American Consul Thomas H. Norton, of Chemnitz, advises that the German statistical office has prepared a very careful comparative statement showing the general increase in the prices of commodities during the past few years. As a basis for comparison the office adopted the average prices of commodities during the decade ending in 1898. With these prices are contrasted the rates current in the month of June, 1907. There is a general increase, but the ratios among the different categories of articles show wide divergencies.
