, goggles, etc.

On swinging round a curve they came full upon a groom who was exercising a couple of horses. As the animals appeared to be very restive the car was brought to a standstill, but the horses' terror only grew worse.

One of the motorists called to the groom:

"Can't you get them past? We've stopped the car."

To their surprise the man responded: "Oh, it ain't the motor, sir! If you gentlemen will only get out and hide behind the hedge for a minute it'll be all right."
